

AUTOBOX® 3L

TRIPLE LANCE
TUBE CLEANING

The StoneAge AutoBox® 3L is an automated system for hands-free heat exchanger tube cleaning. It is designed to run triple, dual, or single flex lance setups with an emphasis on portability, ease of setup, and safety.

- Remote operation enables increased safety and productivity
- Runs hose sizes from 3/2 to 8/4 without changing parts
- Lightweight, modular design allows quick set-up in limited access locations
- Conversion Available 

REMOTELY ADJUSTABLE HOSE CLAMP

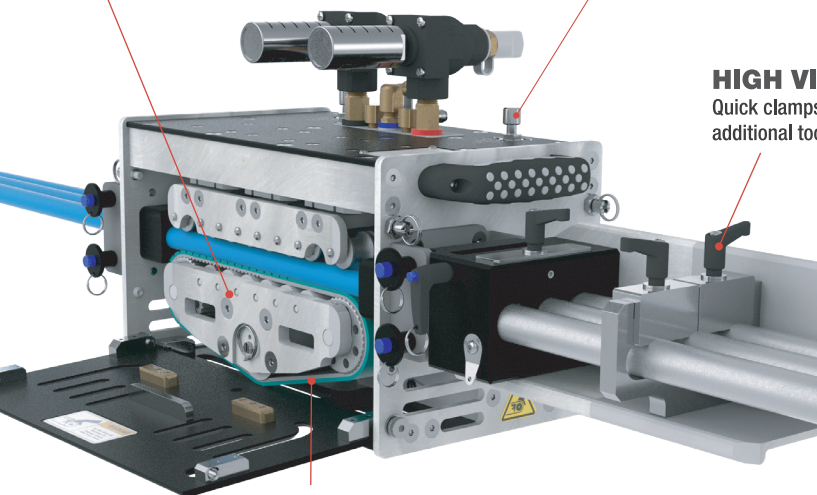

Adjust to changing conditions on the fly and minimize hose wear without interrupting workflow

INDEPENDENT FWD/REV SPEED CONTROL

Consistent cleaning in both directions produces better results in less time

HIGH VISIBILITY GUIDE ASSEMBLY

Quick clamps for easy pitch adjustment with no additional tools or adapters required

STEEL-REINFORCED DRIVE BELT

Replacement takes minutes, requires no tools and costs a fraction of competing drive systems

“

The AutoBox® 3L enabled us to remove hard scale in a difficult vertical exchanger that hadn't been successfully cleaned in 20 years.”
