

**NEW FOR 2016**

## HCS-2L HOSE CONTAINMENT

The Hose Containment System, or HCS-2L, is a lightweight accessory for the Autobox ABX-2L, which contains and securely stores hoses typically used for heat exchanger tube cleaning.

The HCS is a simple system to setup and operate, and greatly increases job site safety by eliminating the potential for high pressure hoses to snag on structure, valves, or other objects. It also increases hose life by reducing wear and makes it easy to store and transport hoses between jobs.

### FEATURES:

- Holds up to 84 ft (26 m) of 6/4 hose.
- Built-in backout prevention for improved jobsite safety.
- Keeps job site clear of trip hazards.
- Helps manage hoses for easy transport and storage.
- Greatly extends hose life.

#### **NEW HCS-2L HOSE CONTAINMENT**

Comes in two basic models – the North American model is supplied with "Type M" fittings, and the European model is supplied with metric and BSPP fittings.
