

6" BADGER

Rotary Cleaning for Large Pipes with Elbows

The 6" Badger features adjustable speed control which allows operators to meet the demands of the task at hand — slower speeds for tough deposits and plugs, faster rotation for easier jobs or polishing.

StoneAge offers a centering device for the 6" Badger. This device centers the tool inside the pipe, providing more consistent cleaning and reducing head wear. A rigid lance increases operator safety by preventing tool turn around in larger pipes.

COMPETITIVE ADVANTAGES

- Only rotary pipe cleaning tool on the market with adjustable speed control for fine-tuning to specific requirements
- Different jetting configurations allow for more or less pull and forward hitting power
- Easy to use and service
- Rotary tools remove the operator from the potential dangers of manually twisting high pressure hose and eliminate the need for expensive rotary hose devices (RHDs)
- Designed to easily pair with the AutoBox ABX-500 hose handling system for hands-free pipe cleaning

QUESTIONS TO ASK YOUR CUSTOMER

- What type of cleaning is required — hard scale, soft material flush or completely plugged?
- Are there any bends or vertical climbs in the pipe between access points?
- What size and length of hose are you using?
- What pressure and flow are you operating?
- Do you need an adapter?
- Do you need a backout preventer?
You should always use a backout preventer with high pressure pipe cleaning tools.
- Do you need a centralizer or stinger?

OTHER INFORMATION

- The 6" Badger can be paired with the AutoBox ABX-500 for a complete hands-free pipe cleaning solution.
- A stinger or centering device is required when the ID of the pipe is 1.5 times larger the diameter of the tool being used, as described in the WJTA Recommended Guide.

STEP 2 HOSE ADAPTER

A hose adapter may be required. See *Fittings and Adapters* for options depending on the inlet connection.

STEP 3 NOZZLES AND PLUGS

The 6" Badger can be jetted in different configurations depending on the application. The table below shows commonly used nozzle/plug configurations for the 6" Badger tool.

15° PORT	100° PORTS	135° PORTS
1 x Nozzle	2 x Nozzle	2 x Nozzle
1 x Plug	2 x Nozzle	2 x Nozzle

STEP 4 CENTRALIZER OPTIONS

A centralizer helps to protect the tool as it passes through the pipe and balances jet standoff distance for more consistent cleaning. In cases where pipe size is more than 1.5 times the diameter of the tool, a centralizer is an important safety device, preventing the tool from turning around and thrusting backwards out of the pipe.

Centralizer specifications vary for each 6" Badger tool model.

The following components are required:

1. Centralizer weldment assembly
2. Extension nipple
3. Coupler
4. Collar and Antivibe gland for BA-MP9 tool models
5. Hose adapter may be required for BA-M24 and BA-MP9 tool models
