HOSE CONTAINMENT SYSTEM

The StoneAge Hose Containment System is a flex lance storage and management tool used in heat exchanger, tube, and pipe cleaning applications. Proper hose containment increases job site safety by reducing trip hazards in the blast zone and eliminating the potential for high pressure hoses to snag on structure, valves, or other objects.

StoneAge offers hose containment for 1-lance, 2-lance, and 3-lance applications. The systems are simple to setup and operate, increase hose life by reducing wear, and make it easy to store and transport hoses between jobs.

FEATURES:

- Reliable hose containment and storage for increased job site safety
- Easily store and transport hoses between jobs
- Portable design with small footprint
- Reduces hose wear
- Lightweight and durable with good corrosion resistance

NOW AVAILABLE HOSE CONTAINMENT FAMILY

StoneAge offers hose containment solutions for 1-lance, 2-lance, and 3-lance applications.
