FIN FAN ACCESSORY

The Fin Fan Accessory adapts AutoBox series hose drives for the specific requirements of cleaning Fin Fan style exchangers.

Fin Fan Accessory components allow the hose drive to be attached to our Lightweight Positioner and safely mounted in the tight walkway spaces that are common on Fin Fan units. Customizable rail lengths and simple mounting clamps adapt the Lightweight Positioner to accommodate most Fin Fan headers and configurations.

FEATURES:

- Modular, lightweight, fully adjustable to fit most fin fan exchanger configurations
- Hose snout and guide tube assembly with built-in backout prevention
- Adjustable pitch for accurate lance control and indexing
- Scaffold mount to existing structures
