

HCS-2L

Hose Containment System for AutoBox ABX-2L

OVERVIEW

The Hose Containment System, or HCS-2L, is a lightweight accessory for the Autobox ABX-2L, which contains and securely stores hoses typically used for heat exchanger tube cleaning.

The HCS is a simple system to setup and operate, and greatly increases job site safety by eliminating the potential for high pressure hoses to snag on structure, valves, or other objects. It also increases hose life by reducing wear and makes it easy to store and transport hoses between jobs.

FEATURES	BENEFITS
