

# BARRACUDA

## Rotary Shotgun Tools for Thick, Heavy Deposits

Barracuda self-rotary tools are the industry standard for speed controlled rotary shotgunning. These lightweight tools adapt to any high pressure pump and are excellent for difficult and irregular surfaces where an operator using a hand-held tool can more efficiently maneuver the cleaning head. Being so versatile and easy to maintain, Barracuda tools are also used on automated pad blaster excavators and other hands-free applications.

Our leak-free seal design and centrifugal speed control delivers more power to the surface for superior results. Barracuda self-rotary tools eliminate the need for expensive compressed air drives.

### COMPETITIVE ADVANTAGES

- Effective shotgunning for a wide range of pressures
- With self-rotary tools, jet reaction creates rotation so there's no need for compressed air
- Light weight eases fatigue and keeps operators working with less stress
- Field maintainable, easily rebuilt in most shops with low-cost standard fluid and parts
- Four-port heads can easily be configured for two-port applications
- Titanium head available for low flow applications

| FEATURES  | BENEFITS   |
|---|--|
| <ul style="list-style-type: none"> <li>• Controlled rotation</li> </ul>     | <ul style="list-style-type: none"> <li>• Centrifugal brake maintains a slower speed allowing longer jet impact time with the cleaning surface</li> </ul>                         |
| <ul style="list-style-type: none"> <li>• Two or four jet options</li> </ul> | <ul style="list-style-type: none"> <li>• Select two jets for hard-hitting deeper penetration or four jets for thin, hard surface removal</li> </ul>                              |
| <ul style="list-style-type: none"> <li>• Replaceable nozzles</li> </ul>     | <ul style="list-style-type: none"> <li>• Easily configure your tool to match pump capacity</li> <li>• Low cost part replacement maintains highest quality performance</li> </ul> |
| <ul style="list-style-type: none"> <li>• Impact resistant shield</li> </ul> | <ul style="list-style-type: none"> <li>• Inexpensive and easily replaceable shield protects working parts of the tool</li> </ul>   |
| <ul style="list-style-type: none"> <li>• Leak-free seal design</li> </ul>   | <ul style="list-style-type: none"> <li>• 100% of the water is used for cleaning</li> </ul>   |

## QUESTIONS TO ASK YOUR CUSTOMER

- What pressure and flow are you operating?
- What type of material are you removing?  
*Four jets are generally more effective for thin, hard deposits and two jets for thicker/deeper cleaning.*
- Do you need an adapter?
- Do you want a service or overhaul kit?

## OTHER INFORMATION

- Barracuda tools are often being used on automated pad blasters — contractors use a shroud around the Barracuda and have a pivot arm fabricated to a common mini excavator. Contact our StoneAge Custom Solutions team for options.
- While it is possible to retrofit the new titanium head onto a standard 40k Barracuda, we recommend the purchase of a new tool. Retrofitting the tool voids its warranty, and the sum of the new parts exceeds half the price of a new tool.
- For information about automated alternatives to manual shotgunning, contact StoneAge Custom Solutions.

## TOOL SPECIFICATIONS

| PART ID                          | BC-K                      | BC-K-P2                   | BC-H9-C                     | BC-H9LF-C                   | BC-H9XXLF-C-TI              |

# BARRACUDA TOOL CONFIGURATION

---

---

## A complete Barracuda tool configuration requires the following components:

1. Appropriate tool option for the working pressure and number of nozzle ports
2. Nozzles/Plugs of appropriate number and size

## The following items may also be required:

- Suitable lance adapter

## To configure a Barracuda tool, the following information should be obtained:

- Pump pressure and flow
- Hose length and ID
- Lance end fitting

# BARRACUDA TOOL CONFIGURATION

## ORDER TOOL BY STANDARD PACKAGE

StoneAge offers standardized Barracuda tool packages for the most commonly used configurations. All Barracuda tool packages come fully assembled and include: 1. Tool, 2. Nozzles specified to jetting. Some of the packages also contain the lance adapter.

*PLEASE NOTE: Lance adapters are not included in all packages. Please check the details of the package contents below. If an adapter is required for your configuration, it must be ordered separately. See Fittings and Adapters for available options.*

The following table shows the configurations of standard Barracuda tool packages:

| MAXIMUM PRESSURE    | HEAD TYPE | PACKAGE CONTENTS  | PACKAGE PART ID            |
|---------------------|-----------|---|----------------------------|
| 22k psi<br>1500 bar | 2 Port    | 1 x 22k/1500 bar Barracuda tool assembly<br>2 x AP4 Attack Tip nozzles                                  | <b>BC-K-MP-PKG</b>         |
|                     |           | 1 x 22k/1500 bar Barracuda tool assembly<br>2 x AP4 Attack Tip nozzles<br>1 x Adapter for 1/2 NPT lance | <b>BC-K-NPT-PKG</b>        |
|                     | 4 Port    | 1 x 22k/1500 bar Barracuda tool assembly<br>4 x AP2 Attack Tip nozzles                                  | <b>BC-K-P2-MP-PKG</b>      |
|                     |           | 1 x 22k/1500 bar Barracuda tool assembly<br>4 x AP2 Attack Tip nozzles<br>1 x Adapter for 1/2 NPT lance | <b>BC-K-P2-NPT-PKG</b>     |
| 40k psi<br>2800 bar | 4 Port    | 1 x 40k/2800 bar Barracuda tool assembly<br>4 x OS7 Sapphire nozzles                                    | <b>BC-H9-C-PKG</b>         |
|                     |           | 1 x 40k/2800 bar Barracuda tool assembly<br>4 x OS7 Sapphire nozzles                                    | <b>BC-H9LF-C-PKG</b>       |
|                     |           | 1 x 40k/2800 bar Barracuda tool assembly<br>4 x OS7 Sapphire nozzles                                    | <b>BC-H9-XXLF-C-TI-PKG</b> |

**When ordering a standard Barracuda package, the Dealer should specify:**

1. Package Part ID
2. Pump pressure and flow
3. Hose length and ID
4. Lance adapter, if required

FOR EXAMPLE:

| QTY | PART ID            | DESCRIPTION                                |
|-----|--------------------|--|
| 1   | <b>BC-H9-C-PKG</b> | Pump 5 gpm 40,000 psi. 100 ft 8 mm ID hose |
| 1   | <b>AF 071-H9</b>   | 9/16 LH collar                             |
| 1   | <b>AF 072-H9</b>   | Anti-vibe gland nut                        |

# ORDER TOOL BY LINE ITEM

Complete tools can be configured by following the steps outlined below.  
Contact your StoneAge Account Representative for questions about specific applications.

## STEP 1 TOOL SELECTION

There are five Barracuda tool options available. The correct tool is selected based on the maximum working pressure, flow rate of the pump and number of nozzle ports required.

| MAXIMUM PRESSURE    | INLET CONNECTION | HEAD TYPE | FLOW                    | TOOL PART ID           |
|---------------------|------------------|-----------|-------------------------|------------------------|
| 22k psi<br>1500 bar | 9/16 MP          | 2 ports   | 5–15 gpm 19–57 l/min    | <b>BC-K</b>            |
|                     |                  | 4 ports   | 5–15 gpm 19–57 l/min    | <b>BC-K-P2</b>         |
| 40k psi<br>2800 bar | 9/16 HP          | 4 ports   | 5–8 gpm 19–30 l/min     | <b>BC-H9-C</b>         |
|                     |                  |           | 3.5–4.5 gpm 13–17 l/min | <b>BC-H9LF-C</b>       |
|                     |                  |           | 1.7–3.1 gpm 6–12 l/min  | <b>BC-H9-XXLF-C-TI</b> |

## STEP 2 LANCE CONNECTION

A lance connector may be required. The Barracuda tool is typically connected to the lance with either a collar and gland nut or an adapter. See *Fittings and Adapters* for available options.

## STEP 3 NOZZLES AND PLUGS

Barracuda tools come in 2-port and 4-port configurations. Generally, two jets deliver more concentrated power for heavy, thick deposits and four jets are ideal for removing thin, hard deposits.

It is possible to plug two of the ports on 4-port Barracuda tools. The plugs must always be installed in the ports positioned opposite each other, as indicated in *Figure 1*.

The charts on the following page demonstrate appropriate nozzle sizing for common pressure and flow scenarios. Use the StoneAge Jetting App to verify accurate jetting:

**JETTING.STONEAGETOOLS.COM**

Figure 1. Plugs installed in opposite nozzle ports

Kit components and tool maintenance/assembly videos are available on the StoneAge Dealer Portal:

**DEALER.STONEAGETOOLS.COM**

For questions or help with a specific application, configuration or tool repairs, please contact your StoneAge Account Representative.

### When ordering a Barracuda tool by line item, the Dealer should specify:

1. Barracuda tool Part ID
2. Part IDs for appropriate number of nozzles/plugs
3. Part ID of lance adapter, if required
4. Part IDs for any accessories or maintenance items

FOR EXAMPLE:

Barracuda tool for pump running 11 gpm/10,000 psi. 100 ft 1/2" ID hose. 2 jet version to fit to a 3/8 NPT gun lance. Carrying case and seal kit.

| QTY | PART ID      | DESCRIPTION                                 |
|-----|--------------|---|
| 1   | BC-K         | Barracuda Swivel Assy, 22k psi, 2 jet       |
| 2   | AP4 047      | Attack Tip 1/4 NPT                          |
| 1   | AF 065-MP9P6 | Adapter 9/16 MP Male 3/8 NPT Female 15k psi |
| 1   | BC 080       | Carry case                                  |
| 1   | BC 602       | Seal Kit for BC-K swivel                    |
