UPDATING THE CONTROLLER FIRMWARE

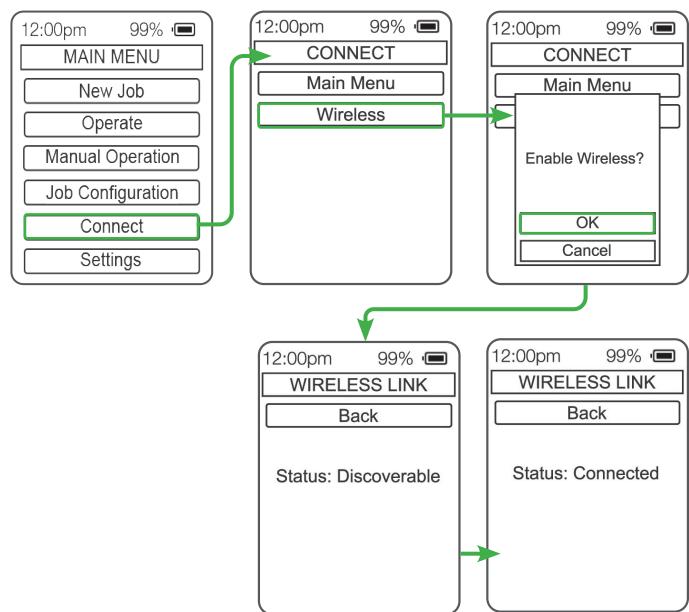

1. Ensure the **iPod touch®** is connected to the internet.
2. Sign in on the **iPod touch®**

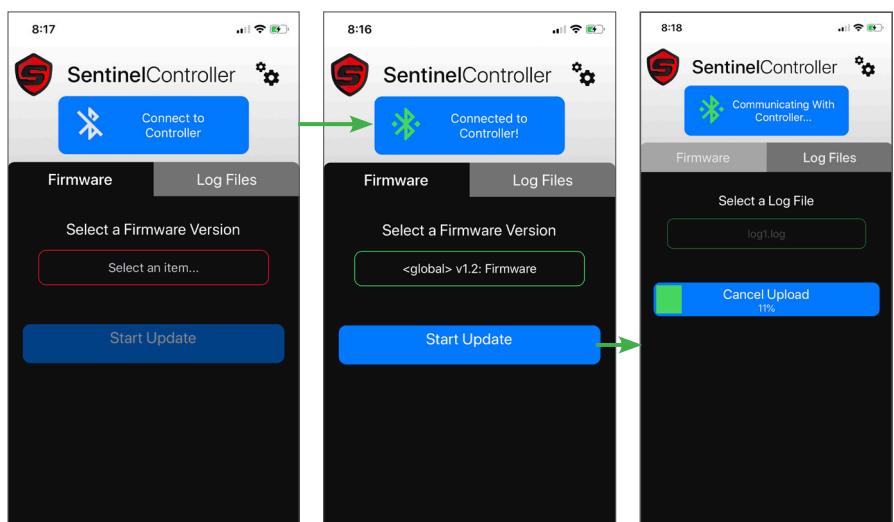

3. Turn on the Sentinel Controller
4. From the **Main Menu**, using the left joystick, scroll down and select **Connect**.
5. Select **Wireless** from the **Connect** menu.
6. Click **OK** on the **Enable Wireless?** pop-up.

If your Controller now says **Status: Discoverable**, the Controller is ready to connect to the iPod.

When the Controller says **Status: Connected**, it is connected to the Ipod.

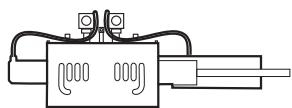

7. Click **Connect to Controller** button. The screen will say **Connecting** then **Connected**. The Bluetooth logo will turn green.
8. Select the **Firmware version** and **Start Update**.
9. When the update is complete, the Operator can return to the Controller.

TROUBLESHOOTING

Problem	Resolution Steps
'Communications' error message when the valve actuation lever is depressed	<ul style="list-style-type: none"> Verify all unused electrical connections on tractor and PH are capped such that they cannot get wet. If an electrical connector has gotten wet, blow the connection with compressed air and wipe with a clean dry rag to remove as much water as possible. Inspect electrical connectors to ensure they have not been damaged. Replace faulty sensor or cable. Note that if a replacement is not available, the component can be disconnected from the PH, and the operator can continue with a reduced functionality. For example, if a fault in the tractor subsystem results in loss of communication, the tractor can be disconnected from the PH and the operator will not be able to use AutoFeed, but will be able to continue to use AutoMove as long as the positioner sensors are still functional.
Cannot Maintain Air Pressure at Clamp Cylinders	<ul style="list-style-type: none"> Make sure the push to lock fitting at the tractor is fastened properly. The first click locks the hose into the fitting and the second click seals the connection.
Positioner moves the wrong distance when using AutoMove	<ul style="list-style-type: none"> Verify that the Mounting and Positioner/AutoMove settings match the type of tube face being cleaned. Go back to the setup menu and check the variables that affect the movement of the positioner; <ol style="list-style-type: none"> Pitch Pattern Rotated Pattern Rotated Tractor Rotated Positioner Number of Moves
Auto Stroke works intermittently or when it should not	<ul style="list-style-type: none"> Check the Lance Postion sensor that is used for AutoStoke. With the system completely de-energized, open the belt-side door of the tractor, the Lance Position sensor is located to the left of the belt. Check that the rollers and sensor are clear of debris and can rotate freely. Check that the magnet is connected to the roller.
Guide tubes are not always aligned with tubes after movement. This could occurs when using long guide tubes.	<ul style="list-style-type: none"> Make sure the umbilicals (system connections) and flex lances (HP hoses) are "free floating" when indexing. Make sure nothing is pulling sideways on the tractor. If using a Hose Containment device, make sure that the snout is not pulling on the tractor
Distance between tube face and guides is increasing	<ul style="list-style-type: none"> Make sure the Quick Release Clamp on the Vertical Carriage is securely tensioned to Guide Tube Assembly. When mounting the Guide Tube Assembly make sure to lift the backside of the Tractor a little bit, this will make sure the Guide Tube Assembly is completely parallel with the Vertical Carriage. Since most of the weight is behind the Vertical Carriage the Tractor and Guide Tube Assembly can be hanging in the Vertical Carriage but not completely secured. Always make sure before operating, to pull down on the Tractor with both hands and try to pull it back from the Lightweight Positioner and tilt the back of the Tractor upwards to make sure there is no play.
Difficulties getting the air hoses out of the push to connect fittings	<ul style="list-style-type: none"> To be sure all hoses are securely fastened to the push to lock fittings feel for two clicks. The first click locks the hose into the fitting and the second click seals the connection.
Difficulties in connecting the electrical connectors.	<ul style="list-style-type: none"> Using just a little bit of grease on the INSIDE of the ring will prevent corrosion and it will make the turning of the ring smooth and easy. Make sure there is a "click" when installing to ensure they are fully tightened and waterproof.

DESCRIPTION OF EQUIPMENT AND INTENDED USE

The new AUTOBOX® ABXS-3L Hose Tractor design keeps all the same field proven features and adds integrated sensing technology.

The ABXS-3L Hose Tractor is designed to automatically feed lances and optimize cleaning with integrated, user-adjustable, speed controls. It also tracks lance position in the tube and detects and clears blockages. The Hose Tractor utilizes a heavy-duty synchronous belt with a durable polyurethane cover to control the rate at which the hoses and Banshee tools are advanced or retracted inside the tubes.

This Hose Tractor was developed for "Hands Free" heat exchanger tube cleaning applications. It is recommended it be used with the StoneAge® Banshee line of self-rotary waterblast tools.

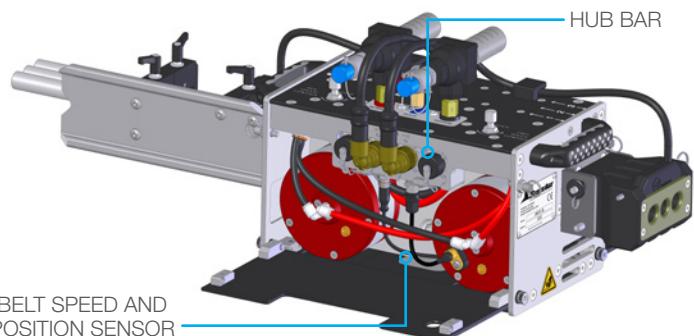

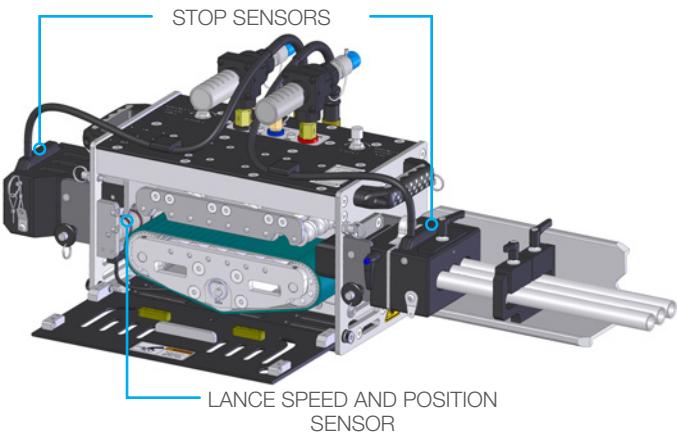

The ABXS-3L Hose Tractor was designed to accommodate up to three simultaneous flex lances ranging in size from 3/2 to 8/4 matched with the appropriate BN9.5, BN13, BN15, or BN18 size Banshee.

The guide assembly provides anti-withdrawal protection, and precise tube pitch adjustment.

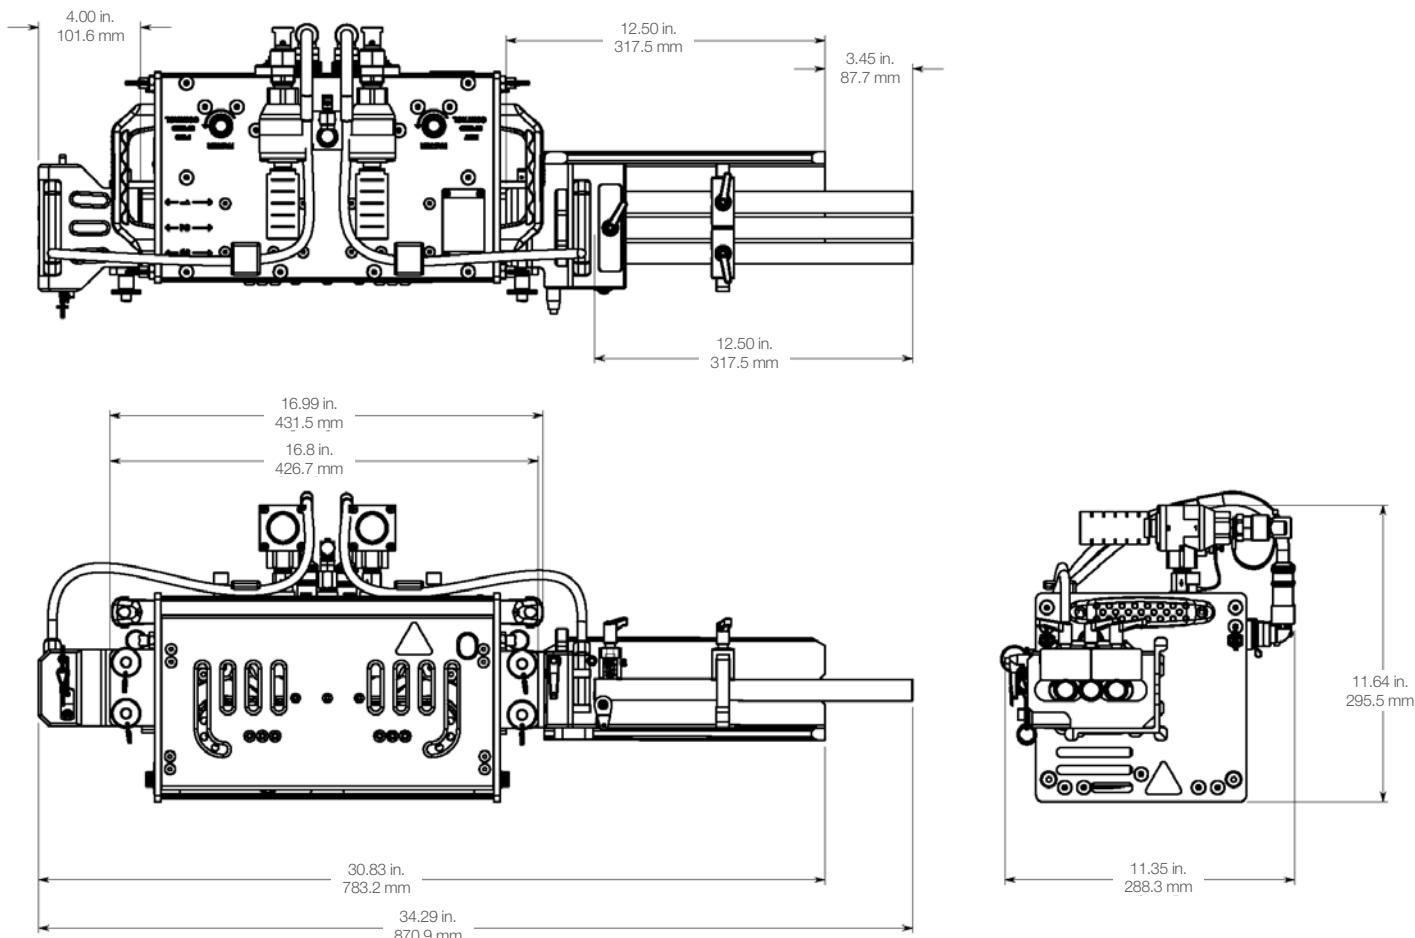

NEW FEATURES:

HOSE TRACTOR (ABXS-3L) WITH HOSE GUIDE (ABXS 160)

- Stop Sensors
 - Proprietary design
 - Reliably senses footballs and all hose crimps
 - Wear indicating rings
 - Replaceable 17-4 SS wear plate and anti-withdrawal collets
 - Contactless design
 - Easily removable sensor unit for maintenance and replacement
- Hub Bar
 - Integrated into ABXS frame Durable bayonet style external connectors Sealed and factory pressurized
- Lance Speed and Position Sensor
 - Independent suspension allows each lance to be detected separately
 - Flat knurled rollers for traction and accuracy
 - Pneumatic idlers pressurized from clamp circuit
 - Contactless magnetic sensor
 - Easily removable sensor unit for maintenance and replacement
- Belt Speed and Position Sensor
 - Heavy-duty sealed sensor
 - Integrated into air motor for durability
 - Single mounting screw, easily replaced

HOSE TRACTOR (ABXS-3L)		Imperial	Metric
Weight:	Without rear block, guide, and pins	52.6 lbs	24 kg
	With rear block, stop sensor, pins, NO GUIDE	56.4 lbs	26 kg
	Complete; with 3 guide tubes, collet, and, stop sensors	68.2 lbs	31 kg
Dimensions:	Tractor (only)	11.35 x 11.64 x 16.99 in.	288.3 x 295.5 x 431.5 mm
	Tractor with Hose Guide and 12 in. guide tubes	11.35 x 11.64 x 34.29 in	288.3 x 295.5 x 870.9 mm
Feed Rate: <i>dependent upon application and hose size</i>		0.3 - 3.0 ft/sec	91 - 914 mm/sec
Push/Pull Force		15 -150 lbs (5-75 lbs per lance)	7-68 kg (2-23 kg per lance)
System Air Consumption		50 cfm at 100 psi	1416 lpm at 6,8 bar
Manway Access:		18 in.	457 mm
HOSE GUIDE ASSEMBLY (ABXS 160)			
Weight:	With guide tubes and stop sensor, NO COLLET	11 lbs	5 kg
	Without collet or guide tubes, WITH STOP SENSOR	8 lbs	3.6 kg
Dimensions:		5.39 x 4.8 x 12.5 in.	137 x 122 x 317.5 mm
Pitch Adjustment Range (Dual)		5/8 - 5.0 in.	16 - 127 mm
Pitch Adjustment Range (Triple)		5/8 - 2.5 in.	16 - 64 mm

EC DECLARATION OF CONFORMITY

Manufacturer:

StoneAge Incorporated
466 South Skylane Drive
Durango, CO 81303
USA

Authorized Representative:

StoneAge Netherlands BV
Reedijk 7Q
3274 KE Heinenoord
Netherlands
Bob Van Wordragen, Operations Manager StoneAge NL

Declare that:

AutoBox® Hose Tractor (ABXS-3L)
for high pressure water cleaning of system parts.

Is compliant with the following Directives and Standards:

EU- Machinery Directive (2006/42/EC)

EU- RoHS Directive (2011/65/EU)

EU- EMC Directive (2014/30/EU)

EN ISO 12100:2010 (e) Safety of machinery – General principles for design – Risk assessment and risk reduction

EN ISO 4414:2010 (en) Pneumatic Fluid Power – General rules and safety requirements for systems and components

EN 55011:2009 Industrial, scientific and medical equipment - Radio-frequency disturbance characteristics - Limits and methods of measurement

EN 60204-1:2018 Safety of machinery– Electrical equipment of machines

This device complies with part 15 of the FCC rules and Industry Canada ICES-003. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The Technical File for AutoBox® Hose Tractor (ABXS-3L) is maintained at:

StoneAge Incorporated, 466 South Skylane Drive, Durango, CO 81303, USA and was compiled by the Engineering Manager.

The Technical File is available through the Authorized Representative.

This Declaration of Conformity is issued under the exclusive responsibility of StoneAge Incorporated.

WARNING AND SAFETY INSTRUCTIONS

OPERATOR TRAINING

Managers, Supervisors, and Operators MUST be trained in Health and Safety Awareness of High-pressure Water Jetting and hold a copy the Water Jetting Association (WJA) Code of Practice, or equivalent (see www.waterjetting.org.uk).

Operators MUST be trained to identify and understand all applicable standards for the equipment supplied. Operators should be trained in manual handling techniques to prevent bodily injury.

StoneAge has designed and manufactured this equipment considering all hazards associated with its operation. StoneAge assessed these risks and incorporated safety features in the design. StoneAge **WILL NOT** accept responsibility for the results of misuse.

IT IS THE RESPONSIBILITY OF THE INSTALLER/OPERATOR to conduct a job specific risk assessment prior to use. Job specific risk assessment MUST be repeated for each different set up, material, and location.

The risk assessment MUST conform to the Health and Safety at Work Act 1974 and other relevant Health and Safety legislation.

PERSONAL PROTECTIVE EQUIPMENT REQUIREMENTS

Use of Personal Protective Equipment (PPE) is dependent on the working pressure of water and the cleaning application. Managers, Supervisors, and Operators MUST carry out a job specific risk assessment to define the exact requirements for PPE. See Protective Equipment for Personnel (Section 6) of WJTA-IMCA's Recommended Practices For The Use Of High-pressure Waterjetting Equipment for additional information.

Hygiene - Operators are advised to wash thoroughly after all waterjetting operations to remove any waterblast residue which may contain traces of harmful substances.

First aid provision - users MUST be provided with suitable first aid facilities at the operation site.

SAFETY LABEL DEFINITIONS

The AUTOBOX® (ABXS-3L) Hose Tractor has the potential to cause serious injury if fingers, hair, or clothing become caught between the hose rollers or drive belts. Be sure to head the Hand Entanglement Roller Labels.

DO NOT OPERATE WITH THE DOORS OPEN. ENSURE THAT ALL FOUR DOOR PINS ARE SECURED PRIOR TO OPERATION.

Operators MUST read, understand, and follow the Operational and Training Requirements (Section 7.0) of WJTA-IMCA's Recommended Practices For The Use Of High-pressure Water jetting Equipment, or equivalent.

Operators MUST read, understand, and follow the Warnings, Safety Information, Assembly, Installation, Connection, Operation, Transport, Handling, Storage, and Maintenance Instructions detailed in this manual.

The risk assessment MUST consider potential material or substance hazards including:

- Aerosols
- Biological and microbiological (viral or bacterial) agents
- Combustible materials
- Dusts
- Explosion
- Fibers
- Flammable substances
- Fluids
- Fumes
- Gases
- Mists
- Oxidizing Agents

PPE may include:

- **Eye protection:** Full face visor
- **Foot protection:** Kevlar® brand or steel toe capped, waterproof, non-slip safety boots
- **Hand protection:** Waterproof gloves
- **Ear protection:** Ear protection for a minimum of 85 dBA
- **Head protection:** Hard hat that accepts a full face visor and ear protection
- **Body protection:** Multi-layer waterproof clothing approved for waterjetting
- **Hose protection:** Hose shroud
- **Respiratory protection:** May be required; refer to job specific risk assessment

Maximum operating air pressure is 100 psi (6,8 bar). Never exceed 125 psi (8,6 bar) supply pressure. Exceeding 125 psi (8,6 bar) supply pressure may result in injury to the Operator and/or damage to the equipment.

WARNING AND SAFETY INSTRUCTIONS

⚠️ WARNING

Operations with this equipment can be potentially hazardous. Caution MUST be exercised prior to and during machine and water jet tool use. Please read and follow all of these instructions, in addition to the guidelines in the WJTA Recommended Practices handbook, available online at www.wjta.org. Deviating from safety instructions and recommended practices can lead to severe injury and/or death.

- Do not exceed the maximum operating pressure specified for any component in a system.
- The immediate work area MUST be marked off to keep out untrained persons.
- Inspect the equipment for visible signs of deterioration, damage, and improper assembly. Do not operate if damaged, until repaired.
- Make sure all threaded connections are tight and free of leaks.
- Users of the AUTOBOX® (ABXS-3L) Hose Tractor MUST be trained and/or experienced in the use and application of high pressure technology and cleaning, as well as all associated safety measures, according to the WJTA Recommended Practices for the use of High pressure Water jetting Equipment.
- The Lightweight Positioner must be securely fastened to the tube bundle, and the Guide Assembly and Tractor must be securely fastened to the Lightweight Positioner prior to operation.
- An anti-withdrawal device (back-out preventer) MUST be used at all times. The back-out prevention device is the Hose Stop Collet located within the Hose Guide Assembly. StoneAge offers several different size Hose Stop Collets. The Collet Size Reference guide is located on the Hose Guide Assembly.
- The Controller should be located in a safe location where the Operator has good visibility of the tool entering the exchanger tubes. The AUTOBOX® (ABXS-3L) Hose Tractor and Controller MUST be supervised at all times and should never be left unattended.
- Do not fully release the hose clamp (decreasing pressure to zero) during operation, or the AUTOBOX® (ABXS-3L) Hose Tractor will release the hose and may create a dangerous runaway hose condition, which can result in severe injury and/or death.
- Always de-energize the system before opening the door to service or replace any parts. Failure to do so can result in severe injury and/or death.
- When moving the AUTOBOX® (ABXS-3L) Hose Tractor lift with care to prevent bodily injury.
- Do not operate the AUTOBOX® (ABXS-3L) Hose Tractor while either side door is open.

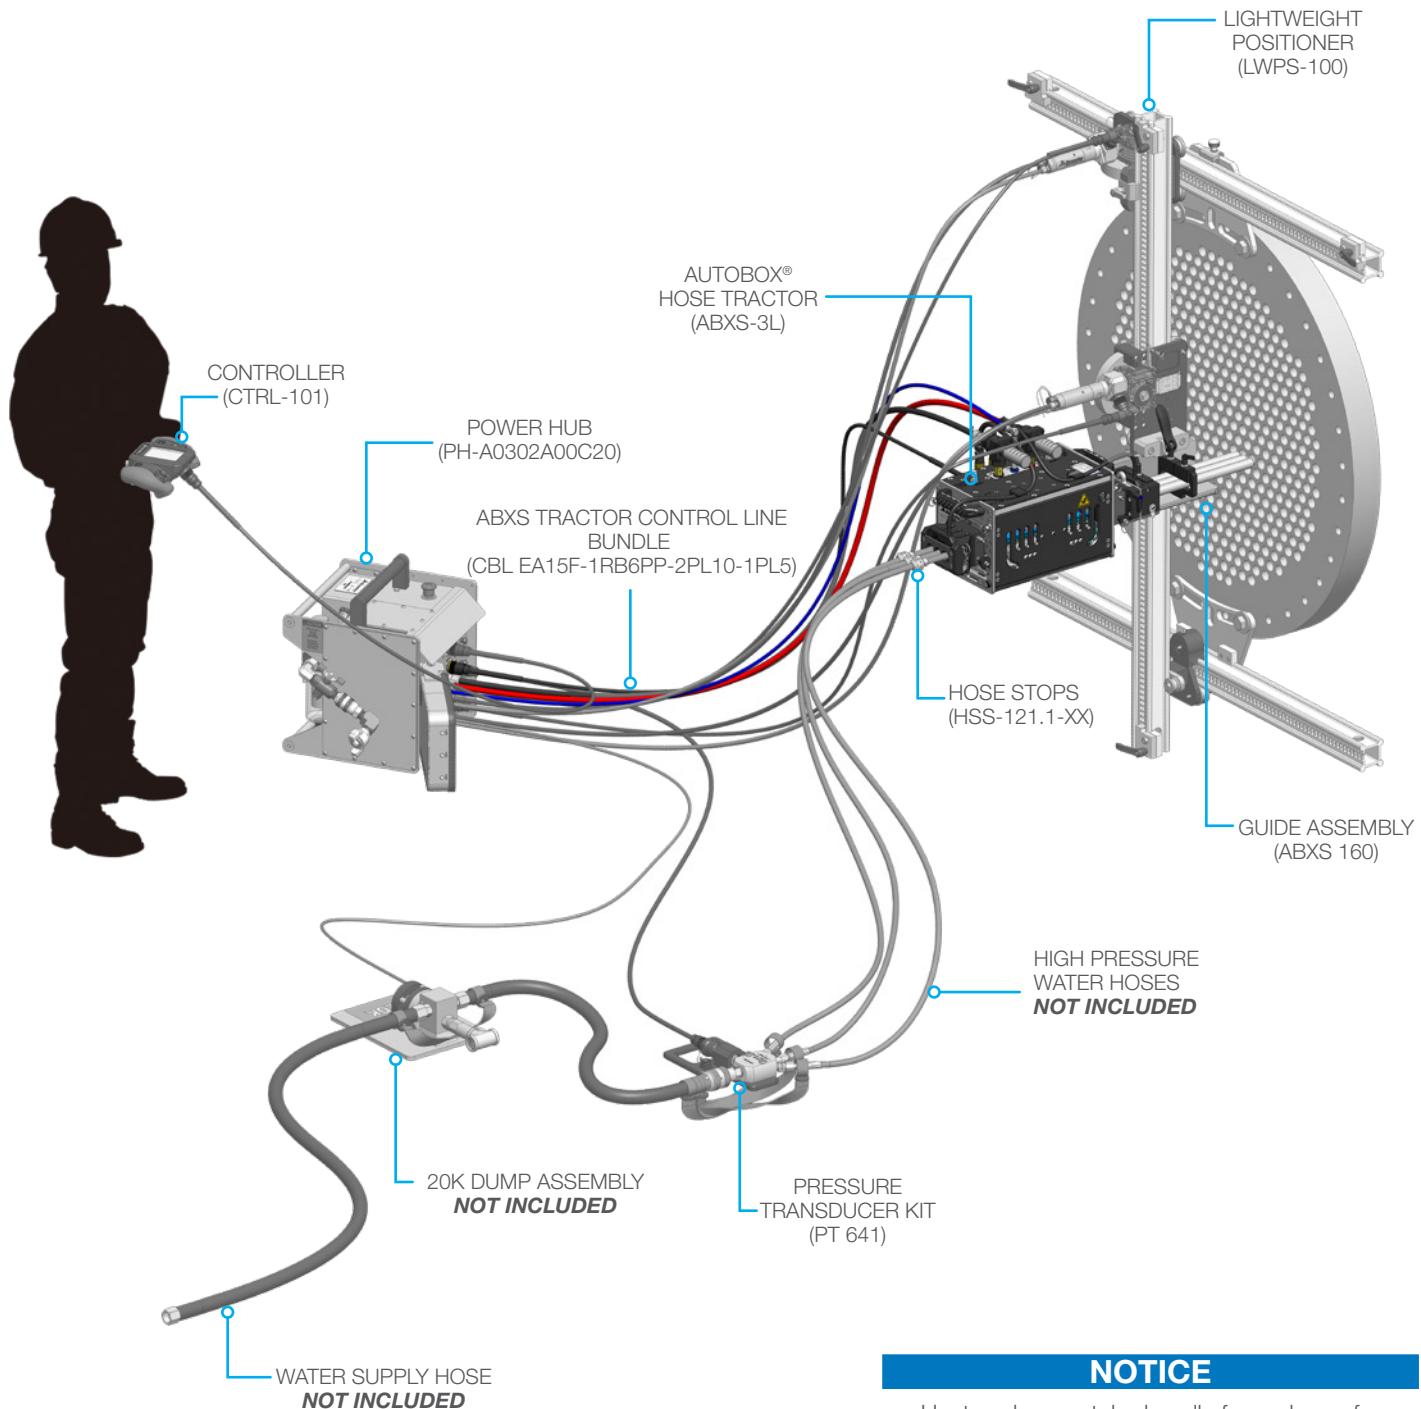

PRE-RUN SAFETY CHECK

Refer to WJTA-IMCA's, Recommended Practices For The Use Of High pressure Waterjetting Equipment and/or The Water Jetting Association's, WJA Code of Practice for additional safety information.

- Complete a job specific risk assessment and act on the resulting actions.
 - Adhere to all site specific safety procedures.
 - Ensure the waterblasting zone is properly barricaded and that warning signs are posted.
 - Ensure the work place is free of unnecessary objects (e.g. loose parts, hoses, tools).
 - Ensure all Operators are using the correct Personal Protective Equipment (PPE).
 - Check that the air hoses are properly connected and tight.
 - Check all hoses, lances, and accessories for damage prior to use. Do not use damaged items. Only high quality hoses intended for waterblast applications should be used as high pressure hoses.
 - Check all high pressure threaded connections for tightness.
- ***Ensure that an anti-withdrawal device (back-out preventer), whip checks (hose whips), and the appropriate hose stop collet are installed and set up properly. They must be verified, secured, tested, and performance confirmed before operating at high pressure.*****
- Ensure the doors of the AUTOBOX® (ABXS-3L) Hose Tractor are closed and securely latched.
 - Test the Controller before operating the AUTOBOX® (ABXS-3L) Hose Tractor with high pressure water to verify the control valves move the hose in the intended direction, and that the high pressure dump valve and hose clamp are working properly.
 - Ensure that Operators never connect, disconnect, or tighten hoses, adapters, or accessories with the high pressure water pump unit running.
 - Ensure no personnel are in the hydroblasting zone.

	5/6H, 8/4		.594 in. / 15.1 mm	ABX 171-594	.56-.61 / 14-16 mm	HSS 121-56-61
		2440D-05	.625 in. / 15.9 mm	ABX 171-625	.56-.61 / 14-16 mm	HSS 121-56-61

StoneAge (SA) PART NUMBER GUIDE TUBE REFERENCE CHART

GUIDE TUBE	BANSHEE	INSIDE DIAMETER, LENGTH
ABX 115-12	BN9.5	.459 in / 11.7 mm, 12.5 in. / 318 mm
ABX 115-36	BN9.5	.459 in / 11.7 mm, 36 in. / 914 mm
ABX 116-12	BN13	.546 in / 13.9 mm, 12.5 in. / 318 mm
ABX 116-36	BN13	.546 in / 13.9 mm, 36 in. / 914 mm
ABX 117-12	BN15	.674 in / 17.1 mm, 12.5 in. / 318 mm
ABX 117-36	BN15	.674 in / 17.1 mm, 36 in. / 914 mm
ABX 119-12	BN18	.745 in / 18.9 mm, 12.5 in. / 318 mm
ABX 119-36	BN18	.745 in / 18.9 mm, 36 in. / 914 mm

HOSE GUIDE ASSEMBLY

- Select the appropriate Guide Tube size and length for the application from the chart at the bottom of the previous page.
 - The length of the Guide Tubes for an exchanger bundle with no channel head is 12.5 in. (318 mm).
 - A deeper channel head will require extended Guide Tubes. The depth of the channel head added to the 12.5 in. (318 mm) length will give the desired tube length.
 - Longer guide tubes are available if required for use with channel heads.

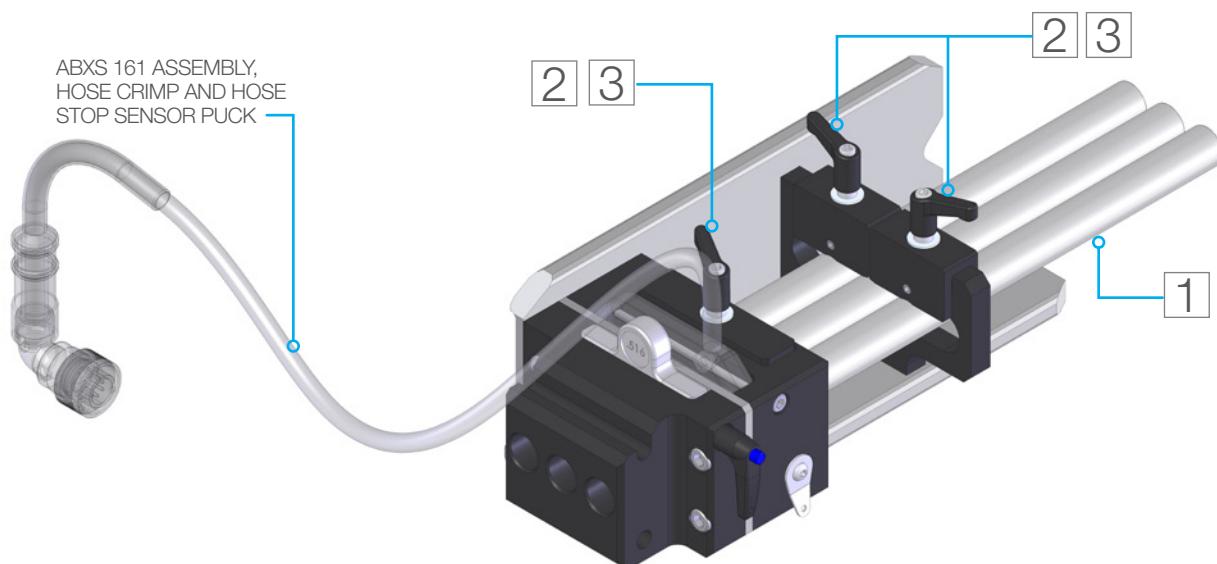

NOTICE

The Banshee tool should not have excessive clearance if the correct length Guide Tube size is used.

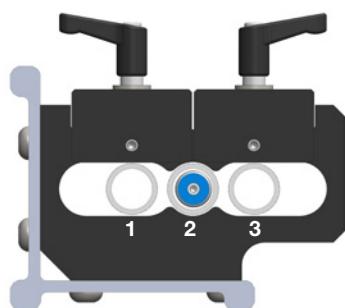

- To remove the existing Guide Tubes, loosen the Tube Clamp Lever and the two Pitch Adjust Levers, located on top of the Guide Assembly. After selecting the appropriate Guide Tubes, install the Guide Tubes into the Guide Assembly.
- Secure the Guide Tubes by tightening the Tube Clamp Lever and Pitch Adjust Levers, when the desired pitch has been set.
- Select the appropriate Collet and Hose Stops from the chart on the previous page and reserve them for future Hose and Collet installation instructions in this manual.

WARNING

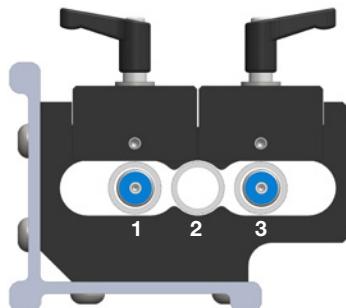

Appropriate size Collet selection is **CRITICAL** to ensuring proper backout prevention of the tool. Use the chart on the previous page to select the proper Collet and Hose Stop sizes per hose diameter. Always confirm backout prevention performance before operating the system at high pressure.

**1, 2, or 3 HOSE LOADING POSITIONS**

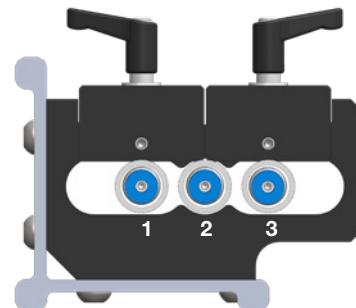

The AUTOBOX® (ABXS-3L) Hose Tractor can be used as a 1, 2, or 3 Lance tool. The diagrams below show which Guide Tubes to load for best performance. The numbered positions correspond with the indicator markings on the top of the Hose Tractor and the identifiers in the Controller interface.

SINGLE HOSE LOAD

DUAL HOSE LOAD

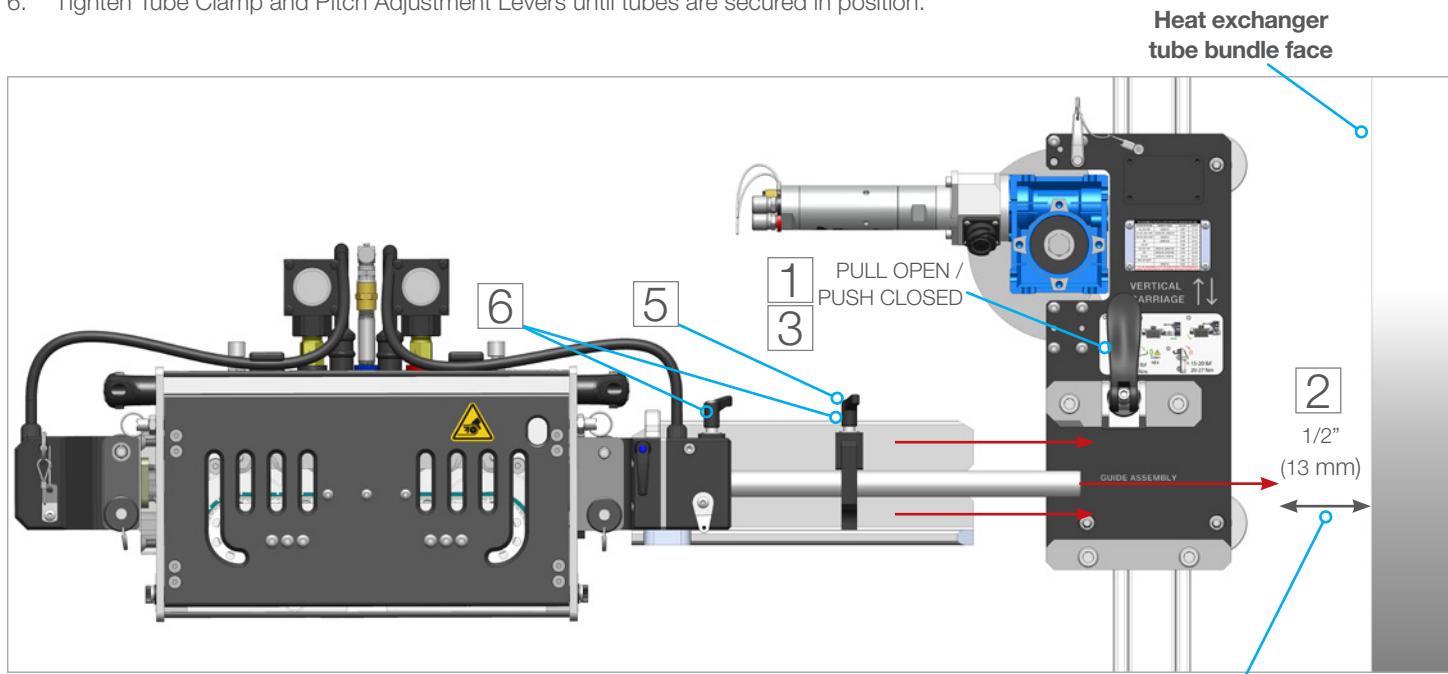

TRIPLE HOSE LOAD

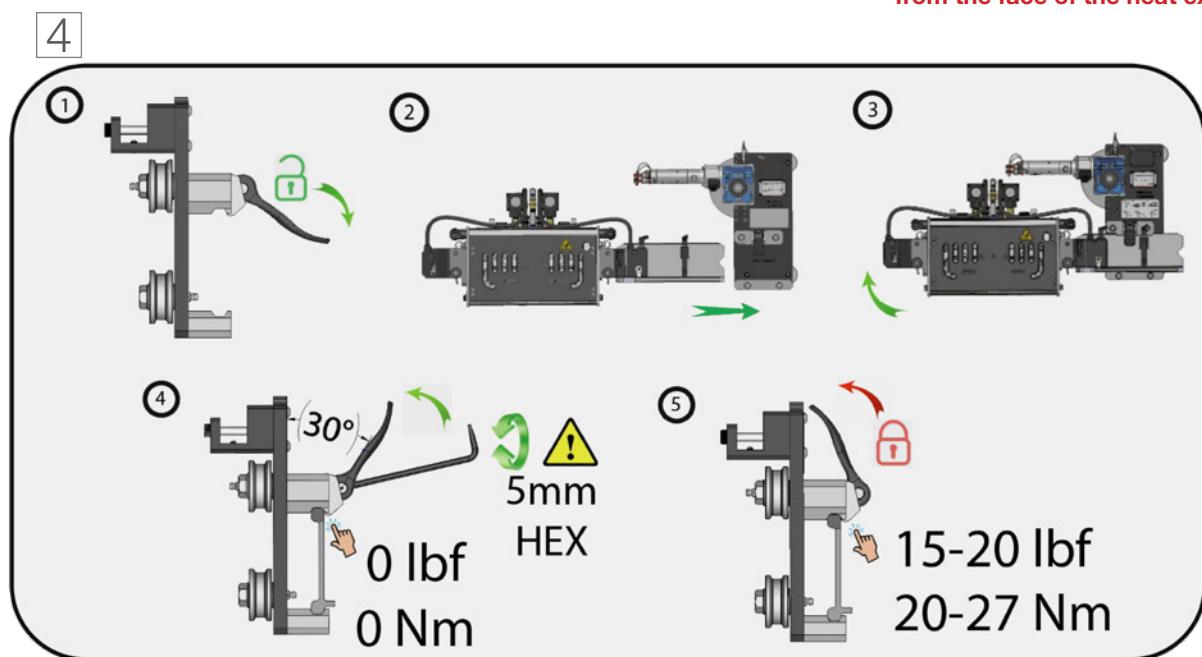

HOSE GUIDE ASSEMBLY TO LIGHTWEIGHT POSITIONER SET UP

ATTACH GUIDE ASSEMBLY TO LIGHTWEIGHT POSITIONER

1. Pull to open the Clamp Handle on the Vertical Carriage and slide the Tractor/Guide Tube Assembly into the Clamp Mount.
2. Leave 1/2" (13mm) between the end of the Guide Tube and the face of the exchanger.
3. Lock the Clamp Handle in place when the assembly is in position.
4. If the Clamp Handle feels too loose or too tight, it can be adjusted with a 5mm Allen Key. Follow the instructions on the decal on the Vertical Drive. (Also shown below)
5. Loosen the Pitch Adjustment Levers and adjust the guide tubes until they are in line with pitch of the tubes in the bundle.
6. Tighten Tube Clamp and Pitch Adjustment Levers until tubes are secured in position.

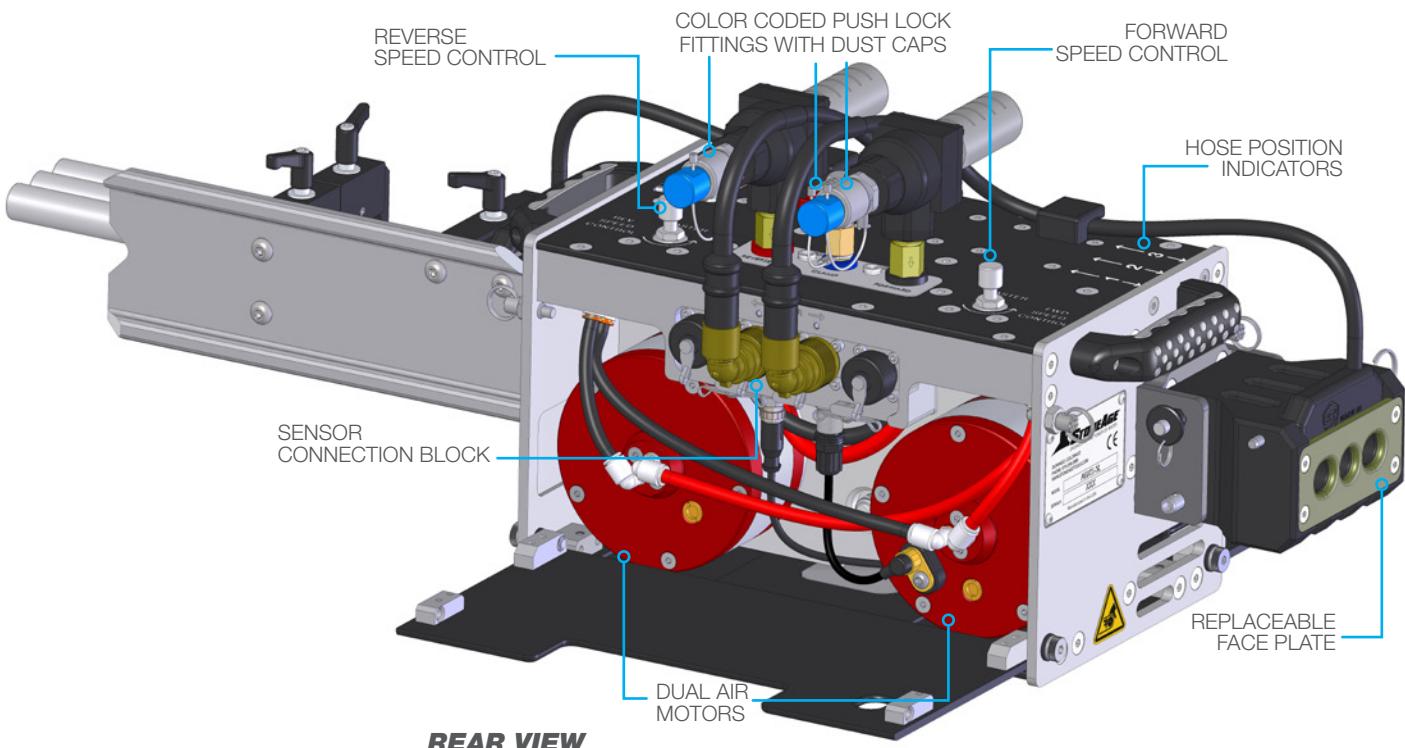

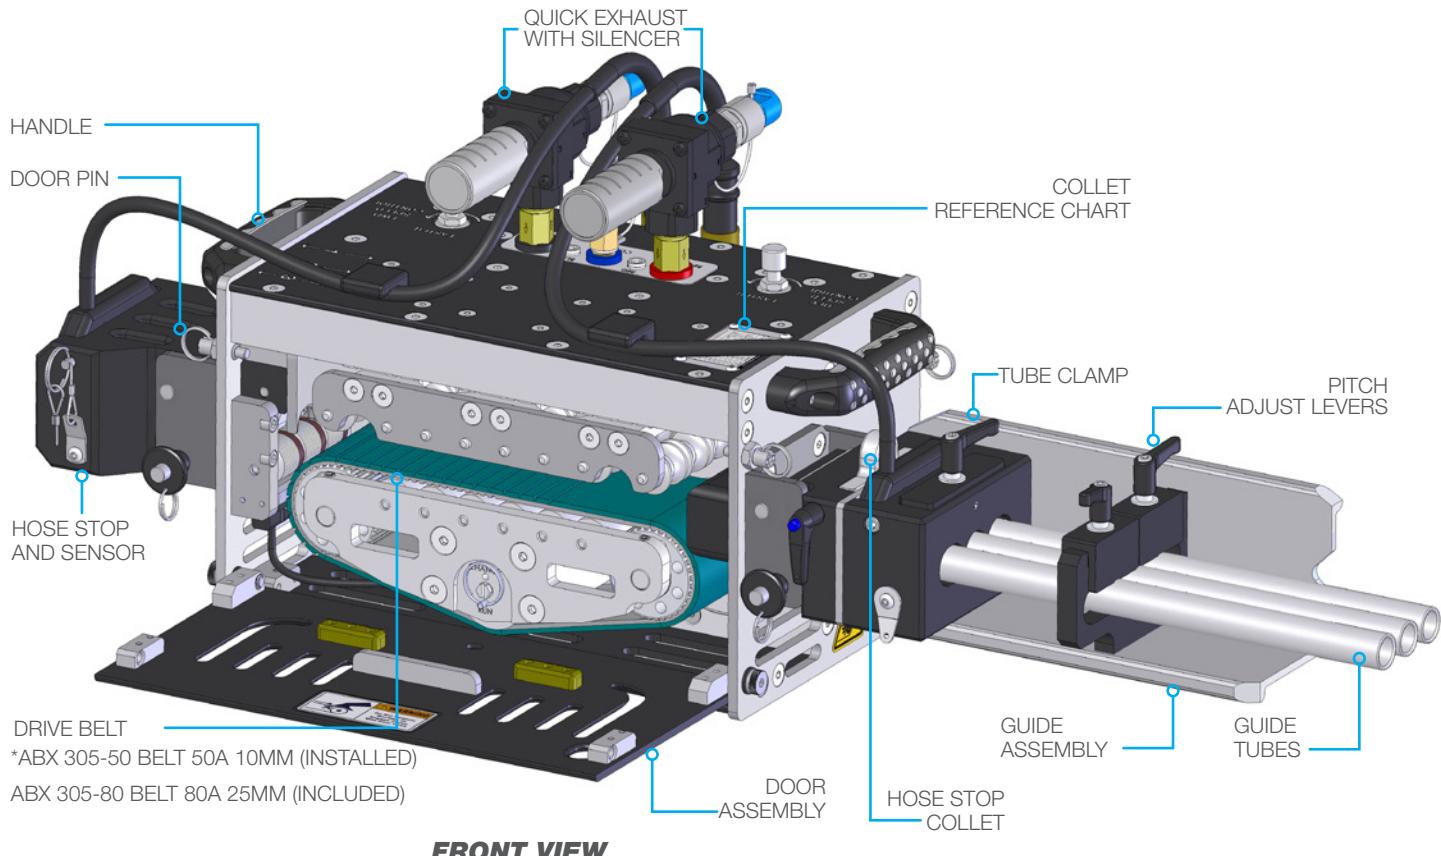

Adjust position until the Guide Tube is approximately 1/2 in. (13 mm) away from the face of the heat exchanger.

HOSE TRACTOR (ABXS-3L) - OVERVIEW

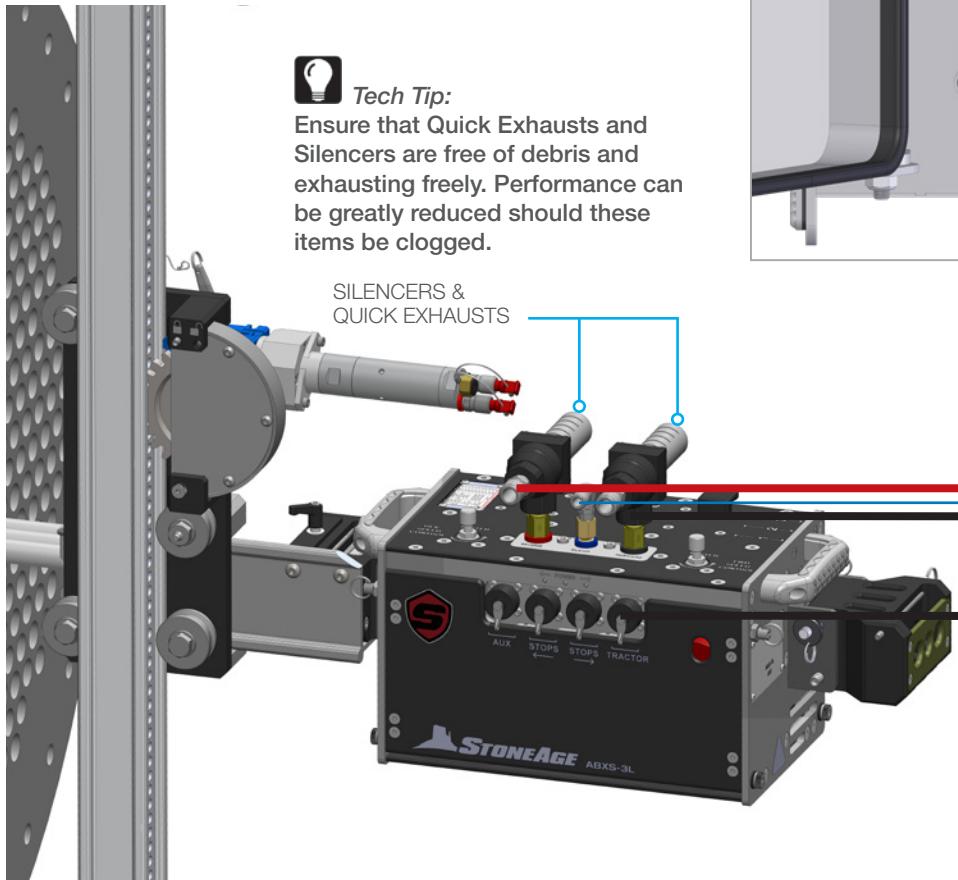

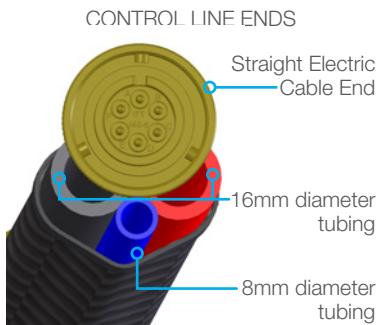

AUTOBOX® HOSE TRACTOR (ABXS-3L)

HOSE TRACTOR CONNECTIONS TO POWER HUB

PNEUMATIC SUPPLY LINE CONNECTIONS

1. Remove the dust caps from the fittings on the AUTOBOX® (ABXS-3L) Hose Tractor.
2. **Connect the Hose Bundle to the Power Hub**
Match the colored tubing to the corresponding color coded fittings under the "Tractor" label. Connect the Pot Plug to the receptacle marked "Tractor" and listen for a click. This ensures it is water tight.
3. **Blow out all Pneumatic Lines**
Turn the Main Air Supply on. Use the Controller to activate the Forward, Reverse, and Clamp functions. ***Use of dirty or contaminated pneumatic hoses will cause component damage and malfunction***

4. Connect hoses to the Hose Tractor

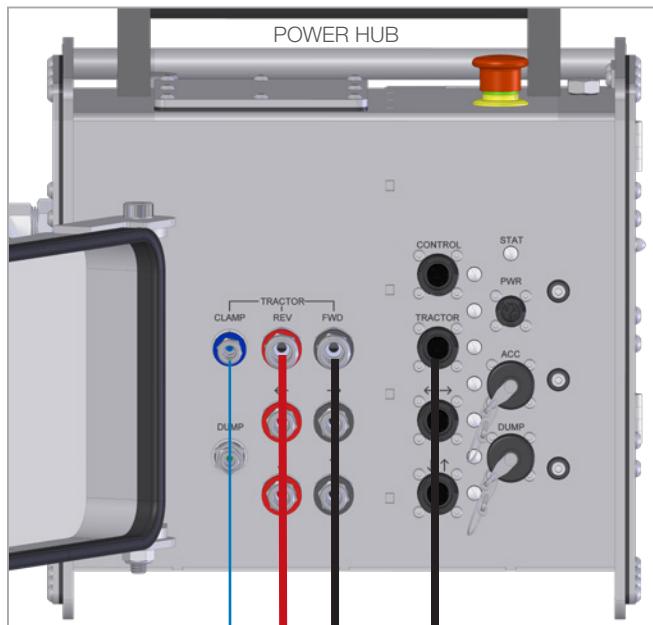

Match the colored tubing to the corresponding color coded fittings on top of the Hose Tractor. Connect the potted plug to the receptacle marked "Tractor" on the back of the Hose Tractor and listen for a click. This ensures it is water tight.

4. Connect hoses to the Hose Tractor
5. Test the Controller before operating the system with high pressure water to verify the control valves move the hoses and positioners in their intended directions, and that the dump valve is working properly.

NOTICE

For Detailed Instructions and Setup of the Controller and Power Hub Assemblies, see the Controller and Power User Manual.

<https://www.stoneagetools.com/assets/pdf/manuals/>

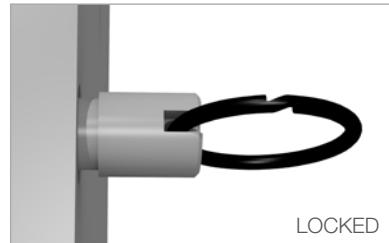

DOOR

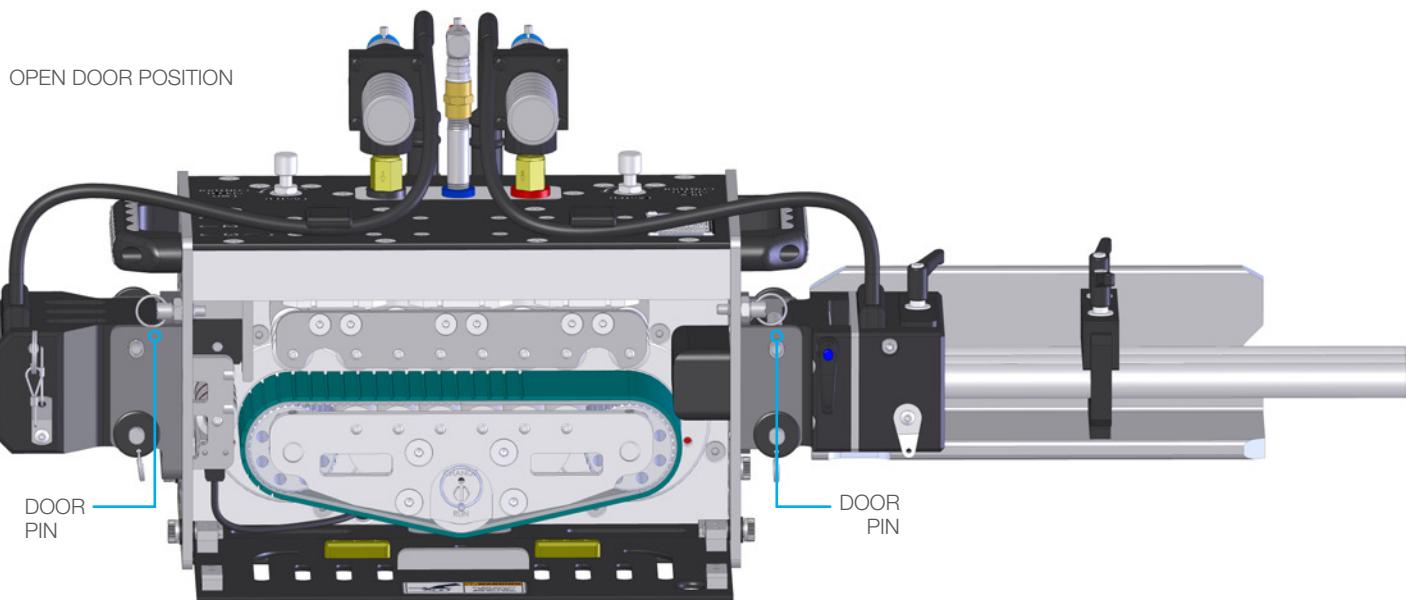

Always run the AUTOBOX® (ABXS-3L) Hose Tractor with the doors closed and locked.

DOOR PIN

The Door Pin is a spring plunger with a pull ring. To unlock the door, pull and twist the pull ring. To close and lock the door, pull and twist the pull ring, then release it into the groove of the pin. Verify the pin engages the door fully.

**CAUTION**

Make sure to lock both doors on each side of the Hose Tractor before operating AUTOBOX® (ABXS-3L) Hose Tractor.

HIGH PRESSURE HOSE LENGTH AND COLLET INSERTION

HIGH-PRESSURE HOSE

- The AUTOBOX® (ABXS-3L) Hose Tractor is designed to be used with Parker Pro-Lance® and/or Spir Star Blast-Pro® hose ends. Standard hose ends may not fit into Hose Tractor and/or Guide Tubes. **NOTE: MAXIMUM hose end diameter must NOT exceed .74 in. (19 mm)**
- Only high quality hoses intended for waterblast applications should be used as high-pressure hoses. Pressure rating of high-pressure hoses **MUST NEVER** be exceeded.

NOTICE

Do not use a shrouded hose or hose with a steel protective cover. This will cause severe damage to the Drive Belt and Idlers.

- Verify that the high-pressure hose is properly installed in the back-out preventer. Operate the high-pressure hose and waterjet tool at full pressure to test the clamp force. Proper clamp force will provide good control of the hose in forward and reverse directions, and keep the hoses synchronized at full retract and full extend positions.
- HOSE LENGTHS** There are many varieties of tube bundles that will require additional hose length to be considered. This should be verified prior to ordering high pressure hose for each job. The calculation below determines the additional length necessary to keep the assembly from lifting off the ground during operation. Provide the tube bundle length and use the calculation below to determine the total hose length.

A (Tube Bundle Length in inches / mm) +

B (Total Length of components in inches / mm) +

C (Recommended Additional Connection Length in / mm)

=

D (Total required Length of hose in inches /mm)

EXAMPLE: The hose length equation for a 20ft (6096 mm) tube bundle with ABXS-3L, Hose Guide, and Lightweight Positioner would be as follows;

STANDARD: (20ft x 12 in/ft) + 32.9 in + 39 in = **311.9 in.**

METRIC: 6096 mm + 836 mm + 991 mm = **7922 mm**

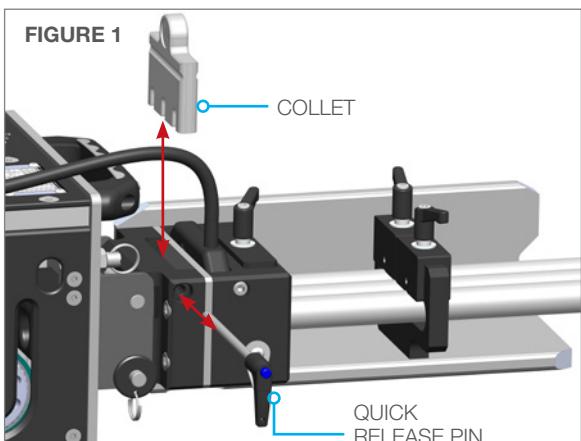

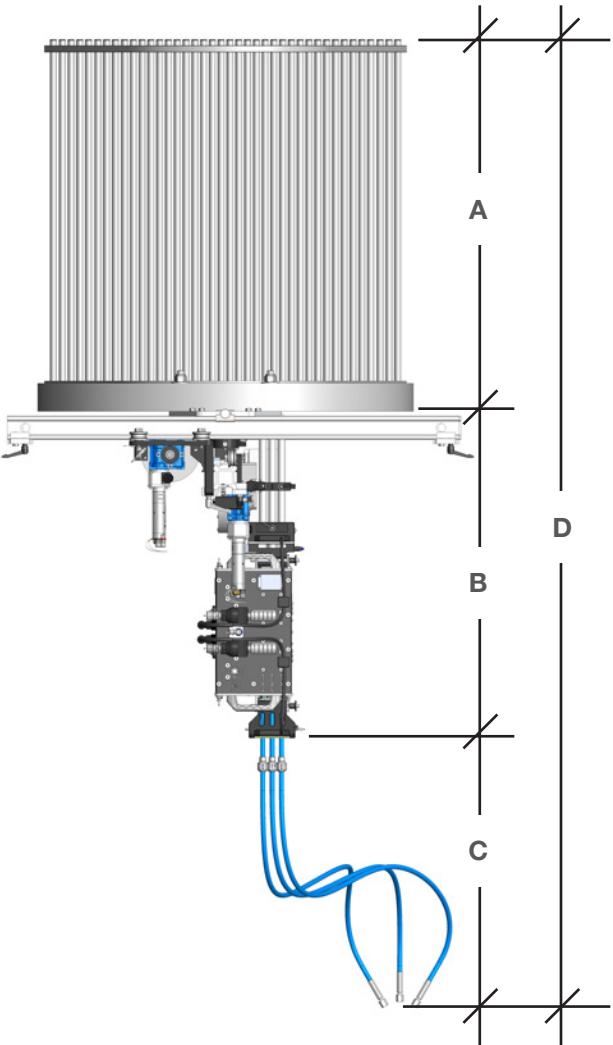

B (TOTAL COMPONENT LENGTH)	C (RECOMMENDED ADDITIONAL CONNECTION LENGTH)
ABX-3L-V2, Hose Guide, and Lightweight Positioner = 32.9 in / 836 mm	39 in / 991 mm

COLLET INSERTION

Remove Quick Release Pin and pull out existing Collet. Select the appropriate Collet size for the diameter of the hoses. (See the "Recommended Collets For Common Hose Sizes" plaque on the top plate of the AUTOBOX® (ABXS-3L) Hose Tractor.) (**Figure 1**)

⚠ WARNING

Appropriate size Collet selection is **CRITICAL** to ensuring proper anti-withdrawal prevention of the tool. See "Recommended Collets For Common Hose Sizes" plaque on the top plate of the ABXS-3L Tractor or the side of the vertical carriage on the Lightweight Positioner.

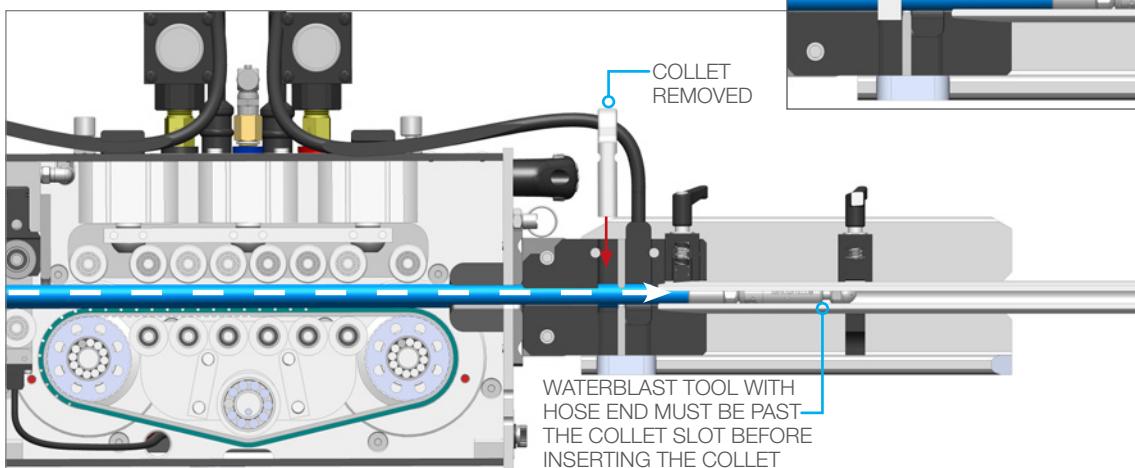

HOSE AND HOSE STOP INSTALLATION

HOSE AND HOSE STOP INSTALLATION

- The **HOSE CLAMP PRESSURE REGULATOR** on the Controller MUST BE TURNED TO ZERO pressure to make room for the hoses to be installed. Use the left Joystick on the Controller to highlight the Clamp Pressure setting. Then move the left Joystick left or right to decrease or increase the pressure.

- Insert the hoses, equipped with the waterblast tools, into the mounting bracket on the side of the AUTOBOX® (ABXS-3L) Hose Tractor until the engage the Drive Belt. Slightly increase the pressure on the **HOSE CLAMP PRESSURE REGULATOR** to extend the clamp rollers and clamp the hoses.
- When the waterjet tools pass the Collet slot, install the Collet and quick release pin.

- Pull on the hoses from the back of the AUTOBOX® (ABXS-3L) Hose Tractor to ensure that the Collet does not allow the waterblast tool back out of the Guide or Hose Tractor.
- To install hose stops, drive waterblast tools through the exchanger until the tips are 1-2" (25-51 mm) past the end of the tube bundle. Loosely install the stop with the arrows pointing to the tractor, then push them toward the mounting bracket and tighten in place.

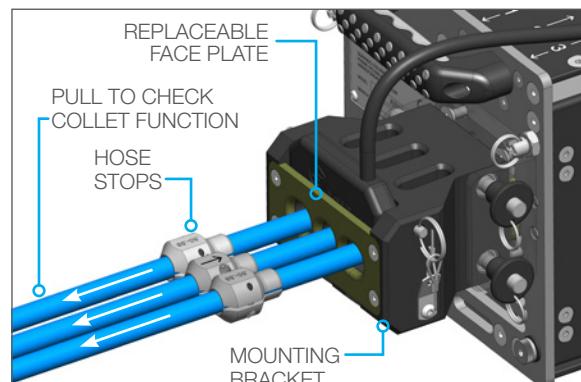

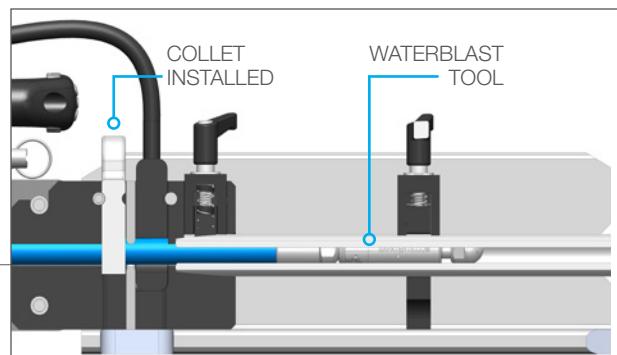

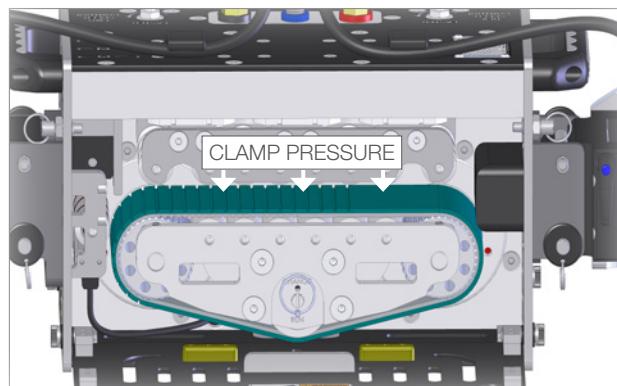

NOTICE

If the Wear Indicator Grooves on the Replaceable Face Plate are gone, continued long-term operation will significantly reduce the life of the rear stop sensor.

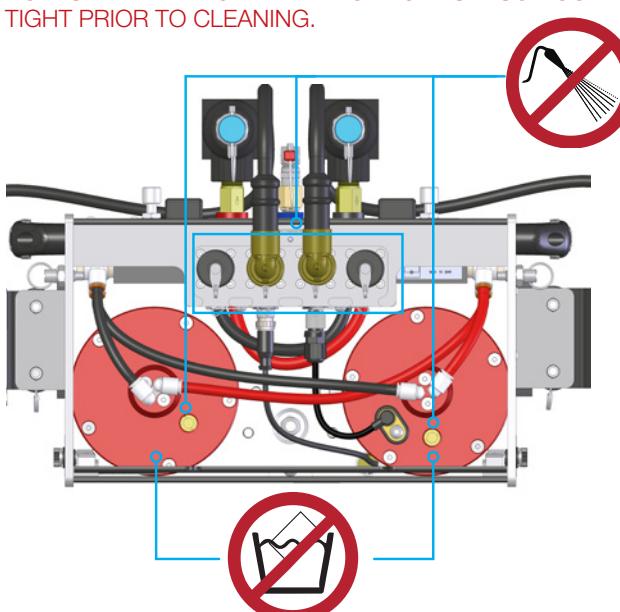

WARNING

Do not fully release the hose clamp (decreasing pressure to zero) during operation, or the AUTOBOX® (ABXS-3L) Hose Tractor will release the hose and may create a dangerous runaway hose condition, which can result in severe injury and/or death.

Crush Hazard. Keep hands, hair, and clothing clear of all moving parts. Contact with moving parts can result in severe injury.

HOSE TRACTOR (ABXS-3L) MAINTENANCE

Maintenance Item	Frequency	Maintenance Required
Drive Belt (See Belt Replacement instructions in this manual)	After each use	<p>The Belts are very durable and should last several hundred hours. However, it is recommended to inspect the Belt for wear and/or cracks at the completion of each job. Replacement is required when the Belt is damaged. If the performance of the belt is not functioning well for the conditions, try replacing it with the alternate durometer belt (included).</p> <p style="text-align: center;">NOTICE</p> <p>Operation with a severely damaged belt will result in excessive damage to the Idler rollers and drive sprockets.</p>
All components the hoses pass through, particularly face and guide plates.	After each use	<p>Most wear parts are made from durable materials and should have a very long life. However, as wear occurs the rounded edges could become sharp and damage hoses. Any components showing excessive wear should be replaced.</p> <p>If the ABXS 183-001 face plate is not replaced in a timely manner, it will result in damage and/or premature failure of the rear stop sensor. See next page</p>
FWD, REV, LFT, RGT, UP, DOWN fittings	After each use	<p>Apply a small amount of air tool oil directly into FWD, REV, LFT, RGT, UP, DOWN fittings. Then, briefly operate the controls at slow speed for a short duration in each direction to coat the interior parts of the motor. Install the dust caps onto all fittings to keep moisture and dirt out.</p> <p style="text-align: center;">NOTICE</p> <p>Do not add oil to the Clamp (CLP) fitting, as oil may accumulate in the air cylinders and prevent them from fully retracting.</p>
ABXS-3L (Inside)	After each use	<p>When storing the unit, use compressed air to blow out any residual debris and moisture. Use mild, soapy, low pressure, water to clean the machine in order to remove corrosive materials.</p> <p style="color: red; font-weight: bold;">DO NOT SPRAY WATER DIRECTLY AT OR SUBMERGE THE AIR MOTOR BREather PORTS OR ELECTRONIC COMPONENTS. MAKE SURE ALL DUST CAPS ARE IN PLACE AND ELECTRICAL SENSOR CONNECTIONS ARE TIGHT PRIOR TO CLEANING.</p> 

Contact StoneAge for Safety Data Sheets for material usage, a complete list of spare part numbers, and service instructions for the AUTOBOX® (ABXS-3L) Hose Tractor and Controller.

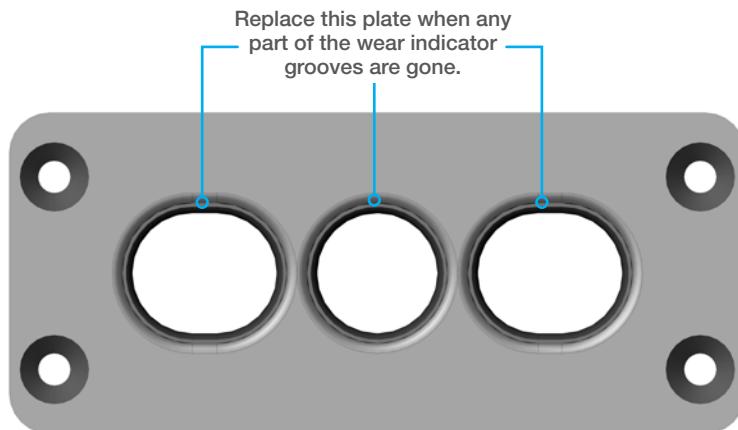

STORAGE, TRANSPORTATION, AND HANDLING

The AUTOBOX® (ABXS-3L) Hose Tractor should be stored upright in a job box between jobs. When moving the AUTOBOX® (ABXS-3L) Hose Tractor, lift with care to prevent bodily injury.

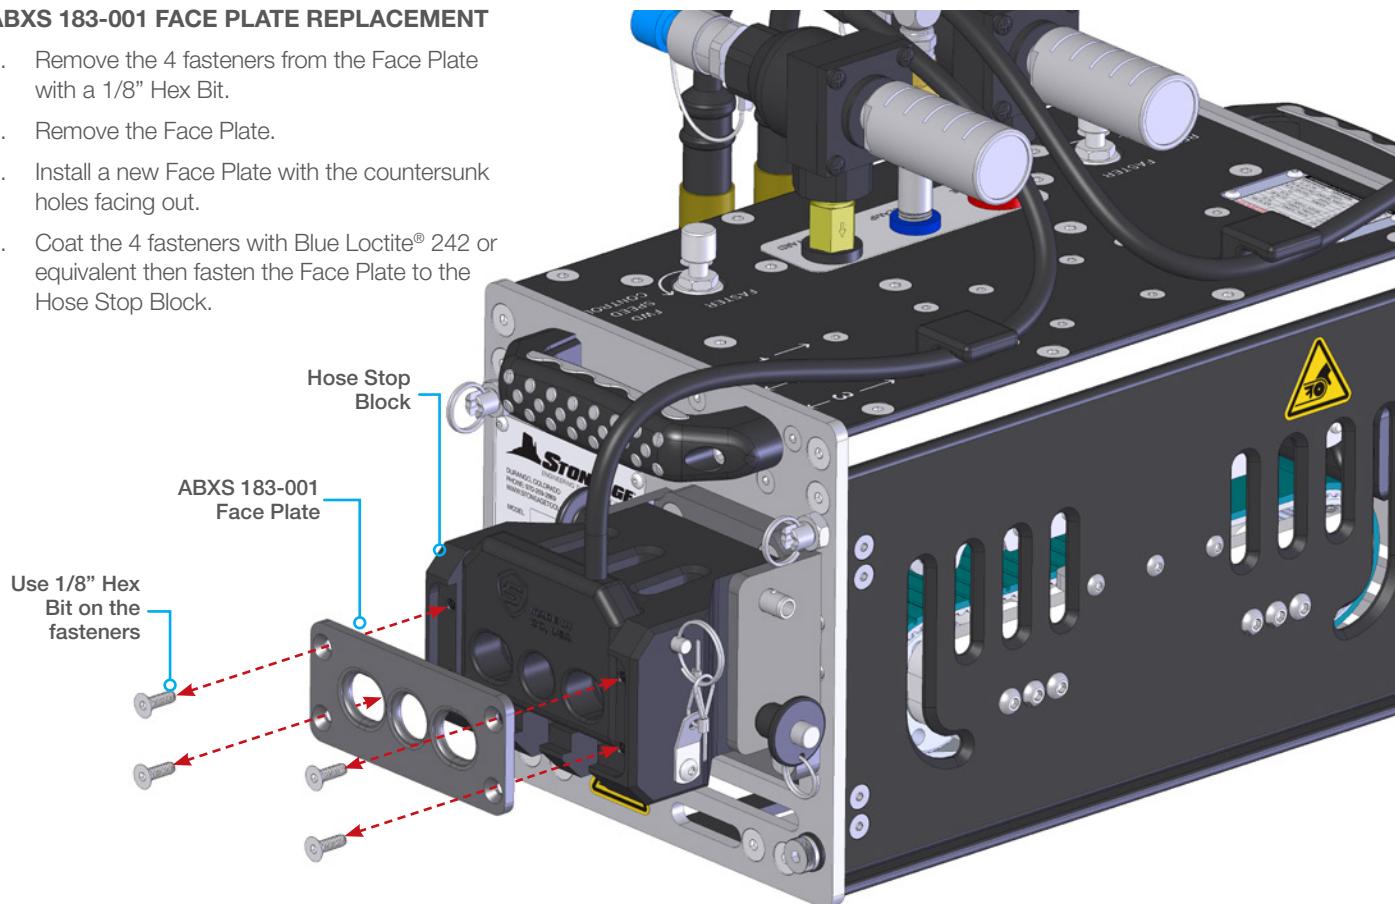

ABXS 183-001 FACE PLATE WEAR INDICATOR GROOVES

The Wear Indicator Grooves are there to inform operators that excessive wear is occurring.

Continued long-term operation will significantly reduce the life of the rear stop sensor.

**ABXS 183-001 FACE PLATE REPLACEMENT**

1. Remove the 4 fasteners from the Face Plate with a 1/8" Hex Bit.
2. Remove the Face Plate.
3. Install a new Face Plate with the countersunk holes facing out.
4. Coat the 4 fasteners with Blue Loctite® 242 or equivalent then fasten the Face Plate to the Hose Stop Block.

DRIVE BELT REPLACEMENT

⚠ WARNING

Always de-energize the system before servicing or replacing any parts. Failure to do so can result in severe injury and/or death. Keep hands, hair, and clothing clear of rotating parts.

TECH TIP: If the performance of the belt is not functioning well for the conditions, try replacing it with an alternate durometer belt.

BELTS INCLUDED:

ABX 305-50 Green

(50 durometer – softest – better grip , but fastest wear)

ABX 305-80 Black

(80 durometer – hardest – most durable, but most slip)

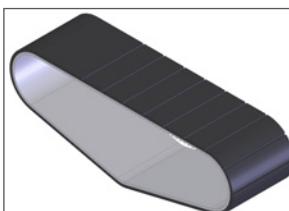

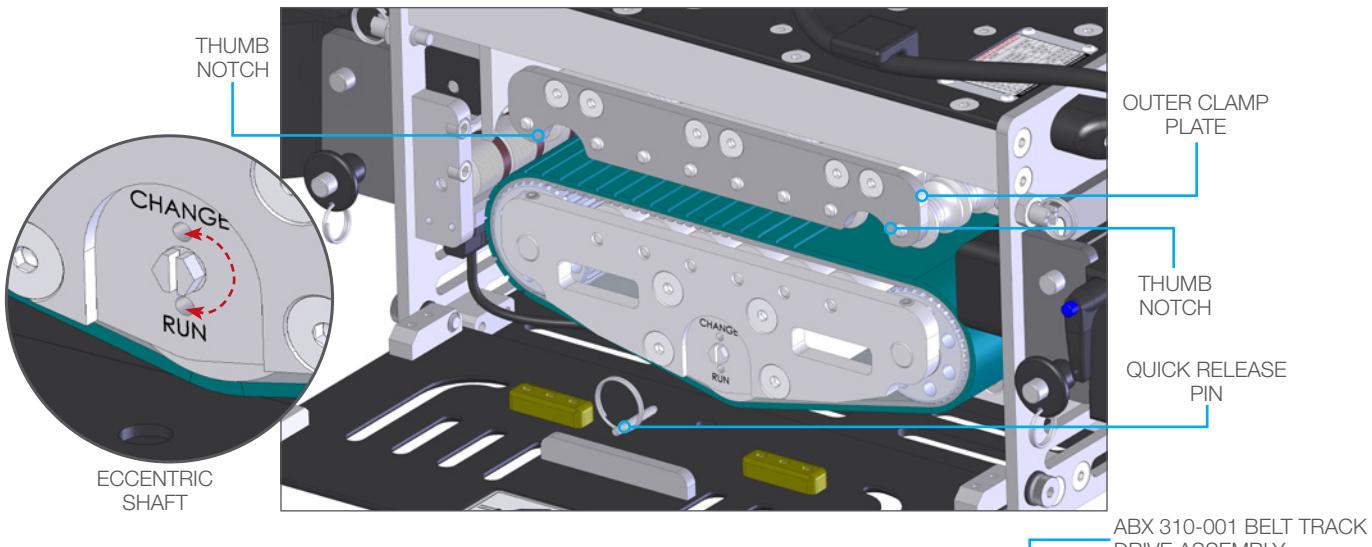

BELT OPTIONAL:

ABX 305-70 Green

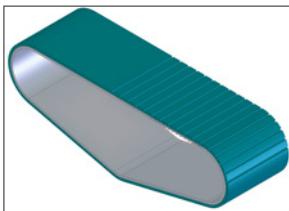

(70 durometer – medium)

TO REPLACE THE BELT:

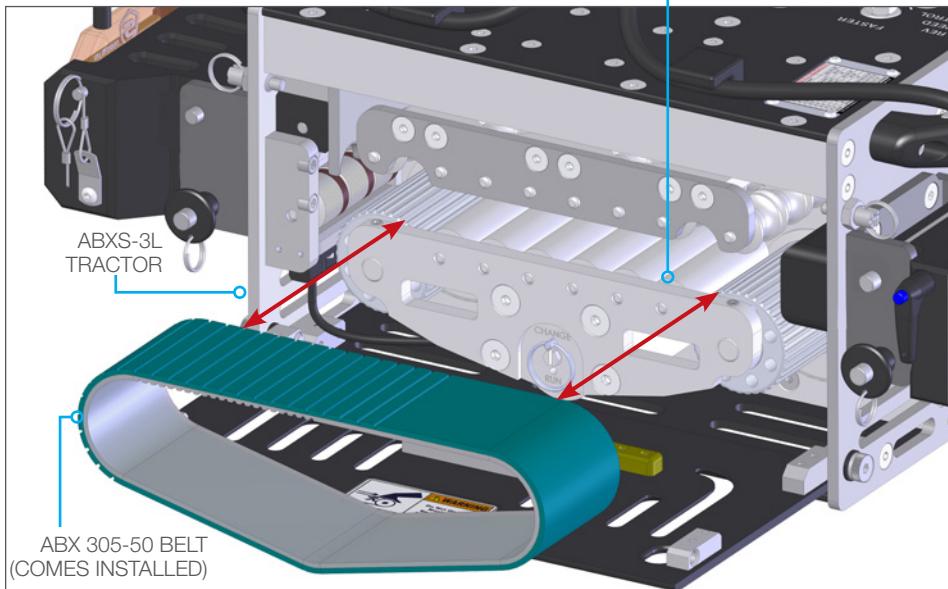

1. Pull out the Quick Release Pin on the front of the ABX 310-001 Belt Track Drive Assembly.
2. Use a flat head screwdriver to rotate the Eccentric Shaft 180° in either direction. This will release tension on the Drive Belt Assembly.
3. Install pin into the "CHANGE" position so it does not get misplaced, and to ensure the tension idler is in the correct position before removing the belt.
4. Place thumbs on the top of the belt into the notches of the Outer Clamp Plate. Place fingers under the Drive Belt and light squeeze in the shape of the tensioned Drive Belt. Then pull the Drive Belt out from the ABX-3L-V2 Tractor.
5. Slide the old Drive Belt off and discard. Slide the new Drive Belt on in a similar manner.
6. Rotate the Eccentric Shaft 180° in either direction to properly tension the Drive Belt.
7. Move the Quick Release Pin to the "RUN" position.

ABX 305-80 BELT 80A 25MM
(INCLUDED IN PACKAGE)

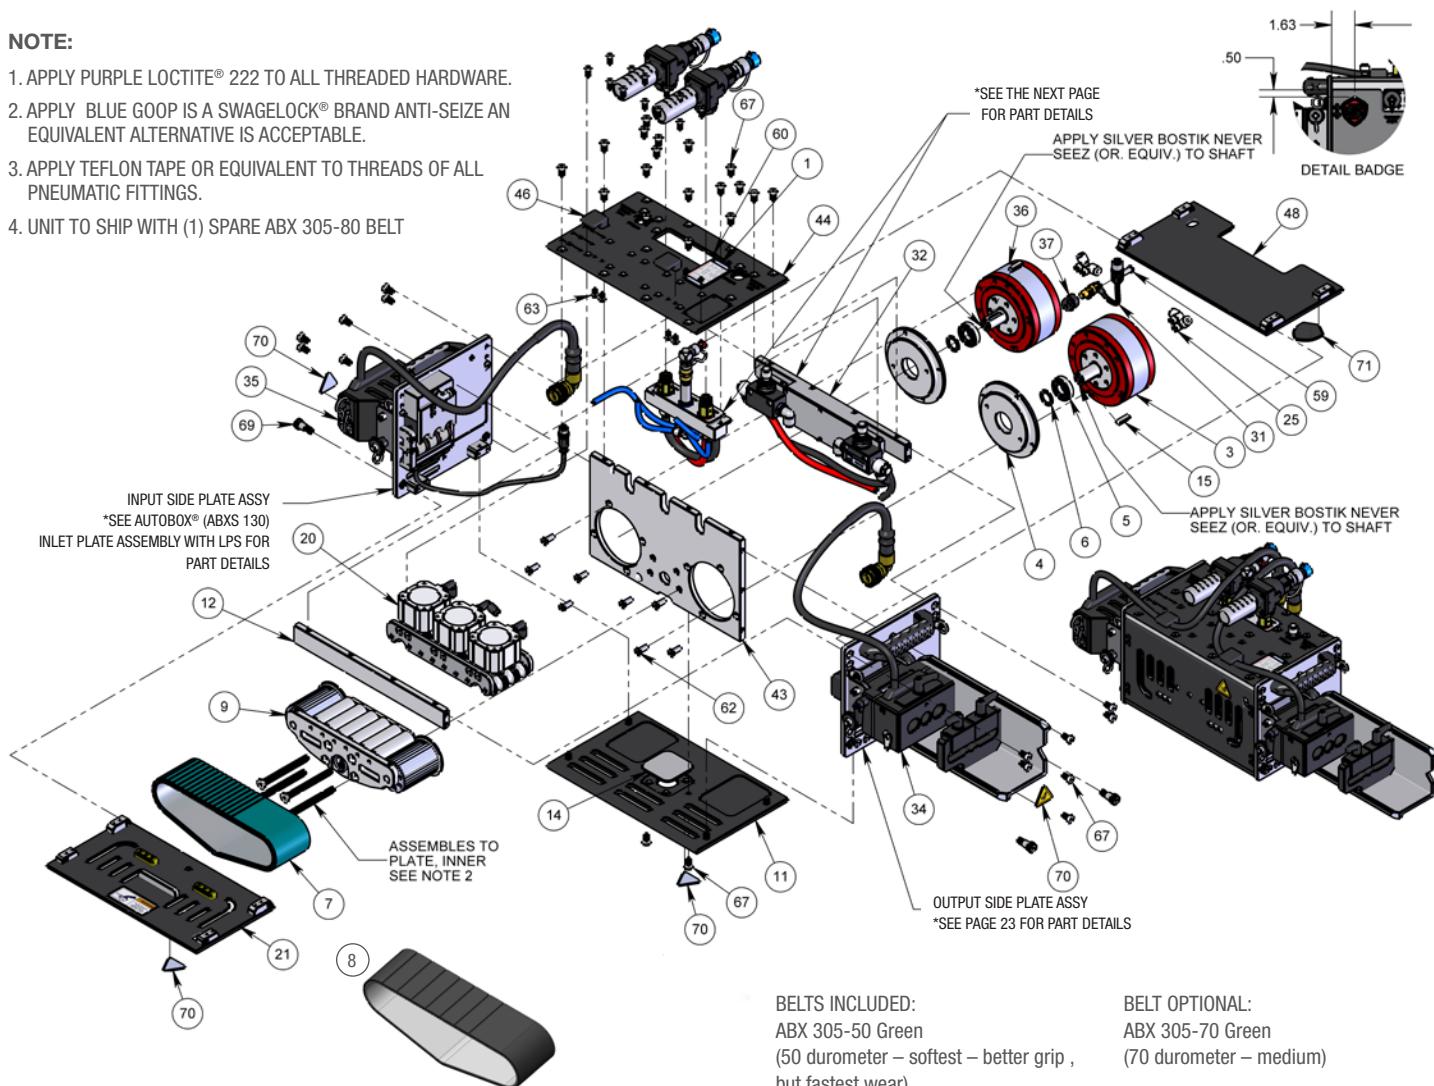

ABX 305-70 BELT 70A 10MM
(NOT INCLUDED IN PACKAGE)

AUTOBOT[®] (ABXS-3L) HOSE TRACTOR

NOTE:

1. APPLY PURPLE LOCTITE[®] 222 TO ALL THREADED HARDWARE.
2. APPLY BLUE GOOP IS A SWAGELOCK[®] BRAND ANTI-SEIZE AN EQUIVALENT ALTERNATIVE IS ACCEPTABLE.
3. APPLY TEFLON TAPE OR EQUIVALENT TO THREADS OF ALL PNEUMATIC FITTINGS.
4. UNIT TO SHIP WITH (1) SPARE ABX 305-80 BELT

BELTS INCLUDED:
ABX 305-50 Green
(50 durometer – softest – better grip ,
but fastest wear)
ABX 305-80 Black
(80 durometer – hardest – most durable,
but most slip)

BELT OPTIONAL:
ABX 305-70 Green
(70 durometer – medium)

TERMS AND CONDITIONS

1. Acceptance of Terms and Conditions. Receipt of these Terms and Conditions of Sale ("Terms and Conditions") shall operate as the acceptance by StoneAge, Inc. ("Seller") of the order submitted by the purchaser ("Buyer"). Such acceptance is made expressly conditional on assent by Buyer to these Terms and Conditions. Such assent shall be deemed to have been given unless written notice of objection to any of these Terms and Conditions (including inconsistencies between Buyer's purchase order and this acceptance) is given by Buyer to Seller promptly on receipt hereof.

Seller desires to provide Buyer with prompt and efficient service. However, to individually negotiate the terms of each sales contract would substantially impair Seller's ability to provide such service. Accordingly, the product(s) furnished by Seller are sold only according to the terms and conditions stated herein and with the terms and conditions stated in any effective StoneAge Dealer Agreement or StoneAge Reseller Agreement, if applicable. Notwithstanding any terms and conditions on Buyer's order, Seller's performance of any contract is expressly made conditional on Buyer's agreement to these Terms and Conditions unless otherwise specifically agreed to in writing by Seller. In the absence of such agreement, commencement of performance, shipment and/or delivery shall be for Buyer's convenience only and shall not be deemed or construed to be an acceptance of Buyer's terms and conditions.

2. Payment/Prices. Unless other arrangements have been made in writing between Seller and Buyer, payment for the product(s) shall be made upon receipt of invoice. The prices shown on the face hereof are those currently in effect. Prices invoiced shall be per pricelist in effect at the time of shipment. Prices are subject to increase for inclusion of any and all taxes which are applicable and which arise from the sale, delivery or use of the product(s), and the collection of which Seller is or may be responsible to provide to any governmental authority, unless acceptable exemption certificates are provided by Buyer in accordance with applicable law. Buyer shall pay all charges for transportation and delivery and all excise, order, occupation, use or similar taxes, duties, levies, charges or surcharges applicable to the product(s) being purchased, whether now in effect or hereafter imposed by any governmental authority, foreign or domestic.

3. Warranty. SELLER MAKES NO WARRANTIES OR REPRESENTATIONS AS TO THE PERFORMANCE OF ANY PRODUCT EXCEPT AS SET FORTH IN THE STONEAGE LIMITED WARRANTY PROVIDED WITH THE PRODUCT.

4. Delivery. Seller is not obligated to make delivery by a specified date, but will always use its best efforts to make delivery within the time requested. The proposed shipment date is an estimate. Seller will notify Buyer promptly of any material delay and will specify the revised delivery date as soon as practicable. UNDER NO CIRCUMSTANCES SHALL SELLER HAVE ANY LIABILITY WHATSOEVER FOR LOSS OF USE OR FOR ANY DIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM DELAY REGARDLESS OF THE REASON(S).

All product(s) will be shipped F.O.B. point of origin, unless specifically agreed otherwise, and Buyer shall pay all shipping costs and insurance costs from that point. Seller, in its sole discretion, will determine and arrange the means and manner of transportation of the product(s). Buyer shall bear all risk of loss commencing with the shipment or distribution of the product(s) from Seller's warehouse. Order shortages or errors must be reported within fifteen (15) business days from receipt of shipment to secure adjustment. No product(s) may be returned without securing written approval from Seller.

5. Modification. These Terms and Conditions are intended by Seller and Buyer to constitute a final, complete and exclusive expression of agreement relating to the subject matter hereof and cannot be supplemented or amended without Seller's prior written approval.

6. Omission. Seller's waiver of any breach or Seller's failure to enforce any of these Terms and Conditions at any time, shall not in any way affect, limit or waive Seller's right thereafter to enforce and compel strict compliance with every term and condition hereof.

7. Severability. If any provision of these Terms and Conditions is held to be invalid or unenforceable, such invalidity or unenforceability shall not affect the validity or enforceability of the other portions hereof.

8. Disputes. Seller and Buyer shall attempt in good faith to promptly resolve any dispute arising under these Terms and Conditions by negotiations between representatives who have authority to settle the controversy. If unsuccessful, Seller and Buyer shall further attempt in good faith to settle the dispute by nonbinding third-party mediation, with fees and expenses of such mediation apportioned equally to each side. Any dispute not so resolved by negotiation or mediation may then be submitted to a court of competent jurisdiction in accordance with the terms hereof. These procedures are the exclusive procedures for the resolution of all such disputes between the Seller and Buyer.

9. Governing Law. All sales, agreements for sale, offers to sell, proposals, acknowledgments and contracts of sale, including, but not limited to, purchase orders accepted by Seller, shall be considered a contract under the laws of the State of Colorado and the rights and duties of all persons, and the construction and effect of all provisions hereof shall be governed by and construed according to the laws of such state.

10. Jurisdiction and Venue. Seller and Buyer agree that the state or federal courts located within the City and County of Denver, Colorado shall have sole and exclusive jurisdiction over any litigation concerning any dispute arising under these Terms and Conditions not otherwise resolved pursuant to Section 9 as well as any alleged defects of any Products or damages sustained as a result of such alleged defects. Seller and Buyer further agree that should any litigation be commenced in connection with such a dispute, it shall only be commenced in such courts. Seller and Buyer agree to the exclusive jurisdiction of such courts and neither will raise any objection to the jurisdiction and venue of such courts, including as a result of inconvenience.

11. Attorney's Fees. If any litigation is commenced between Seller and Buyer, or their personal representatives, concerning any provision hereof, the party prevailing in the litigation shall be entitled, in addition to such other relief that is granted, to a reasonable sum as and for their attorneys' fees and costs in such litigation or mediation.

STONEAGE TERMS AND WARRANTY

View StoneAge's Terms and Warranty Conditions online.

<http://www.stoneagetoools.com/terms>

<http://www.stoneagetoools.com/warranty>

WARRANTY INFORMATION

Warranties set forth herein extend only to End-Users, meaning customers acquiring, or that have previously acquired, a product manufactured by StoneAge ("Product") for their own use and not for resale, either directly from StoneAge Inc. ("StoneAge") or from a StoneAge Authorized Dealer or Reseller ("Dealer"). No warranty of any kind or nature is made by StoneAge beyond those expressly stated herein.

1. LIMITED WARRANTY PERIOD. Subject to the limitations and conditions hereinafter set forth, StoneAge warrants its Product to be free from defects in workmanship and material for a period of one (1) year from the date of purchase by the End-User, provided that the end of the limited warranty period shall not be later than eighteen (18) months from the date of shipment of the Product to the Dealer or the End-User by StoneAge ("Limited Warranty Period"). All replacement parts which are furnished under this Limited Warranty and properly installed shall be warranted to the same extent as the original Product under this Limited Warranty if, and only if, the original parts were found to be defective within the original Limited Warranty Period covering the original Product. Replacement parts are warranted for the remainder of the original Limited Warranty Period. This Limited Warranty does not cover any component part of any Product not manufactured by StoneAge. Any such component part is subject exclusively to the component manufacturer's warranty terms and conditions.

2. LIMITED WARRANTY COVERAGE. StoneAge's sole obligation under this Limited Warranty shall be, at StoneAge's option and upon StoneAge's inspection, to repair, replace or issue a credit for any Product which is determined by StoneAge to be defective in material or workmanship. StoneAge reserves the right to examine the alleged defective Product to determine whether this Limited Warranty is applicable, and final determination of limited warranty coverage lies solely with StoneAge. No statement or recommendation made by a StoneAge representative, Dealer or agent to End-User shall constitute a warranty by StoneAge or a waiver or modification to any of the provisions hereof or create any liability for StoneAge.

3. WARRANTY SERVICE PROVIDERS. Service and repair of the Product is to be performed only by StoneAge authorized service representatives, including Dealers who are authorized repair centers, with StoneAge approved parts. Information about StoneAge authorized service representatives can be obtained through the StoneAge website at www.stoneagetools.com/service. Unauthorized service, repair or modification of the Product or use of parts not approved by StoneAge will void this Limited Warranty. StoneAge reserves the right to change or improve the material and design of the Product at any time without notice to End-User, and StoneAge is not obligated to make the same improvements during warranty service to any Product previously manufactured.

4. WARRANTY EXCLUSIONS. This Limited Warranty does not cover, and StoneAge shall not be responsible for the following, or damage caused by the following: (1) any Product that has been altered or modified in any way not approved by StoneAge in advance in writing; (2) any Product that has been operated under more severe conditions or beyond the rated capacity specified for that Product; (3) depreciation or damage caused by normal wear and tear, failure to follow operation or installation instructions, misuse, negligence or lack of proper protection during storage; (4) exposure to fire, moisture, water intrusion, electrical stress, insects, explosions, extraordinary weather and/or environmental conditions including, but not limited to lightning, natural disasters, storms, windstorms, hail, earthquakes, acts of God or any other force majeure event; (5) damage to any Product caused by any attempt to repair, replace, or service the Product by persons other than StoneAge authorized service representatives; (6) costs of normal maintenance parts and services; (7) damage sustained during unloading, shipment or transit of the Product; or (8) failure to perform the recommended periodic maintenance procedures listed in the Operator's Manual accompanying the Product.

5. REQUIRED WARRANTY PROCEDURES. To be eligible for warranty service, the End-User must: (1) report the Product defect to the entity where the Product was purchased (i.e. StoneAge or the Dealer) within the Limited Warranty Period specified in this Limited Warranty; (2) submit the original invoice to establish ownership and date of purchase; and (3) make the Product available to a StoneAge authorized service representative for inspection to

determine eligibility for coverage under this Limited Warranty. This Limited Warranty shall not extend to any person or entity who fails to provide proof of original purchase from StoneAge or a Dealer. No Product may be returned for credit or adjustment without prior written permission from StoneAge.

6. DISCLAIMER OF IMPLIED WARRANTIES AND OTHER REMEDIES. EXCEPT AS EXPRESSLY STATED HEREIN (AND TO THE FULLEST EXTENT ALLOWED UNDER APPLICABLE LAW), STONEAGE HEREBY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ANY AND ALL WARRANTIES, REPRESENTATIONS OR PROMISES AS TO THE QUALITY, PERFORMANCE OR FREEDOM FROM DEFECT OF THE PRODUCT COVERED BY THIS LIMITED WARRANTY. STONEAGE FURTHER DISCLAIMS ALL IMPLIED INDEMNITIES.

7. LIMITATION OF LIABILITY. End-User specifically acknowledges that the Product may be operated at high speeds and/or pressures, and that as such it may be inherently dangerous if not used correctly. End-User shall familiarize itself with all operation materials provided by StoneAge and shall at all times use and require its agents, employees and contractors to use all necessary and appropriate safety devices, guards and proper safe operating procedures. In no event shall StoneAge be responsible for any injuries to persons or property caused directly or indirectly by the operation of the Product if End-User or any agent, employee, or contractor of End-User: (1) fails to use all necessary and appropriate safety devices, guards and proper safe operating procedures; (2) fails to maintain in good working order such safety devices and guards; (3) alters or modifies the Product in any way not approved by StoneAge in advance in writing; (4) allows the Product to be operated under more severe conditions or beyond the rated capacity specified for the Product; or (5) otherwise negligently operates the Product. End-User shall indemnify and hold StoneAge harmless from any and all liability or obligation incurred by or against StoneAge, including costs and attorneys' fees, to or by any person so injured.

TO THE FULL EXTENT ALLOWED BY APPLICABLE LAW, STONEAGE SHALL NOT BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES (INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF GOODWILL, DIMINUTION OF VALUE, WORK STOPPAGE, INTERRUPTION OF BUSINESS, RENTAL OF SUBSTITUTE PRODUCT, OR OTHER COMMERCIAL LOSS EVEN TO THE EXTENT SUCH DAMAGES WOULD CONSTITUTE DIRECT DAMAGES), WITH RESPECT TO THE COVERED STONEAGE PRODUCT, OR OTHERWISE IN CONNECTION WITH THIS LIMITED WARRANTY, REGARDLESS OF WHETHER STONEAGE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

IT IS UNDERSTOOD THAT STONEAGE'S LIABILITY, WHETHER IN CONTRACT, IN TORT, UNDER ANY WARRANTY, IN NEGLIGENCE, OR OTHERWISE SHALL NOT EXCEED THE AMOUNT OF THE PURCHASE PRICE PAID BY THE END-USER FOR THE PRODUCT. STONEAGE'S MAXIMUM LIABILITY SHALL NOT EXCEED, AND END-USER'S REMEDY IS LIMITED TO EITHER (1) REPAIR OR REPLACEMENT OF THE DEFECTIVE WORKMANSHIP OR MATERIAL OR, AT STONEAGE'S OPTION, (2) REFUND OF THE PURCHASE PRICE, OR (3) ISSUANCE OF A CREDIT FOR THE PURCHASE PRICE, AND SUCH REMEDIES SHALL BE END-USER'S ENTIRE AND EXCLUSIVE REMEDY.

YOU, THE END-USER, UNDERSTAND AND EXPRESSLY AGREE THAT THE FOREGOING LIMITATIONS ON LIABILITY ARE PART OF THE CONSIDERATION IN THE PRICE OF THE STONEAGE PRODUCT YOU PURCHASED.

Some jurisdictions do not allow the limitation or exclusion of liability for certain damages, so the above limitations and exclusions may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights which vary from jurisdiction to jurisdiction. If any provisions of this Limited Warranty is held to be invalid or unenforceable, such invalidity or unenforceability shall not affect the validity or enforceability of the other portions hereof.

SPECIFICATIONS		
	Imperial	Metric
Full Positioner Weight	120 lbs	54.4 kg
Vertical Carriage Weight	17 lbs	7.7 kg
Horizontal Carriage Weight	15.4 lbs	7 kg
Idler Carriage Weight	4.4 lbs	2 kg
Dimensions without extensions	6 x 6 ft	1829 x 1829 mm
Cleaning Window Dimensions for 6ft Rail Configuration	<i>See diagram below table</i>	
Optional Rail Extension lengths	2, 4, and 6 ft	607, 1219, and 1829 mm

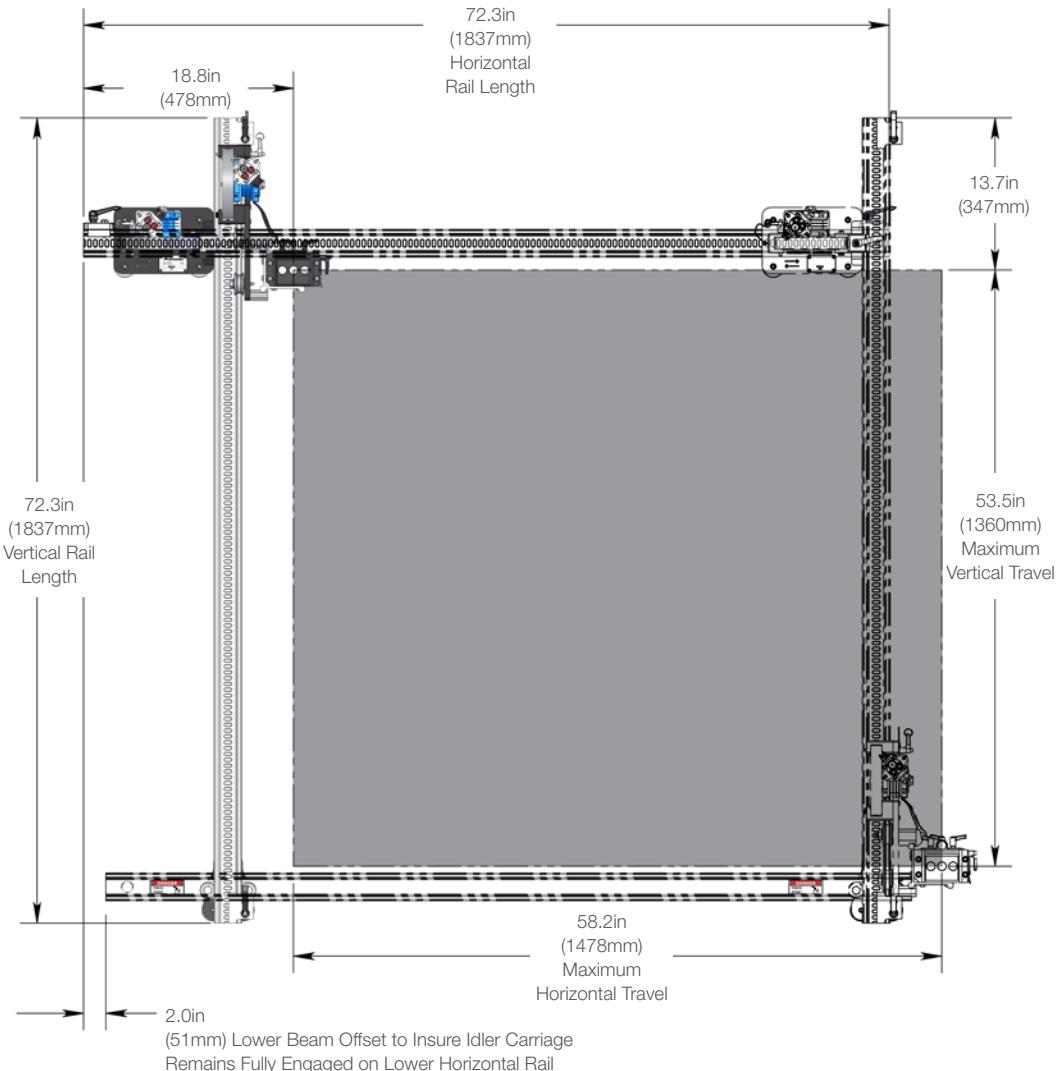

DESCRIPTION OF EQUIPMENT AND INTENDED USE

The Lightweight Positioner can be mounted to a variety of heat exchanger tube bundles and has pneumatic powered horizontal and vertical drives. It is intended to be used with these AUTOBOX® Hose Tractors;

- ABXS-3L (3 Lance with Sentinel Technology)
- ABX-3L (3 Lance)
- ABX-2L-B (2 Lance Belt Drive)
- ABX-PRO (Single Lance)

KEY FEATURES:

- Better positioning accuracy - reduced backlash and clearance across the system
- Completely tool free setup and operation
- Drives locked in place by a pin for visual confirmation of engagement
- Highly accurate position encoding
- Reduced component size and weight
- Larger usable window size
- Push-to-Connect fittings
- Metric hardware and tube sizes
- Sensor can be replaced in minutes
- Same sensor used in both drives
- Carriages are interchangeable with LWP-500
- Rail scraper on idler carriage
- Utilizes field proven stainless steel air motors

EC DECLARATION OF CONFORMITY

Manufacturer:

StoneAge Incorporated
466 South Skylane Drive
Durango, CO 81303
USA

Authorized Representative:

StoneAge Europe
Reedijk 7Q
3274 KE Heinenoord
Netherlands
Bob Van Wordragen, Operations Manager StoneAge NL

Declare that:

Light Weight Positioner (LWPS-100-X)

for mounting and positioning hose tractors to heat exchangers.

Is compliant with the following Directives and Standards:

EU- Machinery Directive (2006/42/EC)

EU- RoHS Directive (2011/65/EU)

EU-EMC Directive (2014/30/EU)

EN ISO 12100:2010 (e) Safety of machinery – General principles for design – Risk assessment and risk reduction

EN ISO 4414:2010 (en) Pneumatic Fluid Power – General rules and safety requirements for systems and components

EN 55011:2009 Industrial, scientific and medical equipment - Radio frequency disturbance characteristics - Limits and methods of measurement

EN 60204-1:2018 Safety of machinery - Electrical equipment of machines

This device complies with part 15 of the FCC rules and Industry Canada ICES-003. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause
undesired operation.

The Technical File for Light Weight Positioner (LWPS-100-X) is maintained at: StoneAge Incorporated, 466 South Skylane Drive, Durango, CO 81303 USA and was compiled by the Director of Engineering and Technology. The Technical File is available through the Authorized Representative.

This Declaration of Conformity is issued under the exclusive responsibility of StoneAge Incorporated.

Harmonized Standard for Electromagnetic Compatibility

The Technical File for Light Weight Positioner (LWPS-100-X) is maintained at:

StoneAge Incorporated, 466 South Skylane Drive, Durango, CO 81303, USA and was compiled by the Engineering Manager.
The Technical File is available through the Authorized Representative.

This Declaration of Conformity is issued under the exclusive responsibility of StoneAge Incorporated.

StoneAge Incorporated, Durango, CO, USA
Scott Howell, New Product Introduction Manager

WARNING AND SAFETY INSTRUCTIONS

OPERATOR TRAINING

Managers, Supervisors, and Operators MUST be trained in Health and Safety Awareness of High-pressure Water Jetting and hold a copy the Water Jetting Association (WJA) Code of Practice, or equivalent (see www.waterjetting.org.uk).

Operators MUST be trained to identify and understand all applicable standards for the equipment supplied. Operators should be trained in manual handling techniques to prevent bodily injury.

StoneAge has designed and manufactured this equipment considering all hazards associated with its operation. StoneAge assessed these risks and incorporated safety features in the design. StoneAge **WILL NOT** accept responsibility for the results of misuse.

IT IS THE RESPONSIBILITY OF THE INSTALLER/OPERATOR to conduct a job specific risk assessment prior to use. Job specific risk assessment MUST be repeated for each different set up, material, and location.

The risk assessment MUST conform to the Health and Safety at Work Act 1974 and other relevant Health and Safety legislation.

Operators MUST read, understand, and follow the Operational and Training Requirements (Section 7.0) of WJTA-IMCA's Recommended Practices For The Use Of High-pressure Waterjetting Equipment, or equivalent.

Operators MUST read, understand and follow the Warnings, Safety Information, Assembly, Installation, Connection, Operation, Transport, Handling, Storage, and Maintenance Instructions detailed in this manual.

The risk assessment MUST consider potential material or substance hazards including:

- Aerosols
- Biological and microbiological (viral or bacterial) agents
- Combustible materials
- Dusts
- Explosion
- Fibers
- Flammable substances
- Fluids
- Fumes
- Gases
- Mists
- Oxidizing Agents

PPE may include:

- **Eye protection:** Full face visor
- **Foot protection:** Kevlar® brand or steel toe capped, waterproof, non-slip safety boots
- **Hand protection:** Waterproof gloves
- **Ear protection:** Ear protection for a minimum of 85 dBA
- **Head protection:** Hard hat that accepts a full face visor and ear protection
- **Body protection:** Multi-layer waterproof clothing approved for waterjetting
- **Hose protection:** Hose shroud
- **Respiratory protection:** May be required; refer to job specific risk assessment

SAFETY LABEL DEFINITION

The Lightweight Positioner (LWPS-100-X) has the potential to cause serious injury if fingers, hair, or clothing become caught between the rollers and the rails.

WARNING AND SAFETY INSTRUCTIONS

⚠ WARNING

Operations with this equipment can be potentially hazardous. Caution MUST be exercised prior to and during machine and water jet tool use. Please read and follow all of these instructions, in addition to the guidelines in the WJTA Recommended Practices handbook, available online at www.wjta.org. Deviating from safety instructions and recommended practices can lead to severe injury and/or death.

- Do not exceed the maximum operating pressure specified for any component in a system.
- The immediate work area MUST be marked off to keep out untrained persons.
- Inspect the equipment for visible signs of deterioration, damage, and improper assembly. Do not operate if damaged, until repaired.
- Make sure all threaded connections are tight and free of leaks.
- Users of the Lightweight Positioner (LWPS-100-X) MUST be trained and/or experienced in the use and application of high-pressure technology and cleaning, as well as all associated safety measures, according to the WJTA Recommended Practices for the use of High-pressure Waterjetting Equipment.
- An anti-withdrawal device (back-out preventer) MUST be used at all times. The back-out prevention device is the Hose Stop Collet located within the Hose Guide Assembly. StoneAge offers several different size Hose Stop Collets. The Collet Size Reference guide is located on the Hose Guide Assembly.
- The Control Box should be located in a safe location where the Operator has good visibility of the pipe and hose. The Lightweight Positioner (LWPS-100-X) and Control Box MUST be supervised at all times and should never be left unattended.
- Always de-energize the system before servicing or replacing any parts. Failure to do so can result in severe injury and/or death.
- When moving the Lightweight Positioner (LWPS-100-X) lift with care to prevent bodily injury.

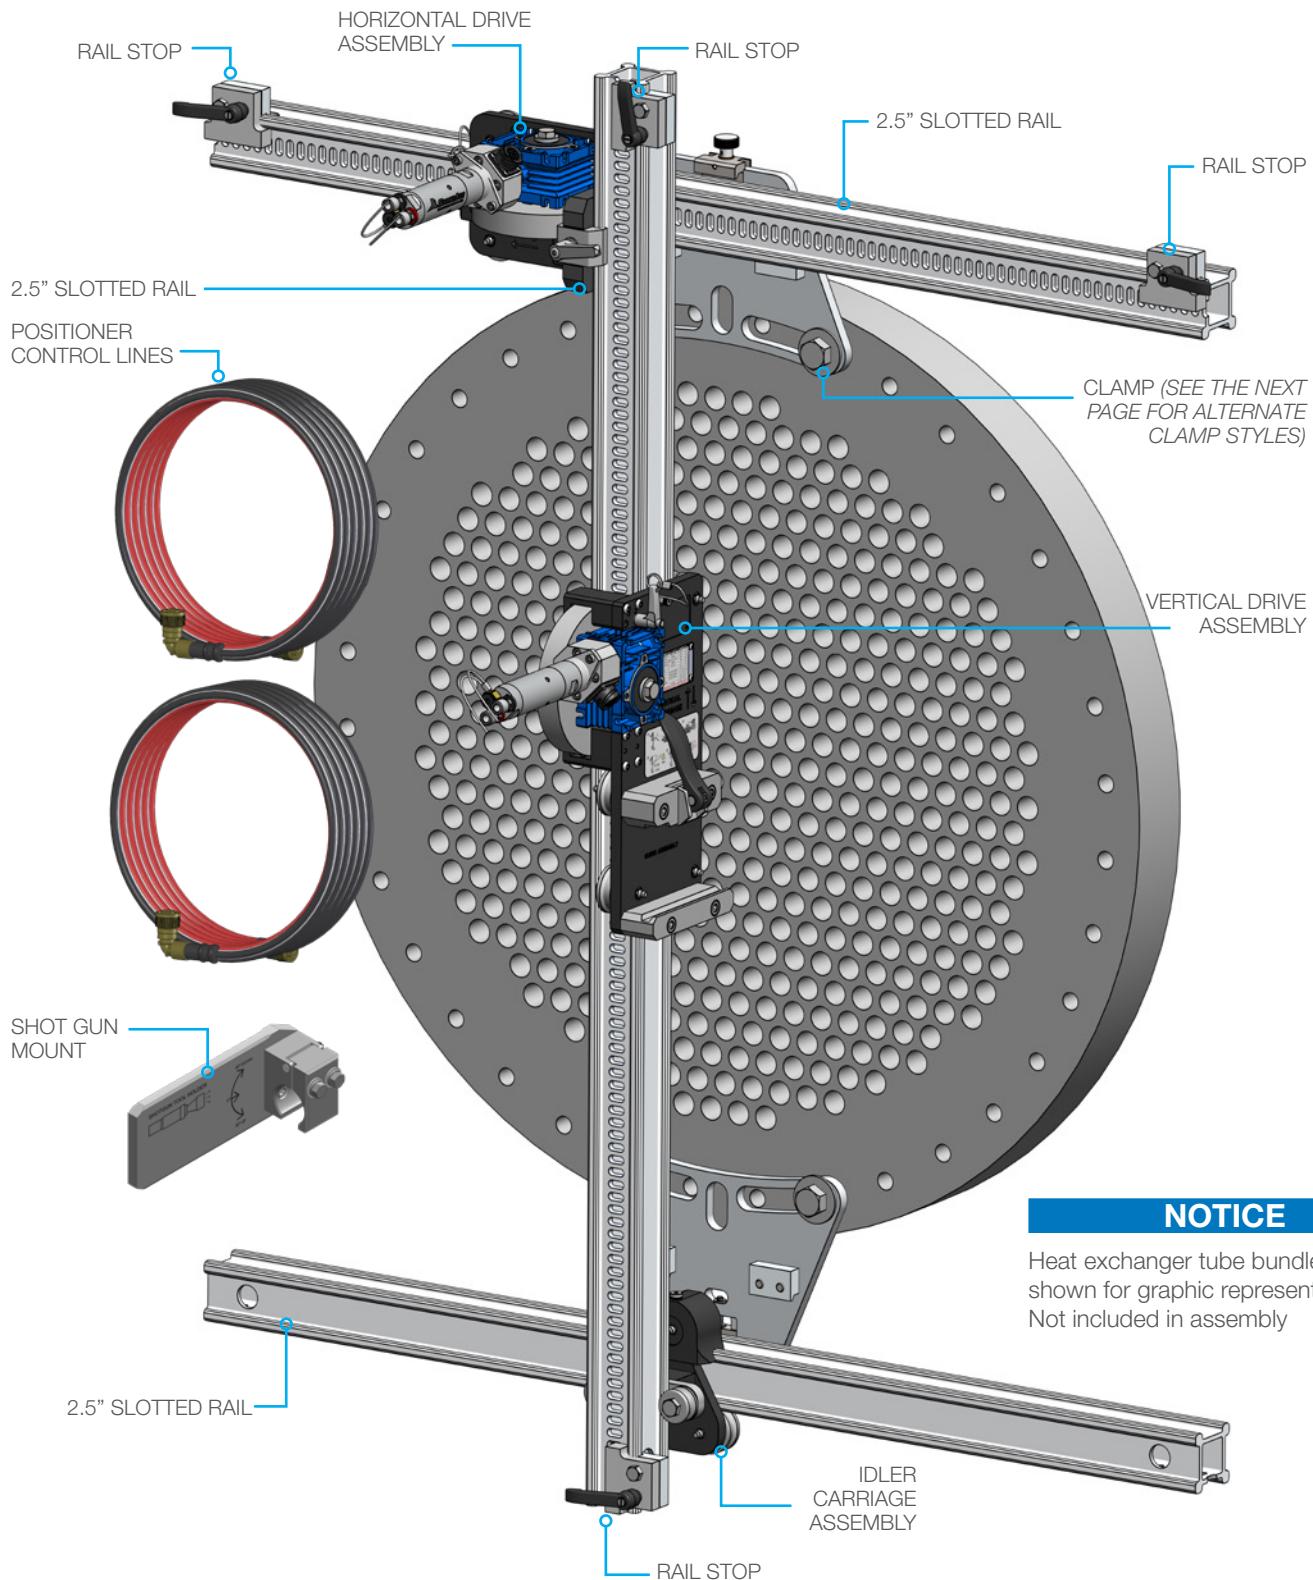

PRE-RUN SAFETY CHECK

Refer to WJTA-IMCA's, Recommended Practices For The Use Of High-pressure Waterjetting Equipment and/or The Water Jetting Association's, WJA Code of Practice for additional safety information.

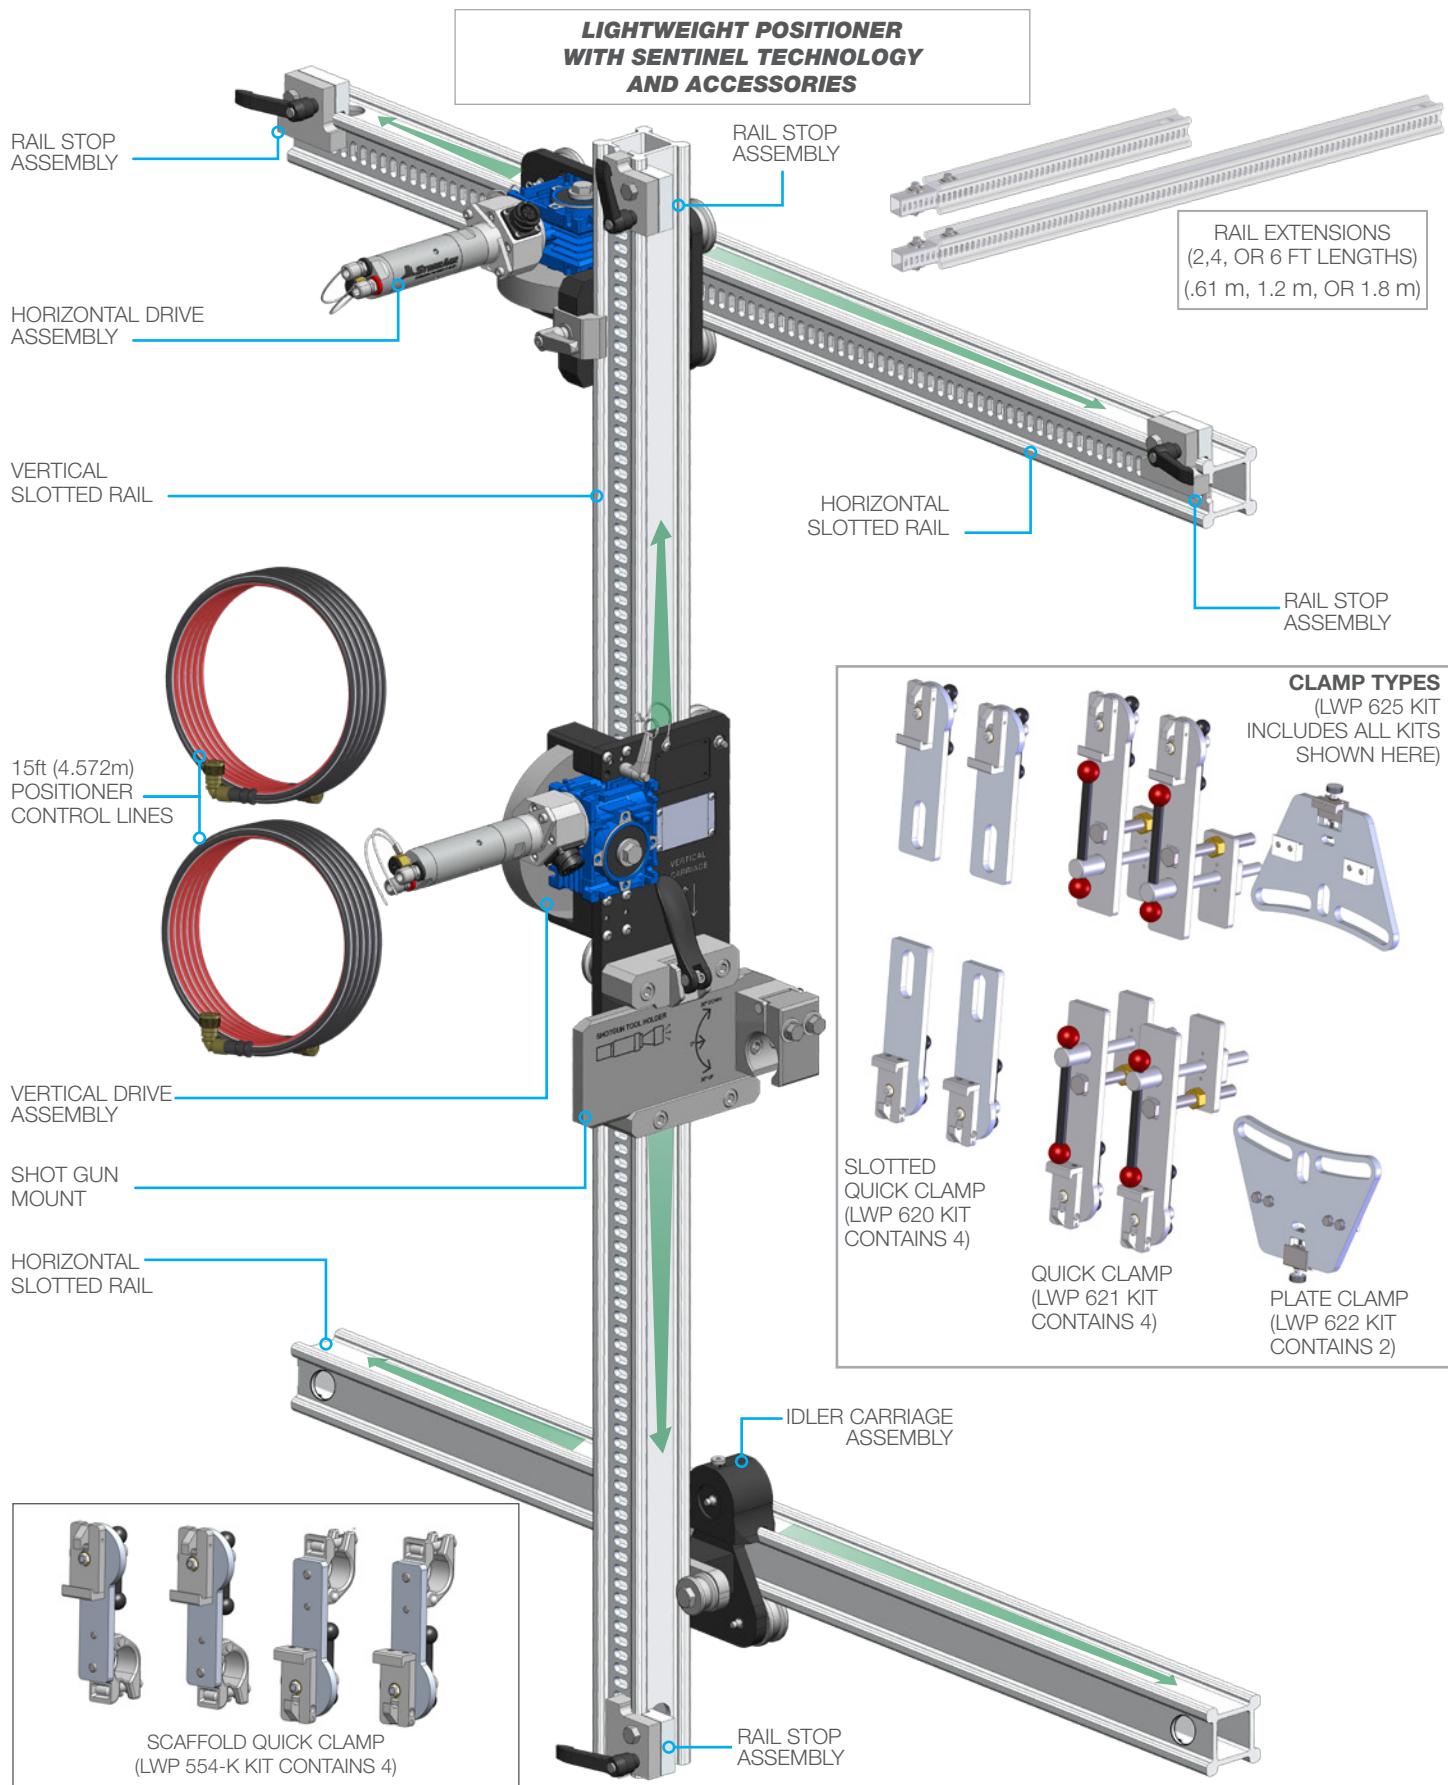

- Complete a job specific risk assessment and act on the resulting actions.
- Adhere to all site specific safety procedures.
- Ensure the waterblasting zone is properly barricaded and that warning signs are posted.
- Ensure the work place is free of unnecessary objects (e.g. loose parts, hoses, tools).
- Ensure all Operators are using the correct Personal Protective Equipment (PPE).
- Check that the air hoses are properly connected and tight.
- Check all hoses and accessories for damage prior to use. Do not use damaged items. Only high quality hoses intended for waterblast applications should be used as high-pressure hoses.
- Check all high-pressure threaded connections for tightness.
- ****Ensure that a anti-withdrawal device (back-out preventer), whip checks (hose whips), and all other applicable safety devices are installed and set-up properly.****
- Ensure the doors of the Lightweight Positioner (LWPS-100-X) are closed and securely latched.
- Test the Control Box before operating the Lightweight Positioner (LWPS-100-X) with high-pressure water to verify the control valves move the hose in the intended direction, and that the dump valve and hose clamp are working properly.
- Ensure that Operators never connect, disconnect, or tighten hoses, adapters, or accessories with the high-pressure water pump unit running.
- Ensure no personnel are in the hydroblasting zone.

SYSTEM ASSEMBLY - OVERVIEW

LIGHTWEIGHT POSITIONER ASSEMBLY (LWPS-100-X)

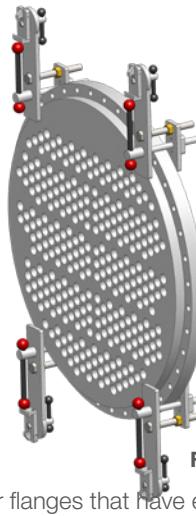

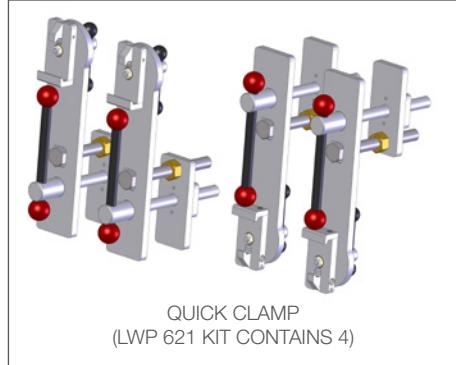

LIGHTWEIGHT POSITIONER - OVERVIEW

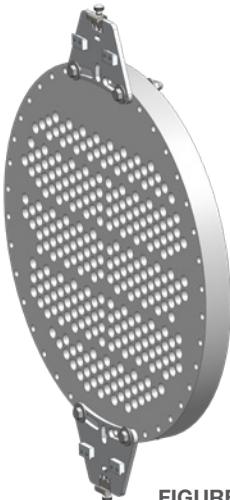

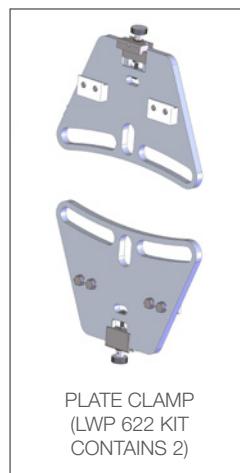

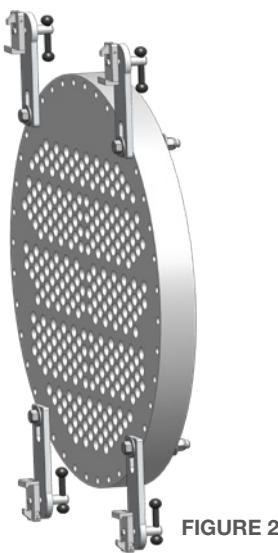

LIGHTWEIGHT POSITIONER CLAMP STYLES

CLAMP SELECTION is dependent upon the heat exchanger geometry, bolt holes, hole spacing, and flange accessibility.

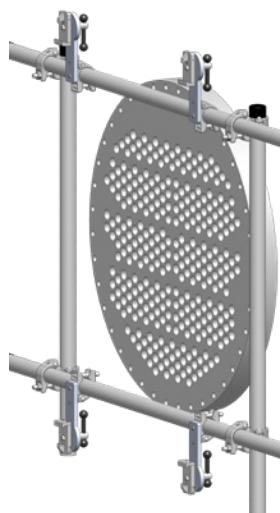

QUICK CLAMPS (LWP 518) are for use with heat exchanger flanges that provide a robust clamping surface or if flange holes are inaccessible. Align clamps on the surface of the flange to maximize flange engagement to clamps. (Figure 1)

SLOTTED QUICK (LWP 552) AND PLATE CLAMPS (LWP 519) are for use with heat exchanger flanges that have easily accessible bolt holes. Use quick clamps or plate clamps, depending on the spacing of the hole pattern. (Figures 1 & 3)

SCAFFOLD QUICK CLAMPS (LWP 554) are for use with scaffolding in situations where they may be no way to clamp directly onto the heat exchanger. (Figure 4)

LIGHTWEIGHT POSITIONER STEP BY STEP SET-UP

NOTICE

Heat exchanger tube bundle face, shown for graphic representation only. Not included in assembly

1. Mount the appropriate frame **Positioner Clamps** to the tube bundle as shown in Figure 1. (Shown with Plate Clamps) Positioner Clamps should be Parallel to the direction of the tube rows. (**Figure 1**)

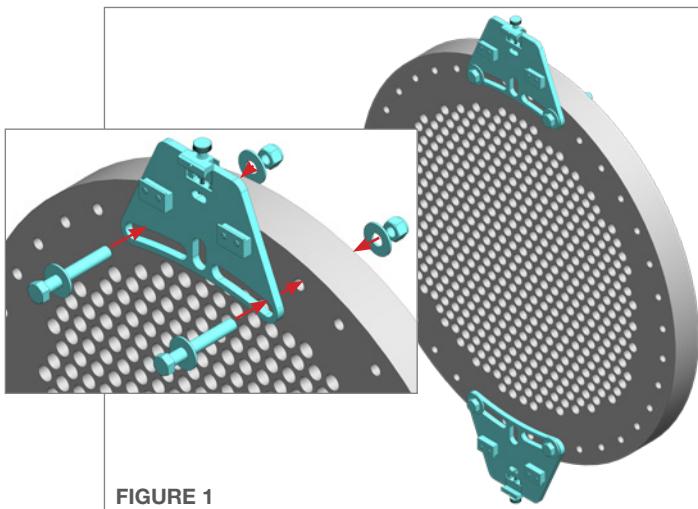

FIGURE 1

2. Loosen the **Rail Clamp Tensioner** on the top **Positioner Clamp** and insert the **Top Rail (slots facing out)** into the upper rail clamps. Tighten the **Rail Clamp Tensioner** securing the rail to the **Positioner Clamp**. Check Rail Clamp bolts to ensure they are secured to the tube bundle flange. (**Figure 2**)

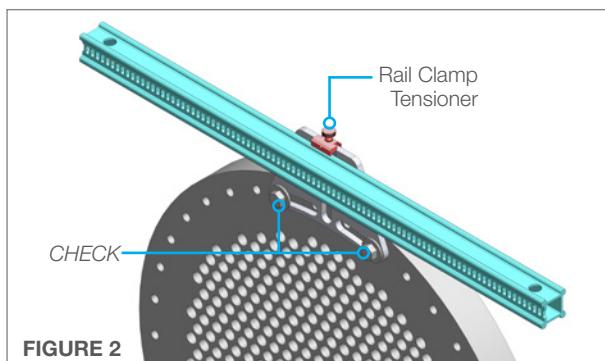

FIGURE 2

3. Loosen the **Rail Clamp Tensioner** on the bottom **Positioner Clamp** and insert the **Lower Rail with the slots facing down**, into the lower rail clamps. It is not critical that this rail is aligned as precisely as the top rail, but it should be close to parallel with the top rail for best performance. Tighten the **Rail Clamp Tensioner** securing the rail to the **Positioner Clamp**. Check Rail Clamp bolts to ensure they are secured to the tube bundle flange. (**Figure 3**)

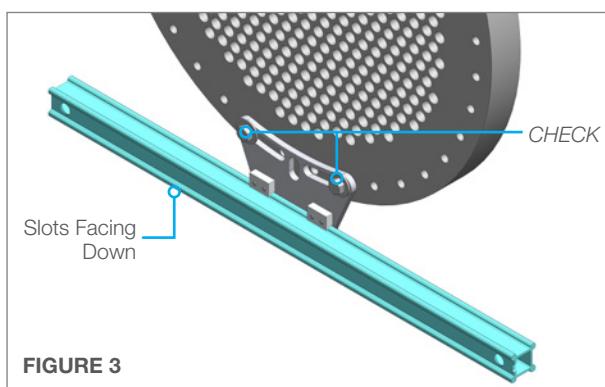

FIGURE 3

4. Remove the **Quick Release Pin** from the *locked*

position, pull back on the air motor to lift the gear, and insert the **Quick Release Pin** into the *unlocked* position. This will allow the **Horizontal Drive Carriage** to slide onto the rail without pneumatic power. Center the carriage on the top rail, pull out the **Quick Release Pin**, let the gear drop into place and verify the gear is engaging the slotted rail correctly. Replace the **Quick Release Pin** into the *locked* position. (**Figures 4 & 5**)

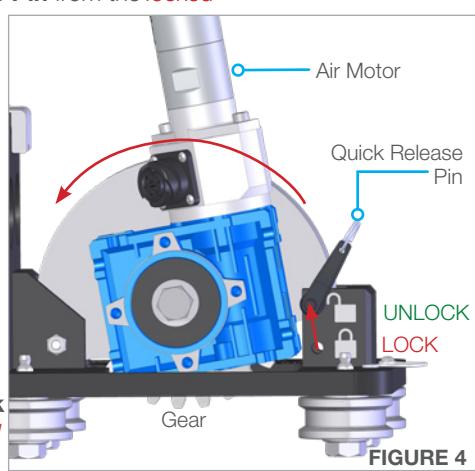

FIGURE 4

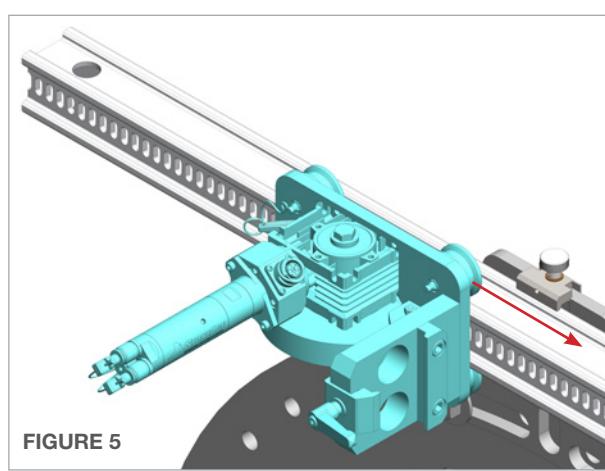

FIGURE 5

LIGHTWEIGHT POSITIONER SET-UP

- Angle the **Idler Carriage** as shown to allow the Idler Carriage to engage with the lower rail properly. Rotate it back to the vertical position and slide it towards the lower Rail Clamp. (**Figure 6**)

TECH TIP:

The rail scraper is spring loaded to fit closely against the rail to remove debris ahead of the idler roller. Pulling up on the rail scraper or tilting the idler carriage during installation will increase clearance and simplify installation.

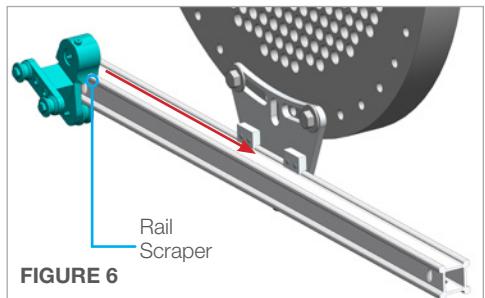

FIGURE 6

- Loosen the **Rail Clamp Handle** on the Horizontal Drive. Align the Idler Carriage on the lower rail so the Vertical Rail can slide into it. Slide the **Vertical Rail** with **(slots facing out)** down through the Horizontal Drive clamp and between the rollers on the idler carriage. Adjust the position of the vertical rail as required and secure the rail in place by tightening the **Rail Clamp Handle** on the Horizontal Drive. (**Figure 7**)

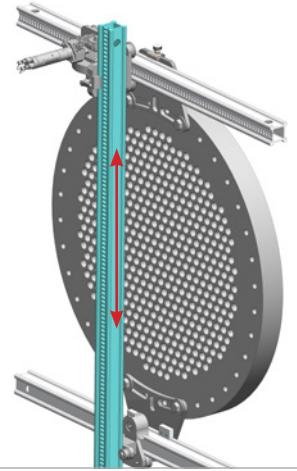

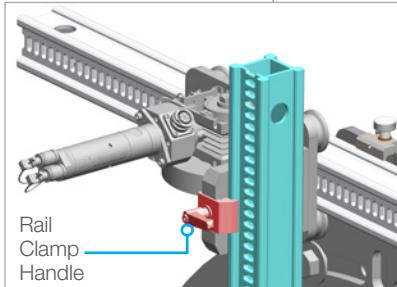

FIGURE 7

- Remove the **Quick Release Pin** from the *locked* position, pull back on the air motor to lift the gear, and insert the **Quick Release Pin** into the *unlocked* position. This will allow the **Vertical Drive Carriage** to slide onto the rail without pneumatic power. Center the carriage on the vertical rail, pull out the **Quick Release Pin**, let the gear drop into place and verify the gear is engaging the slotted rail correctly. Replace the **Quick Release Pin** into the *locked* position. (**Figures 8 & 9**)

⚠ CAUTION

Verify the Positioner Clamps and Rail Clamps are securely fastened and both drive carriages are securely engaged and the pinned in the locked position.

Never unlock the vertical drive once the guide assembly and tractor are installed, as it may result in the carriage slipping down the vertical rail and may cause damage and/or injury.

- Loosen the handles on the four **Rail Stops** and slide one onto both ends of the top horizontal rail and both ends of the vertical rail. Rotate all the handles so they face away from Horizontal and Vertical Drives (as shown) and ensure that they are securely fastened. (**Figure 10**)

⚠ WARNING

Failure to secure the Rail Clamps properly could result in the carriages driving off the rails. This may create a hazardous situation resulting in serious injury or death.

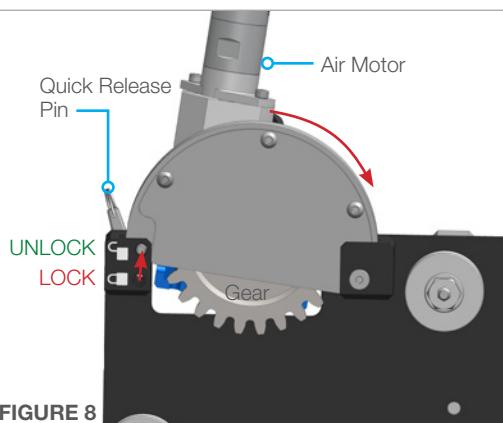

FIGURE 8

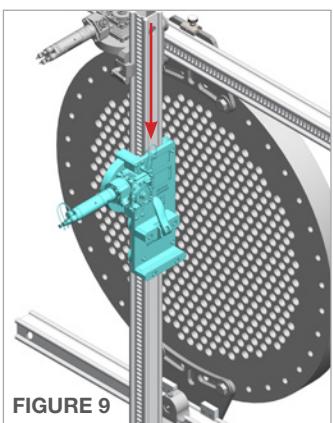

FIGURE 9

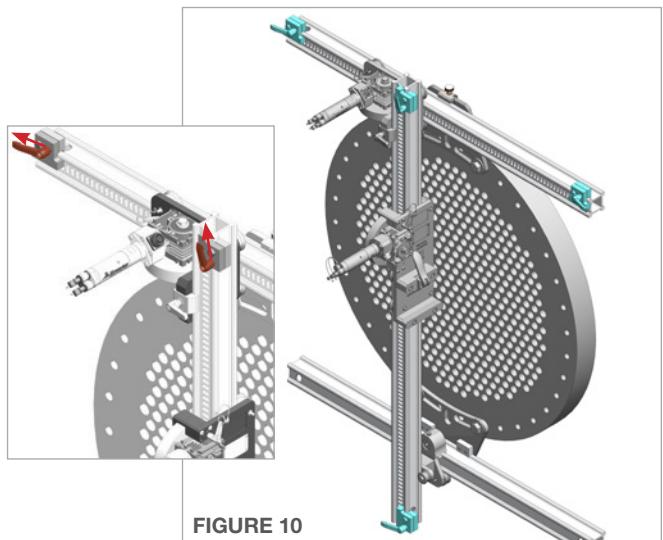

FIGURE 10

LIGHTWEIGHT POSITIONER CONNECTIONS TO THE POWER HUB

CONTROL LINE CONNECTIONS

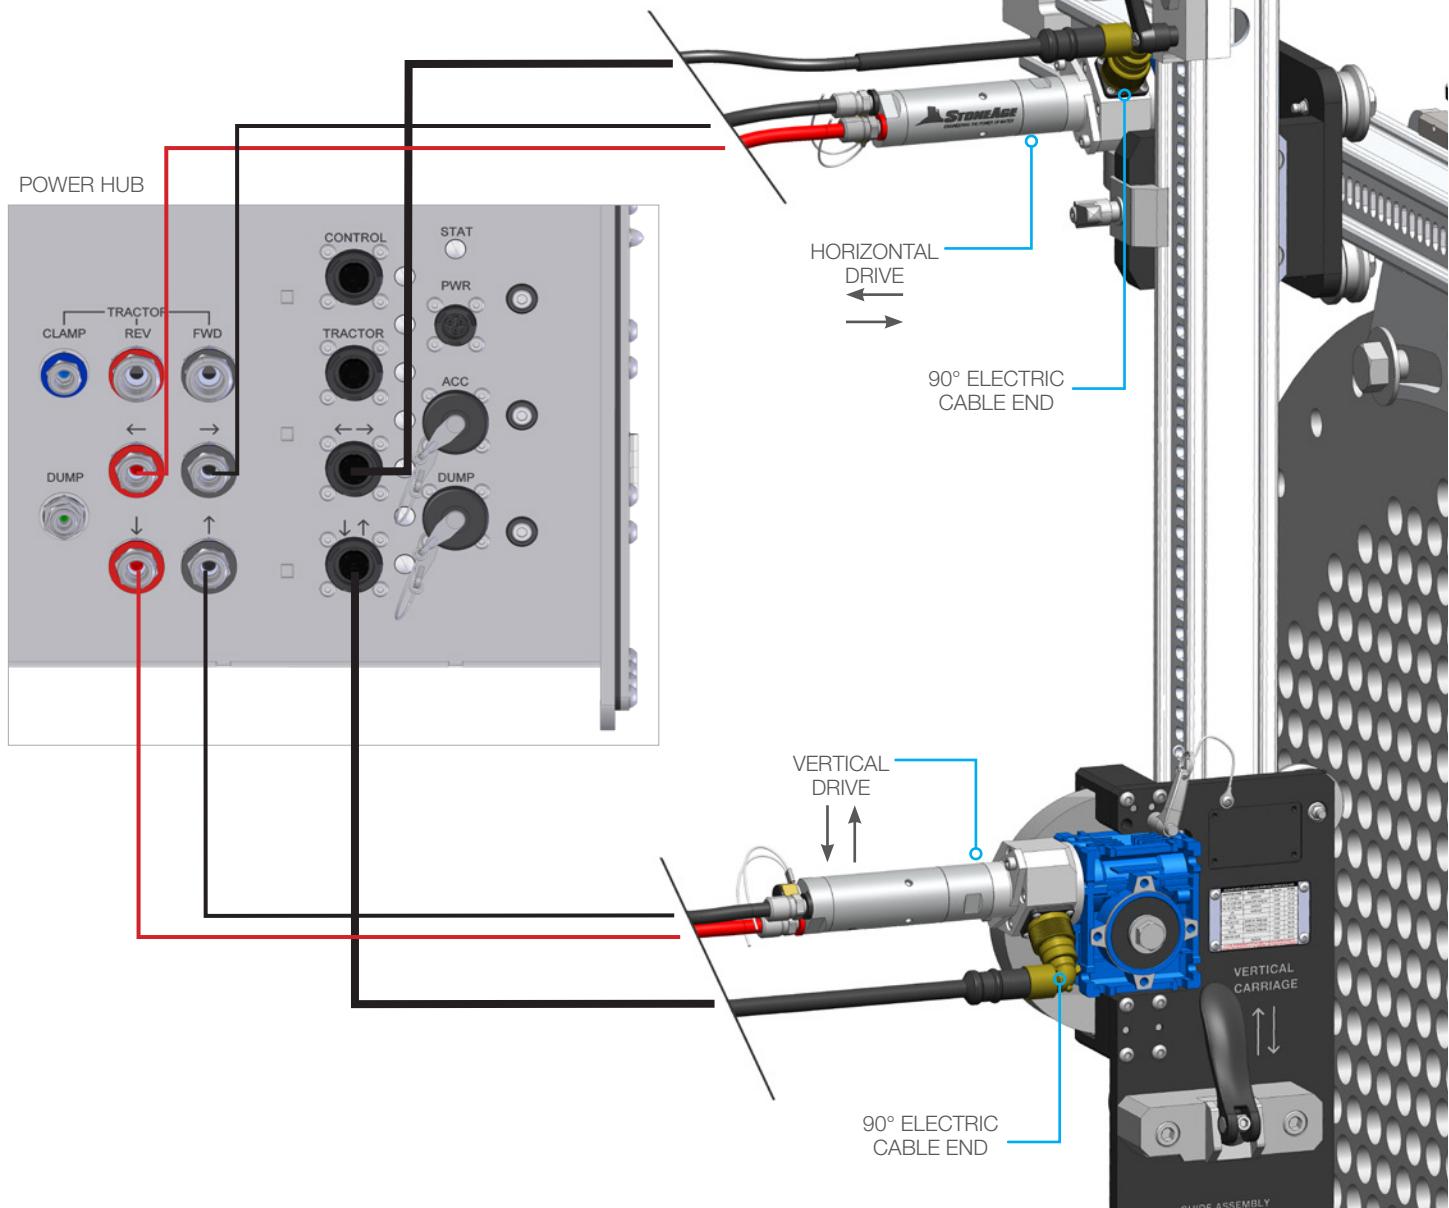

1. Remove the dust caps from all fittings of the Horizontal and Vertical Drives.
2. **Connect control lines to the front of the Power Hub**
 - Two Straight Electric Cable Ends (↓ ↑ , ← →)
 - Two 8mm diameter tubing for the Horizontal Drive (← →)
 - Two 8mm diameter tubing for the Vertical Drive. (↓ ↑)
3. **Blow out all control lines. Use of dirty or contaminated pneumatic hoses will cause component damage and malfunction**

4. Connect control lines to the Horizontal Drive

- Connect the two 8mm diameter tubing from the Power Hub (← →) to the corresponding color coded fittings on the Horizontal Drive.
- Connect the 90° Pot Plug from the Power Hub (← →) to the receptacle on the sensor.

5. Connect control lines to the Vertical Drive

- Connect the two 8mm diameter tubing from the Power Hub (↓ ↑) to the corresponding color coded fittings on the Vertical Drive.
- Connect the 90° Pot Plug from the Power Hub (↓ ↑) to the receptacle on the sensor.

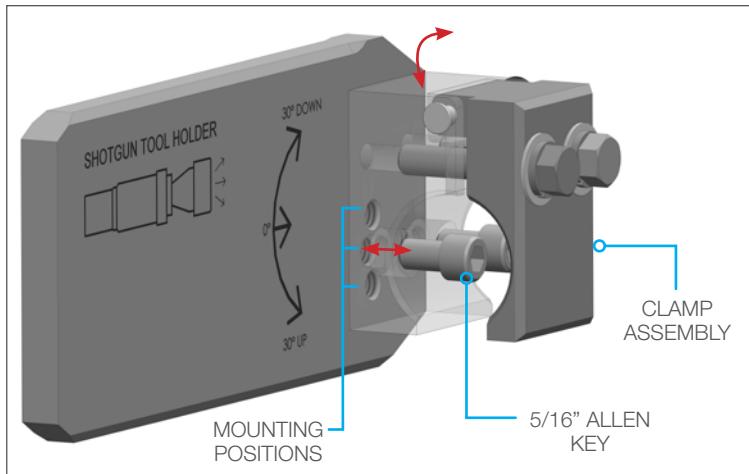

SHOTGUN MOUNT INSTALLATION

INSTALL SHOTGUN MOUNT (FOR USE WITH BARRACUDA OR SPITFIRE TOOL)

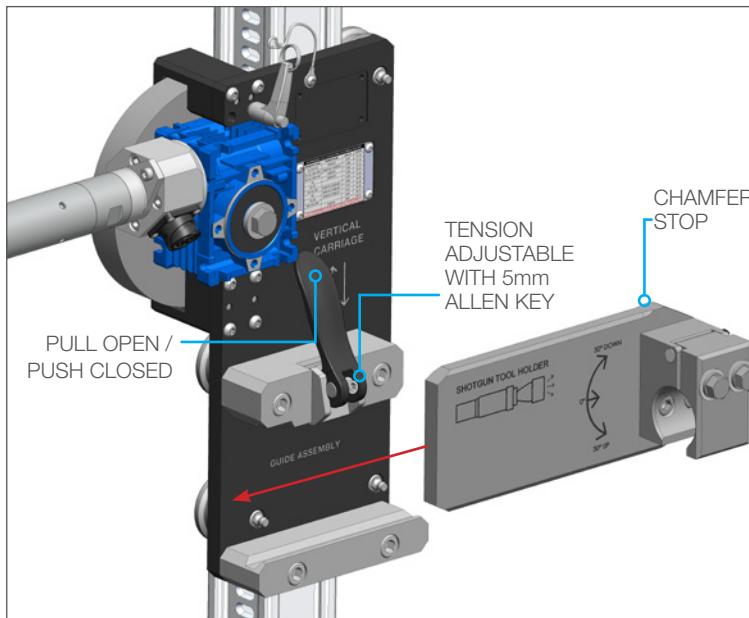

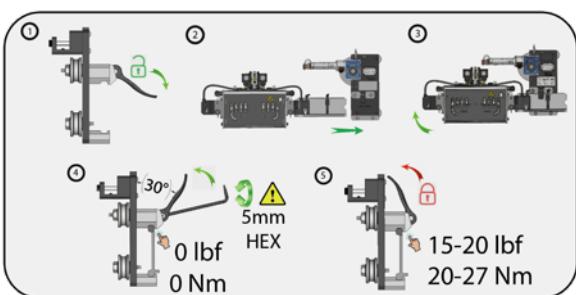

1. Set the desired Clamp Angle.

- The Clamp Assembly on the Shotgun Mount can be rotated 30° Up or Down by removing the two SHCS Screws with a 5/16" Allen Key, rotating the Clamp into the desired position, and fastening the Screws in the desired location.
- Make sure these screws are tightened before operation.**

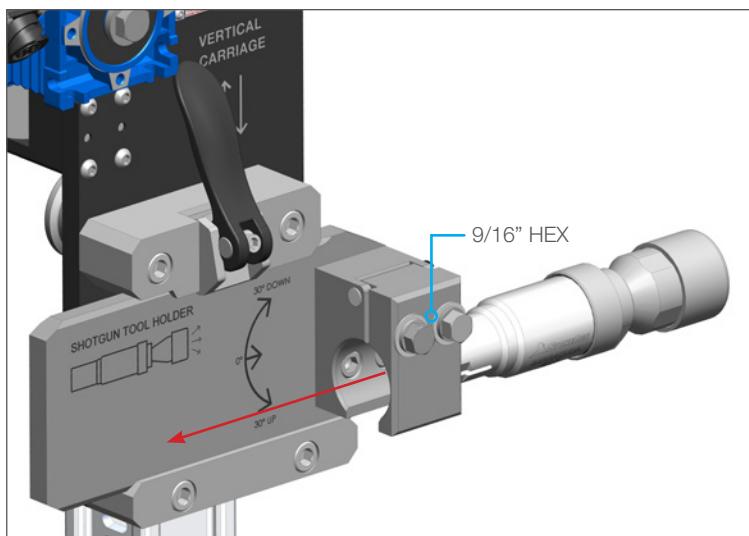

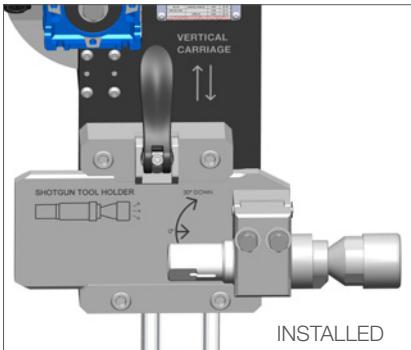

2. Install Shotgun Mount onto the Vertical Carriage.

- Pull to open the Clamp Handle on the Vertical Carriage and slide the Shotgun Mount in back to front.
- The mount will stop when it reaches the chamfers at the front. This is a safety feature.
- Lock the Clamp Handle in place when the mount is in position.
- If the Clamp Handle feels too loose or too tight, it can be adjusted with a 5mm Allen Key. Follow the instructions on the decal on the Vertical Drive.

3. Fasten the Shotgun tool in the Clamp.

- Loosen the two Hex Bolts on the Clamp with a 9/16" Hex Wrench.
- Slide the tool in back to front and securely tighten the Hex Bolts.

Maintenance Item	Frequency	Maintenance Required
Forward, reverse, and clamp fittings	Before each use	Inspect threads for wear or damage.
Carriage rollers	Every 100 Hours of use	Lubricate Zerks on all Carriage Rollers using any multipurpose NLGI 2 grease.
Vertical and Horizontal Rails	As Needed	Inspect for wear that would allow Carriage Rollers to slip off. Replace Rail as needed.
Quick Release Handles	When loose or too tight	5mm hex to tighten. When it's set correctly it should take 15-20lbs of force to close the lever

Contact StoneAge for Safety Data Sheets for material usage, a complete list of spare part numbers, and service instructions for the Lightweight Positioner.

STORAGE, TRANSPORTATION, AND HANDLING

Return the plugs into all push connect fittings to keep water away from the connectors during cleaning. Use mild soapy water to clean the machine in order to remove corrosive materials. Before storing the unit, use compressed air to lightly blow off debris and moisture. Apply a small amount of air tool oil directly into the Horizontal and Vertical Drive fittings. Then, briefly operate the controls at slow speed for a short duration in each direction to coat the interior parts of the motor. Install the dust caps onto all fittings to keep moisture and dirt out.

**DO NOT SPRAY WATER DIRECTLY AT OR SUBMERGE THE AIR MOTOR BREather PORTS OR ELECTRONIC COMPONENTS.
MAKE SURE ALL DUST CAPS ARE IN PLACE AND ELECTRICAL SENSOR CONNECTIONS ARE TIGHT PRIOR TO CLEANING.**

The Lightweight POSITIONER (LWPS-100-X), can be broken down into smaller components that should be stored in a clean and dry area.

TERMS AND CONDITIONS

1. Acceptance of Terms and Conditions. Receipt of these Terms and Conditions of Sale ("Terms and Conditions") shall operate as the acceptance by StoneAge, Inc. ("Seller") of the order submitted by the purchaser ("Buyer"). Such acceptance is made expressly conditional on assent by Buyer to these Terms and Conditions. Such assent shall be deemed to have been given unless written notice of objection to any of these Terms and Conditions (including inconsistencies between Buyer's purchase order and this acceptance) is given by Buyer to Seller promptly on receipt hereof.

Seller desires to provide Buyer with prompt and efficient service. However, to individually negotiate the terms of each sales contract would substantially impair Seller's ability to provide such service. Accordingly, the product(s) furnished by Seller are sold only according to the terms and conditions stated herein and with the terms and conditions stated in any effective StoneAge Dealer Agreement or StoneAge Reseller Agreement, if applicable. Notwithstanding any terms and conditions on Buyer's order, Seller's performance of any contract is expressly made conditional on Buyer's agreement to these Terms and Conditions unless otherwise specifically agreed to in writing by Seller. In the absence of such agreement, commencement of performance, shipment and/or delivery shall be for Buyer's convenience only and shall not be deemed or construed to be an acceptance of Buyer's terms and conditions.

2. Payment/Prices. Unless other arrangements have been made in writing between Seller and Buyer, payment for the product(s) shall be made upon receipt of invoice. The prices shown on the face hereof are those currently in effect. Prices invoiced shall be per pricelist in effect at the time of shipment. Prices are subject to increase for inclusion of any and all taxes which are applicable and which arise from the sale, delivery or use of the product(s), and the collection of which Seller is or may be responsible to provide to any governmental authority, unless acceptable exemption certificates are provided by Buyer in accordance with applicable law. Buyer shall pay all charges for transportation and delivery and all excise, order, occupation, use or similar taxes, duties, levies, charges or surcharges applicable to the product(s) being purchased, whether now in effect or hereafter imposed by any governmental authority, foreign or domestic.

3. Warranty. SELLER MAKES NO WARRANTIES OR REPRESENTATIONS AS TO THE PERFORMANCE OF ANY PRODUCT EXCEPT AS SET FORTH IN THE STONEAGE LIMITED WARRANTY PROVIDED WITH THE PRODUCT.

4. Delivery. Seller is not obligated to make delivery by a specified date, but will always use its best efforts to make delivery within the time requested. The proposed shipment date is an estimate. Seller will notify Buyer promptly of any material delay and will specify the revised delivery date as soon as practicable. UNDER NO CIRCUMSTANCES SHALL SELLER HAVE ANY LIABILITY WHATSOEVER FOR LOSS OF USE OR FOR ANY DIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM DELAY REGARDLESS OF THE REASON(S).

All product(s) will be shipped F.O.B. point of origin, unless specifically agreed otherwise, and Buyer shall pay all shipping costs and insurance costs from that point. Seller, in its sole discretion, will determine and arrange the means and manner of transportation of the product(s). Buyer shall bear all risk of loss commencing with the shipment or distribution of the product(s) from Seller's warehouse. Order shortages or errors must be reported within fifteen (15) business days from receipt of shipment to secure adjustment. No product(s) may be returned without securing written approval from Seller.

5. Modification. These Terms and Conditions are intended by Seller and Buyer to constitute a final, complete and exclusive expression of agreement relating to the subject matter hereof and cannot be supplemented or amended without Seller's prior written approval.

6. Omission. Seller's waiver of any breach or Seller's failure to enforce any of these Terms and Conditions at any time, shall not in any way affect, limit or waive Seller's right thereafter to enforce and compel strict compliance with every term and condition hereof.

7. Severability. If any provision of these Terms and Conditions is held to be invalid or unenforceable, such invalidity or unenforceability shall not affect the validity or enforceability of the other portions hereof.

8. Disputes. Seller and Buyer shall attempt in good faith to promptly resolve any dispute arising under these Terms and Conditions by negotiations between representatives who have authority to settle the controversy. If unsuccessful, Seller and Buyer shall further attempt in good faith to settle the dispute by nonbinding third-party mediation, with fees and expenses of such mediation apportioned equally to each side. Any dispute not so resolved by negotiation or mediation may then be submitted to a court of competent jurisdiction in accordance with the terms hereof. These procedures are the exclusive procedures for the resolution of all such disputes between the Seller and Buyer.

9. Governing Law. All sales, agreements for sale, offers to sell, proposals, acknowledgments and contracts of sale, including, but not limited to, purchase orders accepted by Seller, shall be considered a contract under the laws of the State of Colorado and the rights and duties of all persons, and the construction and effect of all provisions hereof shall be governed by and construed according to the laws of such state.

10. Jurisdiction and Venue. Seller and Buyer agree that the state or federal courts located within the City and County of Denver, Colorado shall have sole and exclusive jurisdiction over any litigation concerning any dispute arising under these Terms and Conditions not otherwise resolved pursuant to Section 9 as well as any alleged defects of any Products or damages sustained as a result of such alleged defects. Seller and Buyer further agree that should any litigation be commenced in connection with such a dispute, it shall only be commenced in such courts. Seller and Buyer agree to the exclusive jurisdiction of such courts and neither will raise any objection to the jurisdiction and venue of such courts, including as a result of inconvenience.

11. Attorney's Fees. If any litigation is commenced between Seller and Buyer, or their personal representatives, concerning any provision hereof, the party prevailing in the litigation shall be entitled, in addition to such other relief that is granted, to a reasonable sum as and for their attorneys' fees and costs in such litigation or mediation.

STONEAGE TERMS AND WARRANTY

View StoneAge's Terms and Warranty Conditions online.

<http://www.stoneagetoools.com/terms>

<http://www.stoneagetoools.com/warranty>

WARRANTY

Warranties set forth herein extend only to End-Users, meaning customers acquiring, or that have previously acquired, a product manufactured by StoneAge ("Product") for their own use and not for resale, either directly from StoneAge Inc. ("StoneAge") or from a StoneAge Authorized Dealer or Reseller ("Dealer"). No warranty of any kind or nature is made by StoneAge beyond those expressly stated herein.

1. LIMITED WARRANTY PERIOD. Subject to the limitations and conditions hereinafter set forth, StoneAge warrants its Product to be free from defects in workmanship and material for a period of one (1) year from the date of purchase by the End-User, provided that the end of the limited warranty period shall not be later than eighteen (18) months from the date of shipment of the Product to the Dealer or the End-User by StoneAge ("Limited Warranty Period"). All replacement parts which are furnished under this Limited Warranty and properly installed shall be warranted to the same extent as the original Product under this Limited Warranty if, and only if, the original parts were found to be defective within the original Limited Warranty Period covering the original Product. Replacement parts are warranted for the remainder of the original Limited Warranty Period. This Limited Warranty does not cover any component part of any Product not manufactured by StoneAge. Any such component part is subject exclusively to the component manufacturer's warranty terms and conditions.

2. LIMITED WARRANTY COVERAGE. StoneAge's sole obligation under this Limited Warranty shall be, at StoneAge's option and upon StoneAge's inspection, to repair, replace or issue a credit for any Product which is determined by StoneAge to be defective in material or workmanship. StoneAge reserves the right to examine the alleged defective Product to determine whether this Limited Warranty is applicable, and final determination of limited warranty coverage lies solely with StoneAge. No statement or recommendation made by a StoneAge representative, Dealer or agent to End-User shall constitute a warranty by StoneAge or a waiver or modification to any of the provisions hereof or create any liability for StoneAge.

3. WARRANTY SERVICE PROVIDERS. Service and repair of the Product is to be performed only by StoneAge authorized service representatives, including Dealers who are authorized repair centers, with StoneAge approved parts. Information about StoneAge authorized service representatives can be obtained through the StoneAge website at www.stoneagetools.com/service. Unauthorized service, repair or modification of the Product or use of parts not approved by StoneAge will void this Limited Warranty. StoneAge reserves the right to change or improve the material and design of the Product at any time without notice to End-User, and StoneAge is not obligated to make the same improvements during warranty service to any Product previously manufactured.

4. WARRANTY EXCLUSIONS. This Limited Warranty does not cover, and StoneAge shall not be responsible for the following, or damage caused by the following: (1) any Product that has been altered or modified in any way not approved by StoneAge in advance in writing; (2) any Product that has been operated under more severe conditions or beyond the rated capacity specified for that Product; (3) depreciation or damage caused by normal wear and tear, failure to follow operation or installation instructions, misuse, negligence or lack of proper protection during storage; (4) exposure to fire, moisture, water intrusion, electrical stress, insects, explosions, extraordinary weather and/or environmental conditions including, but not limited to lightning, natural disasters, storms, windstorms, hail, earthquakes, acts of God or any other force majeure event; (5) damage to any Product caused by any attempt to repair, replace, or service the Product by persons other than StoneAge authorized service representatives; (6) costs of normal maintenance parts and services; (7) damage sustained during unloading, shipment or transit of the Product; or (8) failure to perform the recommended periodic maintenance procedures listed in the Operator's Manual accompanying the Product.

5. REQUIRED WARRANTY PROCEDURES. To be eligible for warranty service, the End-User must: (1) report the Product defect to the entity where the Product was purchased (i.e. StoneAge or the Dealer) within the Limited Warranty Period specified in this Limited Warranty; (2) submit the original invoice to establish ownership and date of purchase; and (3) make the Product available to a StoneAge authorized service representative for inspection to

determine eligibility for coverage under this Limited Warranty. This Limited Warranty shall not extend to any person or entity who fails to provide proof of original purchase from StoneAge or a Dealer. No Product may be returned for credit or adjustment without prior written permission from StoneAge.

6. DISCLAIMER OF IMPLIED WARRANTIES AND OTHER REMEDIES. EXCEPT AS EXPRESSLY STATED HEREIN (AND TO THE FULLEST EXTENT ALLOWED UNDER APPLICABLE LAW), STONEAGE HEREBY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ANY AND ALL WARRANTIES, REPRESENTATIONS OR PROMISES AS TO THE QUALITY, PERFORMANCE OR FREEDOM FROM DEFECT OF THE PRODUCT COVERED BY THIS LIMITED WARRANTY. STONEAGE FURTHER DISCLAIMS ALL IMPLIED INDEMNITIES.

7. LIMITATION OF LIABILITY. End-User specifically acknowledges that the Product may be operated at high speeds and/or pressures, and that as such it may be inherently dangerous if not used correctly. End-User shall familiarize itself with all operation materials provided by StoneAge and shall at all times use and require its agents, employees and contractors to use all necessary and appropriate safety devices, guards and proper safe operating procedures. In no event shall StoneAge be responsible for any injuries to persons or property caused directly or indirectly by the operation of the Product if End-User or any agent, employee, or contractor of End-User: (1) fails to use all necessary and appropriate safety devices, guards and proper safe operating procedures; (2) fails to maintain in good working order such safety devices and guards; (3) alters or modifies the Product in any way not approved by StoneAge in advance in writing; (4) allows the Product to be operated under more severe conditions or beyond the rated capacity specified for the Product; or (5) otherwise negligently operates the Product. End-User shall indemnify and hold StoneAge harmless from any and all liability or obligation incurred by or against StoneAge, including costs and attorneys' fees, to or by any person so injured.

TO THE FULL EXTENT ALLOWED BY APPLICABLE LAW, STONEAGE SHALL NOT BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES (INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF GOODWILL, DIMINUTION OF VALUE, WORK STOPPAGE, INTERRUPTION OF BUSINESS, RENTAL OF SUBSTITUTE PRODUCT, OR OTHER COMMERCIAL LOSS EVEN TO THE EXTENT SUCH DAMAGES WOULD CONSTITUTE DIRECT DAMAGES), WITH RESPECT TO THE COVERED STONEAGE PRODUCT, OR OTHERWISE IN CONNECTION WITH THIS LIMITED WARRANTY, REGARDLESS OF WHETHER STONEAGE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

IT IS UNDERSTOOD THAT STONEAGE'S LIABILITY, WHETHER IN CONTRACT, IN TORT, UNDER ANY WARRANTY, IN NEGLIGENCE, OR OTHERWISE SHALL NOT EXCEED THE AMOUNT OF THE PURCHASE PRICE PAID BY THE END-USER FOR THE PRODUCT. STONEAGE'S MAXIMUM LIABILITY SHALL NOT EXCEED, AND END-USER'S REMEDY IS LIMITED TO EITHER (1) REPAIR OR REPLACEMENT OF THE DEFECTIVE WORKMANSHIP OR MATERIAL OR, AT STONEAGE'S OPTION, (2) REFUND OF THE PURCHASE PRICE, OR (3) ISSUANCE OF A CREDIT FOR THE PURCHASE PRICE, AND SUCH REMEDIES SHALL BE END-USER'S ENTIRE AND EXCLUSIVE REMEDY.

YOU, THE END-USER, UNDERSTAND AND EXPRESSLY AGREE THAT THE FOREGOING LIMITATIONS ON LIABILITY ARE PART OF THE CONSIDERATION IN THE PRICE OF THE STONEAGE PRODUCT YOU PURCHASED.

Some jurisdictions do not allow the limitation or exclusion of liability for certain damages, so the above limitations and exclusions may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights which vary from jurisdiction to jurisdiction. If any provisions of this Limited Warranty is held to be invalid or unenforceable, such invalidity or unenforceability shall not affect the validity or enforceability of the other portions hereof.

Recommended Operational Temperature	20 ° to 140 °F Do not exceed 160 °F	-6 ° to 60 °C Do not exceed 71 °C

DESCRIPTION OF EQUIPMENT AND INTENDED USE

The CTRL-101 Controller is designed to function with the ABXS-3L Hose Tractor and it's integrated sensing technology. The Controller is small, lightweight, and intuitive in it's operation. There is an emphasis on ergonomic design for operators wearing PPE. The Controller is designed to withstand harsh job conditions and collects job performance data.

The PH-A0302A00C20 Power Hub is a centralized Power Hub for electric-air conversion. It Seamlessly drives air motors in the tractor and positioner. It is rugged and lightweight and compatible with all pumps.

KEY FEATURES:

Controller (CTRL-101)

- Optimized for use while standing: Angled screen puts wrists in natural position
- Comfort grip, video game inspired design and operable with gloves.
- Thumbs operate joysticks, Index fingers operate trigger buttons, and Left fingers grip Automation lever.

Power Hub (PH-A0302A00C20)

- Sealed and Separated Design: Electronics Side & Pneumatic Side
- Purpose Built Enclosure: Seam welded aluminum
- E-Stop: Cuts supply power
- Door: Covers fittings and connectors, eliminates caps and plugs
- Controller Storage: Location for controller, prevent damage
- Valve Access Hatch: Easier troubleshooting/ service of valves
- Integrated FRL: Aid in valve pack and air motor life
- Quick Connect on Air Supply: Chane and easy access to supply hose fitting
- Bulkhead NPT fittings: externally change damaged PTC fittings
- Short Circuit Protection: On all supply side connections, automatically resets

EC DECLARATION OF CONFORMITY

Manufacturer:

StoneAge Incorporated

Bob Van Wordragen, Operations Manager StoneAge NL

Declare that:

Pressure Transducer (PT-100-ABXS-3L-MP)
for high pressure water cleaning of system parts.

Is compliant with the following Directives and Standards:

EU- Machinery Directive (2006/42/EC)

EU- RoHS Directive (2011/65/EU)

EU- EMC Directive (2014/30/EU)

EN ISO 12100:2010 (e) Safety of machinery – General principles for design – Risk assessment and risk reduction

EN ISO 4414:2010 (en) Pneumatic Fluid Power – General rules and safety requirements for systems and components

EN 55011:2009 Industrial, scientific and medical equipment - Radio-frequency disturbance characteristics - Limits and methods of measurement

EN 60204-1:2018 Safety of machinery– Electrical equipment of machines

This device complies with part 15 of the FCC rules and Industry Canada ICES-003. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The Technical File for Pressure Transducer (PT-100-ABXS-3L-MP) is maintained at:

StoneAge Incorporated, 466 South Skylane Drive, Durango, CO 81303, USA and was compiled by the Engineering Manager.
The Technical File is available through the Authorized Representative.

This Declaration of Conformity is issued under the exclusive responsibility of StoneAge Incorporated.

StoneAge Incorporated, Durango, CO, USA

Scott Howell, New Product Introduction Manager

Regulatory Compliance and Safety Information for StoneAge Sentinel System USA & Canada Compliance

Manufacturer: StoneAge Incorporated
466 South Skylane Drive
Durango, CO 81303
US (866)-795-1586
www.stoneagetools.com

Declare that: Sentinel System (SENT001)

Is compliant with the following:

FCC Part 15, Subpart B / ICES-003 Unintentional Emissions Interference Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules and Industry Canada ICES-003. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules and Industry Canada ICES-003. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Part 15, Subpart C / RSS-210 Intentional Emissions Interference Statement

Compliance of this equipment is confirmed by the following certification numbers that are placed on the equipment:

Notice: The term "FCC ID:" and "IC" before the certification number signifies that FCC and Industry Canada technical specifications were met.

FCC ID: 2AX9D-SENT001

IC ID: 26898-SENT001

This Declaration of Conformity is issued under the exclusive responsibility of StoneAge Incorporated.

RF Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

- The equipment should only be used or installed at locations where there is normally at least a 20cm separation between the antenna and all persons.
- This transmitter must not be co-located or operation in conjunction with any other antenna or transmitter.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

FULL SYSTEM ASSEMBLY - OVERVIEW

CONTROLLER (CTRL-101) AND POWER HUB (PH-A0302A00C20) SHOWN IN THE SYSTEM ASSEMBLY

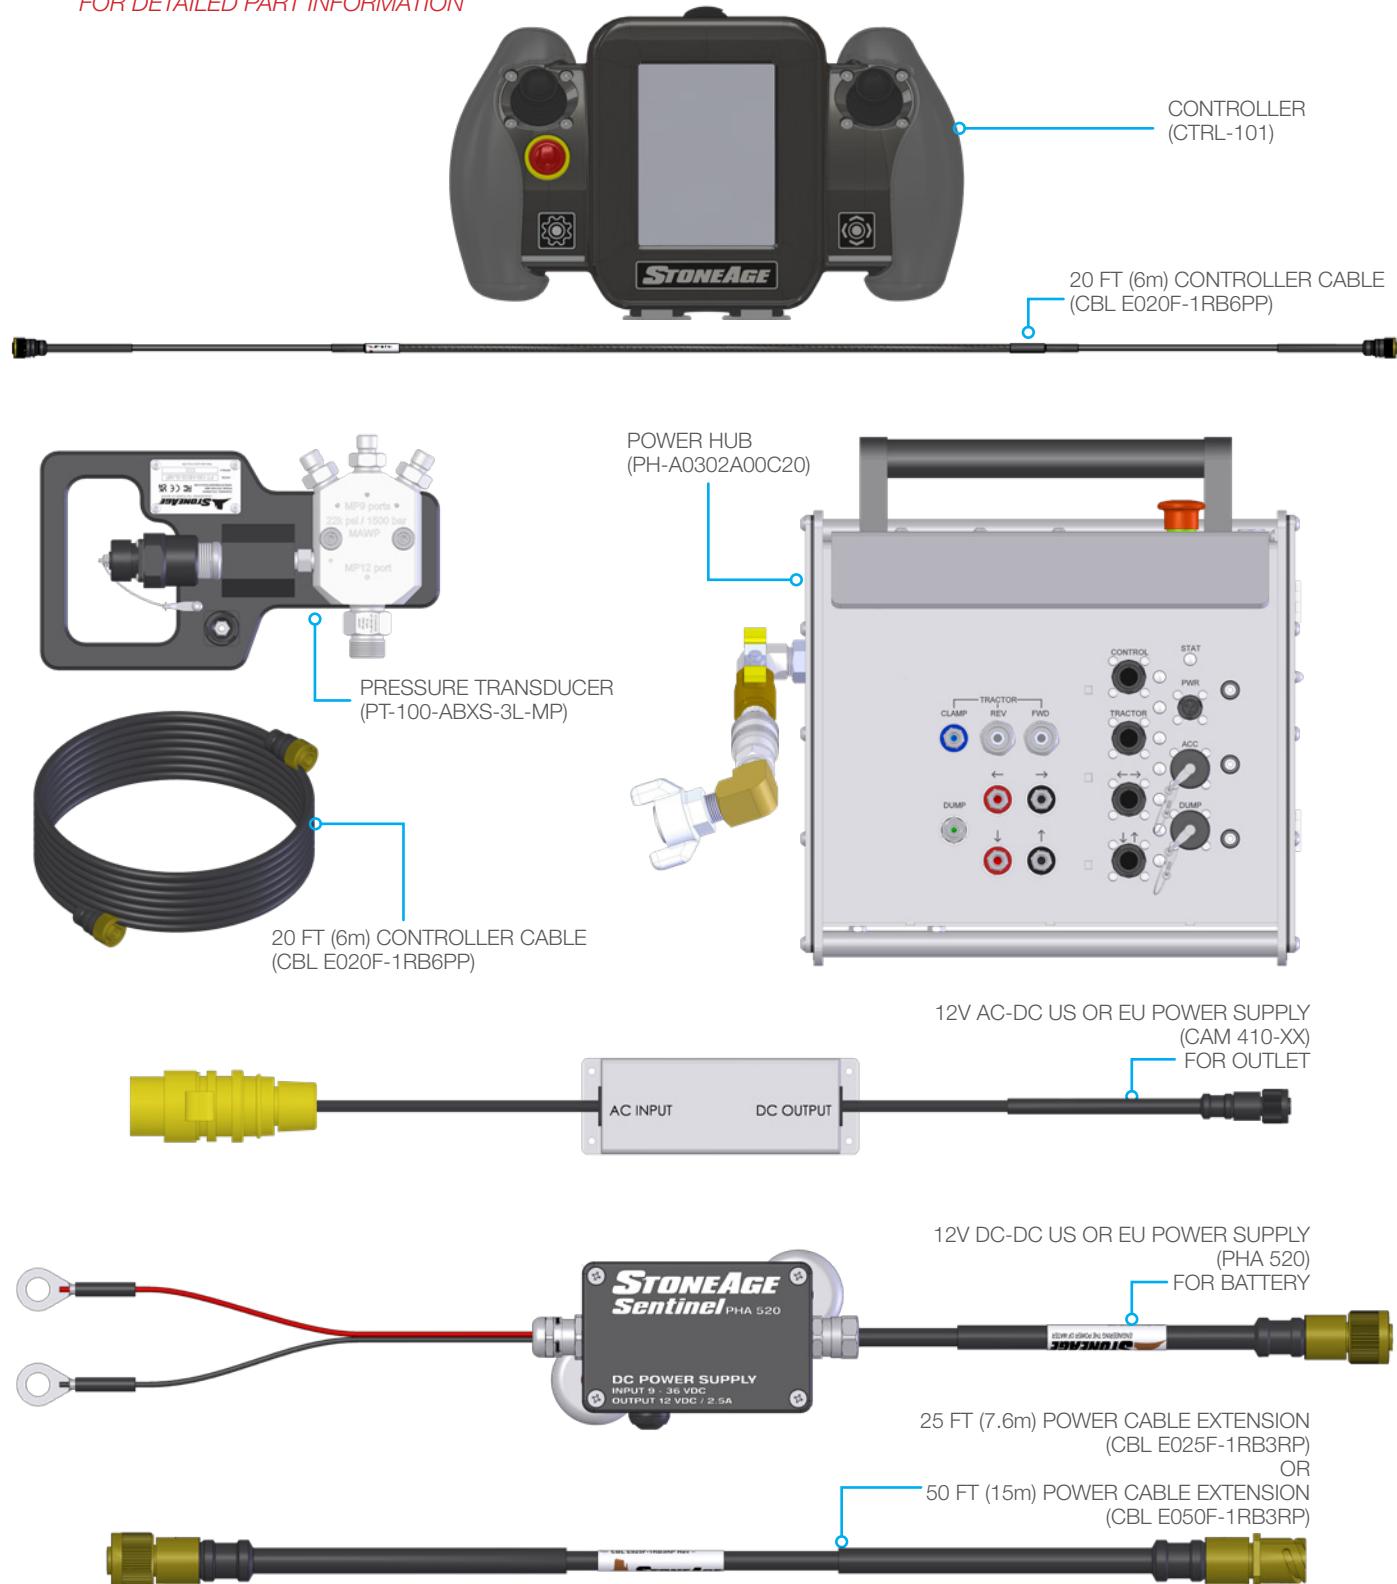

NOTICE

**SEE THE PART DIAGRAM SECTION IN THIS MANUAL
FOR DETAILED PART INFORMATION**

WARNING AND SAFETY INSTRUCTIONS

OPERATOR TRAINING

Managers, Supervisors, and Operators MUST be trained in Health and Safety Awareness of High-pressure Water Jetting and hold a copy the Water Jetting Association (WJA) Code of Practice, or equivalent (see www.waterjetting.org.uk).

Operators MUST be trained to identify and understand all applicable standards for the equipment supplied. Operators should be trained in manual handling techniques to prevent bodily injury.

StoneAge has designed and manufactured this equipment considering all hazards associated with its operation. StoneAge assessed these risks and incorporated safety features in the design. StoneAge **WILL NOT** accept responsibility for the results of misuse.

IT IS THE RESPONSIBILITY OF THE INSTALLER/OPERATOR to conduct a job specific risk assessment prior to use. Job specific risk assessment MUST be repeated for each different set up, material, and location.

The risk assessment MUST conform to the Health and Safety at Work Act 1974 and other relevant Health and Safety legislation.

PERSONAL PROTECTIVE EQUIPMENT REQUIREMENTS

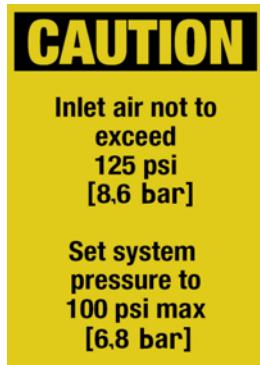

Use of Personal Protective Equipment (PPE) is dependent on the working pressure of water and the cleaning application. Managers, Supervisors, and Operators MUST carry out a job specific risk assessment to define the exact requirements for PPE. See Protective Equipment for Personnel (Section 6) of WJTA-IMCA's Recommended Practices For The Use Of High-pressure Waterjetting Equipment for additional information.

Hygiene - Operators are advised to wash thoroughly after all waterjetting operations to remove any waterblast residue which may contain traces of harmful substances.

First aid provision - users MUST be provided with suitable first aid facilities at the operation site.

SAFETY LABEL DEFINITIONS

Maximum operating air pressure is 100 psi (6.8 bar). Never exceed 125 psi (8.6 bar) supply pressure. Exceeding 125 psi (8.6 bar) supply pressure may result in injury to the Operator and/or damage to the equipment

Operators MUST read, understand, and follow the Operational and Training Requirements (Section 7.0) of WJTA-IMCA's Recommended Practices For The Use Of High-pressure Waterjetting Equipment, or equivalent.

Operators MUST read, understand, and follow the Warnings, Safety Information, Assembly, Installation, Connection, Operation, Transport, Handling, Storage, and Maintenance Instructions detailed in this manual.

The risk assessment MUST consider potential material or substance hazards including:

- Aerosols
- Biological and microbiological (viral or bacterial) agents
- Combustible materials
- Dusts
- Explosion
- Fibers
- Flammable substances
- Fluids
- Fumes
- Gases
- Mists
- Oxidizing Agents

PPE may include:

- **Eye protection:** Full face visor
- **Foot protection:** Kevlar® brand or steel toe capped, waterproof, non-slip safety boots
- **Hand protection:** Waterproof gloves
- **Ear protection:** Ear protection for a minimum of 85 dBA
- **Head protection:** Hard hat that accepts a full face visor and ear protection
- **Body protection:** Multi-layer waterproof clothing approved for waterjetting
- **Hose protection:** Hose shroud
- **Respiratory protection:** May be required; refer to job specific risk assessment

WARNING AND SAFETY INSTRUCTIONS

⚠ WARNING

Operations with this equipment can be potentially hazardous. Caution MUST be exercised prior to and during machine and water jet tool use. Please read and follow all of these instructions, in addition to the guidelines in the WJTA Recommended Practices handbook, available online at www.wjta.org. Deviating from safety instructions and recommended practices can lead to severe injury and/or death.

- Do not exceed the maximum operating pressure specified for any component in a system. The immediate work area MUST be marked off to keep out untrained persons.
- Inspect the equipment for visible signs of deterioration, damage, and improper assembly. Do not operate until repaired. Make sure all threaded connections are tight and free of leaks.
- Users of the Controller and Power Hub MUST be trained and/or experienced in the use and application of high-pressure technology and cleaning, as well as all associated safety measures, according to the WJTA Recommended Practices for the use of High-pressure Water jetting Equipment.
- The Controller and Power Hub should be located in a safe location where the operator has good visibility of the exchanger and Hose Tractor. The AUTOBOX® ABXS-3L MUST be supervised at all times and should never be left unattended.
- Do not fully release the hose clamp (decreasing pressure to zero) during operation, or the ABXS-3L Hose Tractor will release the hose and may create a dangerous runaway hose condition, which can result in severe injury and/or death.
- Always de-energize the system before performing service or replacing any parts. Failure to do so can result in severe injury and/or death.
- When moving any components within the ABXS-3L and Control System, lift with care to prevent bodily injury.

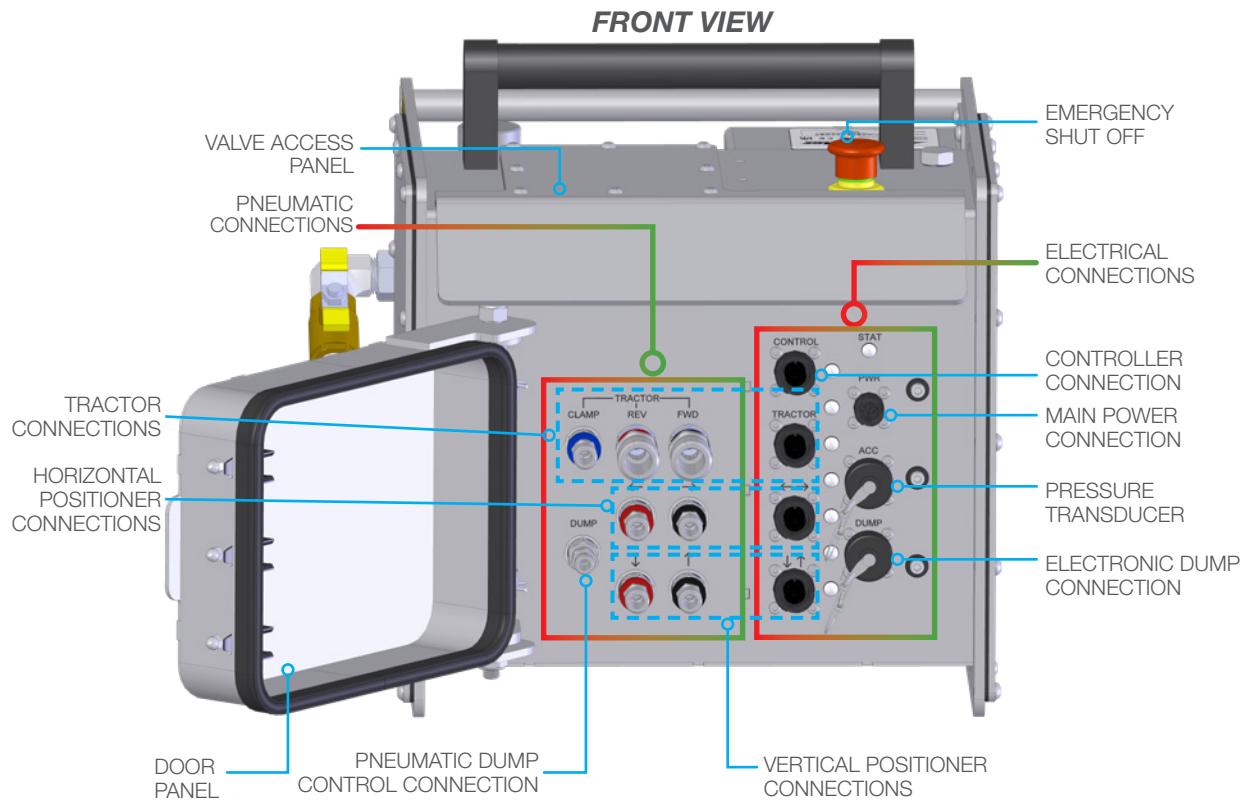

PRE-RUN SAFETY CHECK

Refer to WJTA-IMCA's, Recommended Practices For The Use Of High-pressure Water jetting Equipment and/or The Water Jetting Association's, WJA Code of Practice for additional safety information.

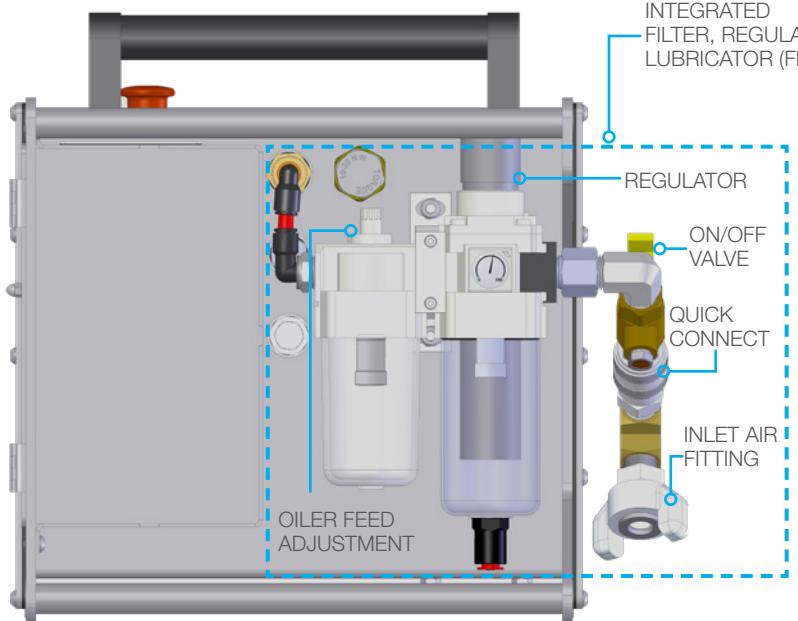

- Complete a job specific risk assessment and act on the resulting actions.
- Ensure the waterblasting zone is properly barricaded and that warning signs are posted.
- Adhere to all site safety procedures.
- Ensure no personnel are in the waterblasting zone.
- Ensure the work place is free of unnecessary objects (e.g. loose parts, hoses, tools).
- Ensure all operators are using the correct Personal Protective Equipment (PPE).
- Ensure that an anti-withdrawal device (back-out preventer), whip checks (hose whips), and all other applicable safety devices are installed and set-up properly.
- Check that the air hoses are properly connected and tight.
- Check all hoses and accessories for damage prior to use. Do not use damaged items. Only high quality hoses intended for waterblast applications should be used as high-pressure hoses.
- Ensure that operators never connect, disconnect, or tighten hoses, adapters, or accessories with the high-pressure water pump unit running.
- Test the Control Box before operating with high-pressure water to verify the control valves move the hose in the intended direction, and that the dump valve is working properly.
- Check all threaded air fitting connections for tightness.

POWER HUB - OVERVIEW

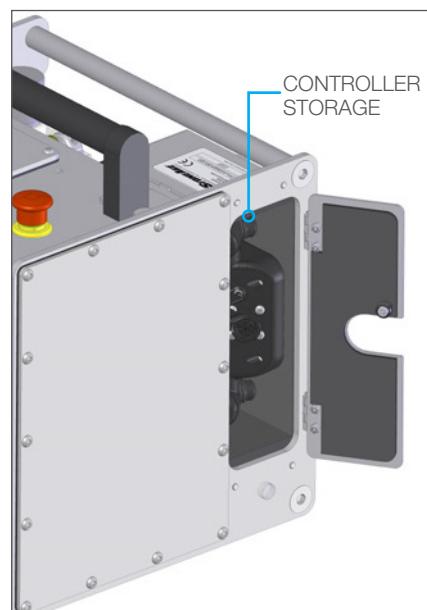

**POWER HUB (PH-A0302A00C20)
FUNCTION OVERVIEW**
(NOT INCLUDED WITH ABXS-3L TRACTOR)

BACK VIEW

SIDE VIEW

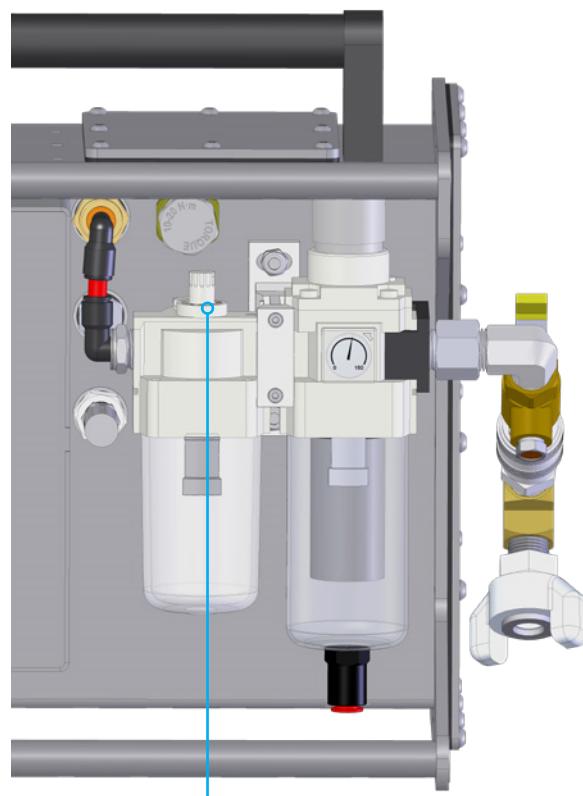

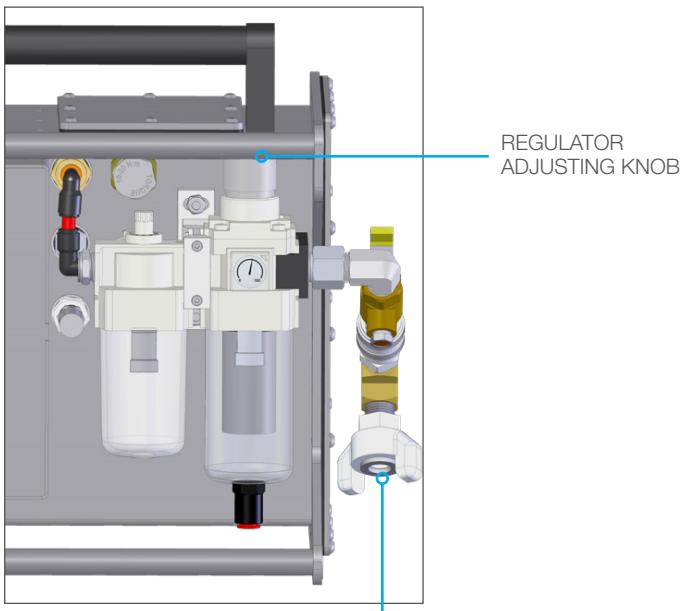

AIR SUPPLY AND LUBRICATOR SETTING

- The Controller is supplied with a twist claw style inlet coupling (Chicago style) located on the side of the FRL Assembly. Connect a compatible compressed air line (not included) according to the Manufacturer's instructions.
- Using the regulator adjust the operating air pressure to 100 psi (6,8 bar) for the application.

WARNING

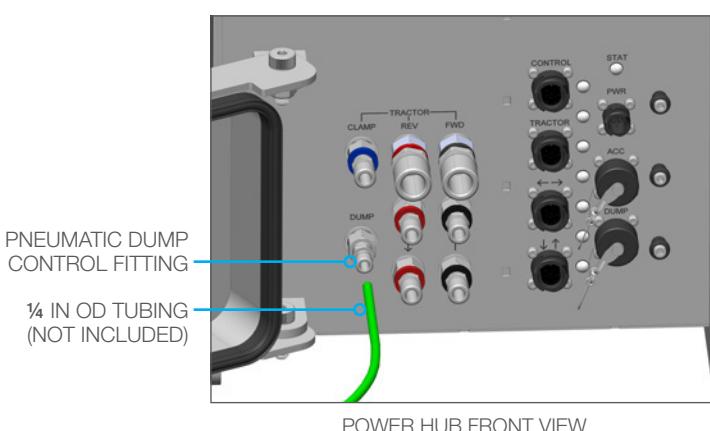

Maximum operating air pressure is 100 psi (6,8 bar). Never exceed 125 psi (8,6 bar) supply pressure. Exceeding 125 psi (8,6 bar) supply pressure may result in injury to the Operator and/or damage to the equipment.

**AIR SUPPLY FITTING**

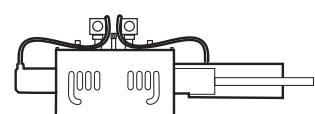

A universal **AIR SUPPLY FITTING** (Chicago style) is located on the FRL. Connect a compatible compressed air line (not included) according to the Manufacturer's instructions.

PNEUMATIC DUMP CONTROL FITTING AND LINE

A **MOMENTARY PNEUMATIC DUMP CONTROL** is located on the Controller panel and can be set up to control an air actuated dump valve. To utilize the toggle, the end user will need to install 1/4 in. O.D. tubing (not included) between the **PNEUMATIC DUMP CONTROL FITTING** and the pneumatic dump valve.

UPDATING THE CONTROLLER FIRMWARE AND LOG UPLOAD

UPDATING THE CONTROLLER FIRMWARE

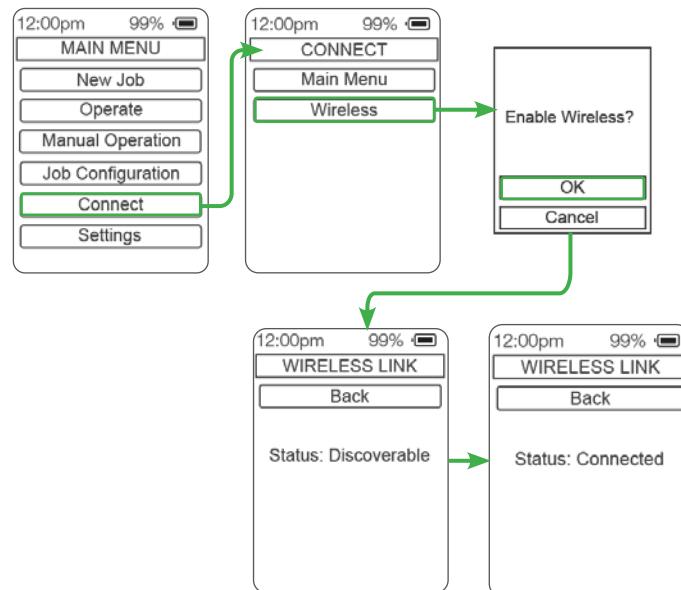

1. Ensure the **iPod touch®** is connected to the Internet.
2. Sign in on the **iPod touch®**

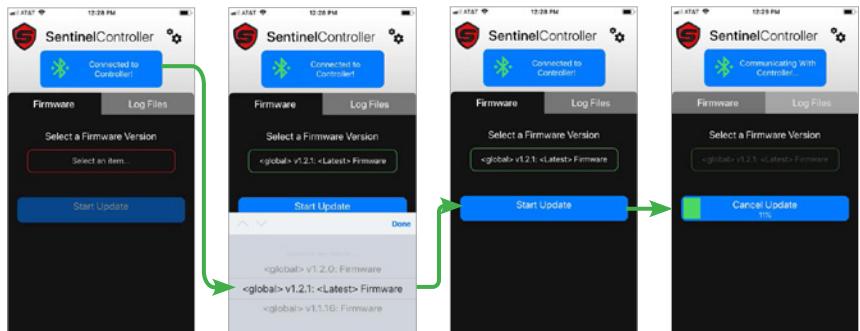

3. Turn on the Sentinel Controller
4. From the **Main Menu**, using the left joystick, scroll down and select **Connect**.
5. Select **Wireless** from the **Connect** menu.
6. Click **OK** on the **Enable Wireless?** pop-up.

If your Controller now says **Status: Discoverable**, the Controller is ready to connect to the **iPod touch®**.

When the Controller says **Status: Connected**, it is connected to the **iPod touch®**.

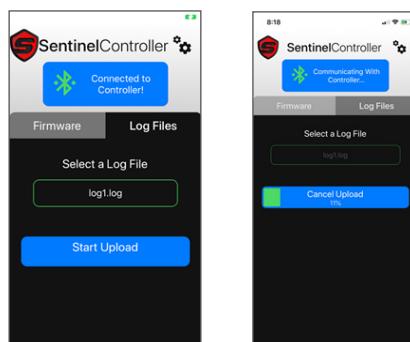

7. On the **iPod touch®**, click **Connect to Controller** button. The screen will say **Connecting** then **Connected**. The Bluetooth logo will turn green.
8. Select the latest **Firmware version** and **Start Update**
9. When the update is complete, the Controller will restart and then it will be available for use with the new firmware.

LOG UPLOADING

1. To begin, connect the controller to the ios device as shown in the Firmware Upgrade section.
2. Tap on the 'Log Files' tab.
3. Select a log file from the drop down.
4. Tap 'Start Upload'. A progress bar will appear. When the log successfully uploads, it will be removed from the controller. You may now view the visualized Job Log on Sentinel Link!

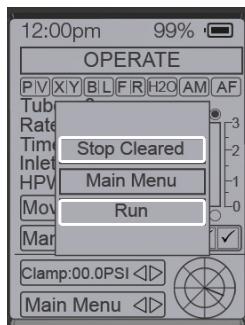

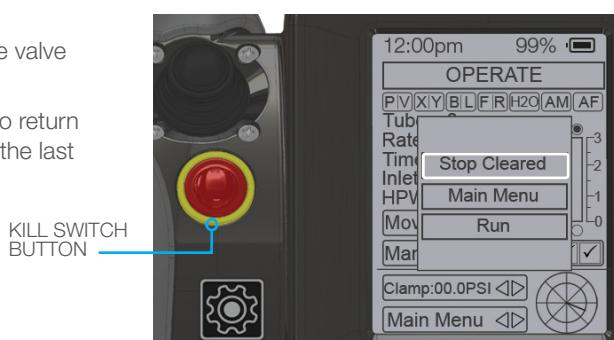

iPod touch® is a trademark of Apple Inc., registered in the U.S. and other countries

OPERATION

SAFETY FEATURE

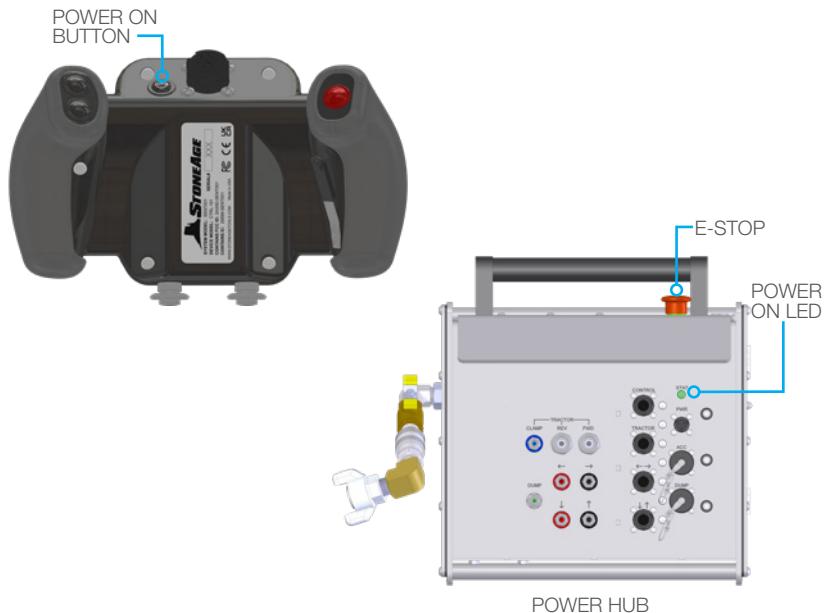

1. The KILL SWITCH directly cuts power to the valve pack in the Power Hub.
2. Use the center button on the Left Joystick to return to the main menu, or select Run to resume the last operation.

POWERING ON

These instructions assume that all connections have been made between the Power Hub, Lightweight Positioner, Autobox Tractor, and Hand Held Controller. It also assumes that the Power Hub has been plugged in and it has been hooked up to an air supply. The Power Hub can be connected to US and European power (50-60Hz 90-260vac) with AC supply or 10-14 VDC with the DC power supply. Connect directly to a battery on the pump or air compressor.

1. Release the E-STOP on the Power Hub.
2. Look for the LED power lights to come on to verify the Power Hub is operational.
3. Press the ON Button on the Controller.
4. The StoneAge logo will appear then change to the MAIN MENU.

MAIN MENU

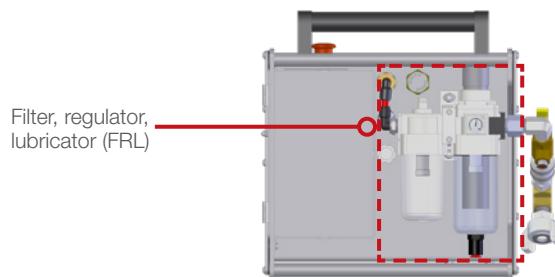

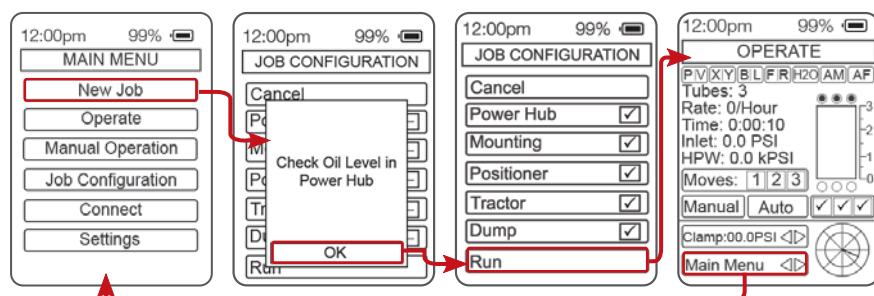

- The MAIN MENU will come up first. From the MAIN MENU, you can select any of the sub menus with the left Joystick, by scrolling and pressing down on the Joystick. This will ask you to verify the Lubricant Level in the Power Hub.
- **New Job** assumes the **Job Configuration task list** has been completed.
- **Operate** will take the user directly into operation mode and assumes the **Job Configuration task list** has been completed.
- **Job Configuration** is the menu that allows the user to set up and test the system components prior to operation.
- **Connect** allows a bluetooth connection for updating the Firmware of the unit.
- **Settings** is the menu for user preferences; Back light, Contrast, Language, Units of measure, Date/ Time, Hour Format.

NEW JOB

From the Main Menu select **New Job**. The following instruction assumes that the **Job Configuration** has been completed. The **Job Configuration** is complete when all tests have been completed and the boxes all have check marks. If any of the boxes have a dash mark, it indicates that the set-up for that item has been skipped/unfinished. If the **Job Configuration** has not been completed, skip ahead to the **Job Configuration** section for a complete instruction.

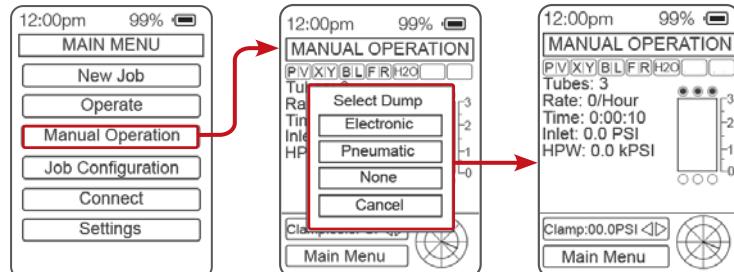

1. Select **New Job** and the “Check Oil Level in Power Hub” pop-up will come up to remind the user to check the lubricant level in FRL (Filter, Regulator, Lubricator) on the Power Hub before every job.
2. Clicking **OK** on the pop-up, returns to the **Job Configuration** screen.
3. Selecting **Run** on the **Job Configuration** screen takes the user to the **Operate** screen.

MANUAL OPERATION

Manual Operation will allow the user to run the system in full manual mode. There are no automatic functions on the screen as on the **Operate** screen. This is useful when not using the Sentinel Sensors.

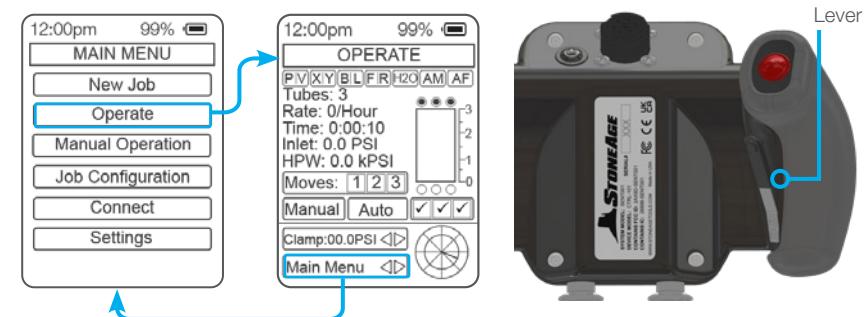

1. Select the type of dump or none and the **Manual Operation** screen will come up. See the screen descriptions in the **Operate** section below.

OPERATE

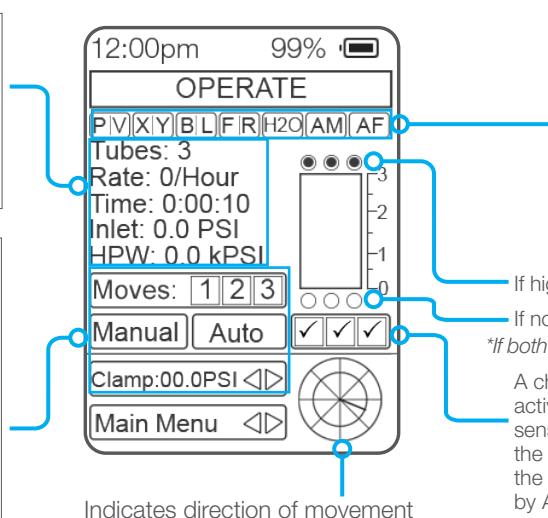

Operate is the main interface that the Operator will use to run the system

1. The **Operate** screen can be accessed from the **Main Menu** or from **Run** at the bottom of **Job Configuration** or **Tractor** screen.
2. Use the left joystick to scroll to then push it down to select and deselect.
3. The **Automation Lever** on the back of the Controller must be held in to operate the system.

Tubes = How many have been cleaned
Rate = Tubes cleaned per hour
Time = How long the job has been running
Inlet = Air Pressure
HPW = High Pressure Water Transducer

Moves = Quantity of tubes moved in an automatic move
Manual = Allows user to move lances and positioner manually
Auto = Moves selected amount of tubes. Nudging the right joystick will allow the Operator to make micro moves in any direction.
Clamp = Amount of downward pressure placed on the hoses inside the tractor

Indicates direction of movement

PV= Power Hub/Valve
XY= X Positioner/Y Positioner
BL= Belt/Lance
FR= Forward/Reverse
H2O= Water

AM= AutoMove

AF= AutoFeed

*If the indicator box is blank, check the connections.

If highlighted, Lances are retracted

If not highlighted, Lances are in the tubes
*If both are not highlighted, Lances are in the tubes

A check mark indicates the stop sensor is active. If there is an "X" in the box, the stop sensor is inactive. The Operator may disable the lance by unchecking a box in the case that the lance is blocked. The lance will be ignored by AutoStroke and allow the other lances to proceed normally.

OPERATION

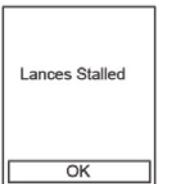

OPERATION

The CLAMP function controls the drive belt traction. It is recommended to operate the clamp pressure as low as possible without excessive slippage. Optimal clamp pressure is achieved when the Drive Belt slips at a slow rate of speed after hitting the hose stops (forward) or the Collet engages the hose crimp (reverse). It is recommended to use hoses supplied with the secondary crimp so the (anti-withdrawal protection) Collet does not impact.

CLAMP PRESSURE MUST NOT EXCEED;
100 PSI for 3 Hoses, 66 PSI for 2 Hoses, and 33 PSI for 1 Hose

1. Hold the **Automation Lever** in and use the left Joystick to set the Clamp PSI.
2. In **Manual** mode, center on the first set of tubes to be cleaned, select the number of **Moves**, then select **Auto** mode.
3. Hold the **Automation Lever** in and test the **High Pressure water On/OFF** button
4. Press the **Tractor Forward** button to feed the lances into the first 3 tubes.
5. Withdraw the lances by using the **Tractor Reverse** button. This will record 3 tubes in the "Tube Count."
6. Tap the right Joystick in the direction of the next tubes to be cleaned and it will automatically advance the number of "Moves" selected on the screen.
7. Continue to move 3 and clean 3 until either the end of the row is reached or there is a different number of moves left to complete the row. If there is a different number of moves, as in this case. Change the **Moves** to the number that is needed to complete the row. In this case, it is 2.
8. Tap the right Joystick to the last tubes and finish cleaning the row.
9. Tap the right Joystick up or down to move to a new row of the tubes. The positioner will automatically move up, down, or diagonal by the same Pitch that it moved in the horizontal direction.
10. For the triangle pattern, tap the joystick up or down in the diagonal direction and straight up and down for square.
11. Repeat the horizontal row cleaning method until complete.

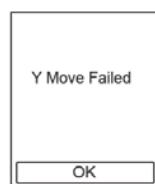

Potential Warning Pop up Screens

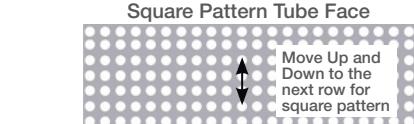

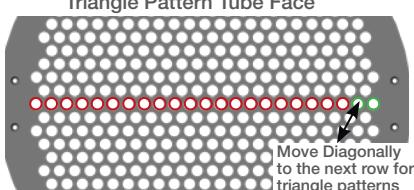

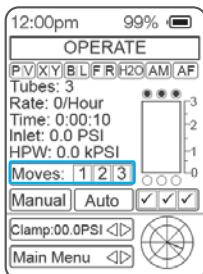

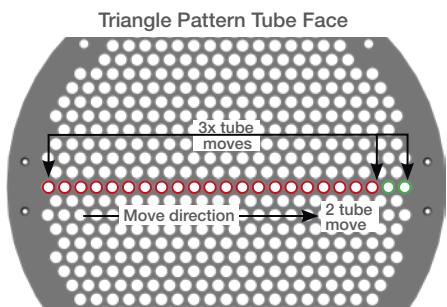

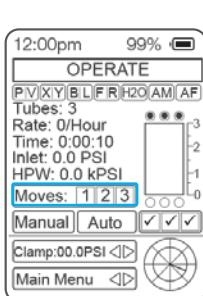

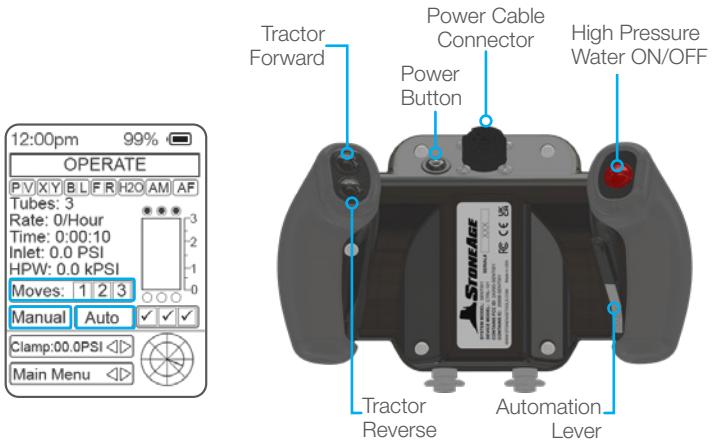

Lances are hitting an obstruction

X Carriage has hit a rail stop

Y Carriage has hit a rail stop

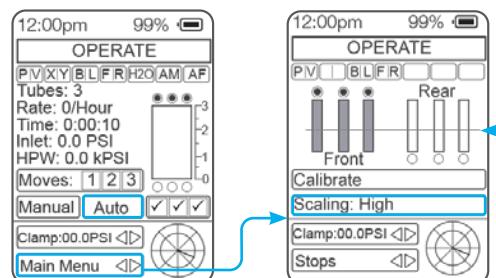

***OPTIONAL SCALING FUNCTION**

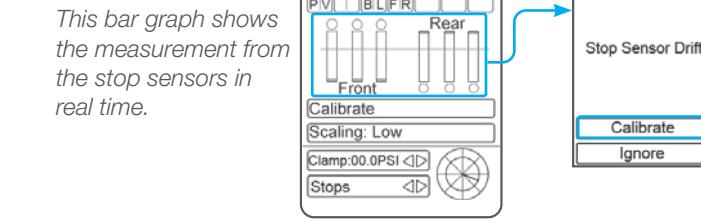

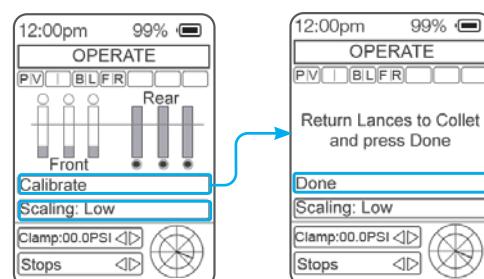

The Scaling function is a preset based on the temperature of the high pressure water. **High** is the default and allows for a larger signal change before the sensors actuate. This can be helpful if the system experiences larger temperature swings due to heated water or recirculated supply water. The **Low** setting may be helpful if the sensors are recalibrated while they are hot, or for troubleshooting. Both High and Low settings function the same, with the exception of the threshold value at which the system is triggered and adjusted.

1. From the **Operate** screen, select the **Auto** function.
2. To get to the **Scaling** menu option, from the **Operate** screen, scroll down to the **Main Menu** button at the bottom and nudge the left joystick to the left or right.
3. Another **Operate** screen will appear. Scroll down to **Scaling** and chose **High** or **Low** based on the high pressure water temperature.
4. The **Calibrate** option will allow for recalibrating the stop sensors from the **Operate** Screen. Press Done when completed to return to **Operate**.
5. The “Stop Sensor Drift” message will appear when the solid bars start to reach the ends of the rectangles. Selecting **Calibrate** will return to the Operate screen and instruct to “Return the Lances to Collet and Press Done”. This will clear the error message. The Operator may also chose **Ignore** and keep running.

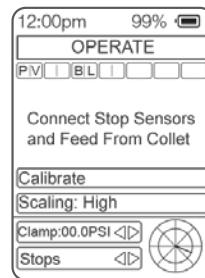

This bar graph shows the measurement from the stop sensors in real time.

Scaling button moves the line up for **Low** or down for **High** ranges.

6. If the Stop Sensors have become disconnected, the “Connect Stop Sensors and Feed From Collet” message will come up.

7. The “Stop Sensor Failure” message will appear when a stop sensor fails to function. The Operator may chose **Disable** to clear the message and continue with a non functioning stop sensor or chose **Ignore - 1hr** and keep running.

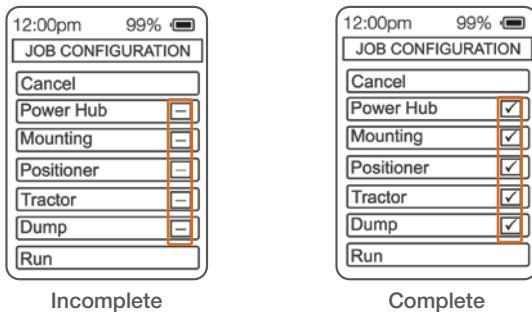

OPERATION

JOB CONFIGURATION

Job Configuration is the base menu for setting job parameters and testing each segment of the system.

The boxes on the right side of **Job Configuration** have a dash mark that indicates that the set-up for that item has been skipped/unfinished. **Job Configuration** is complete when all boxes have check marks.

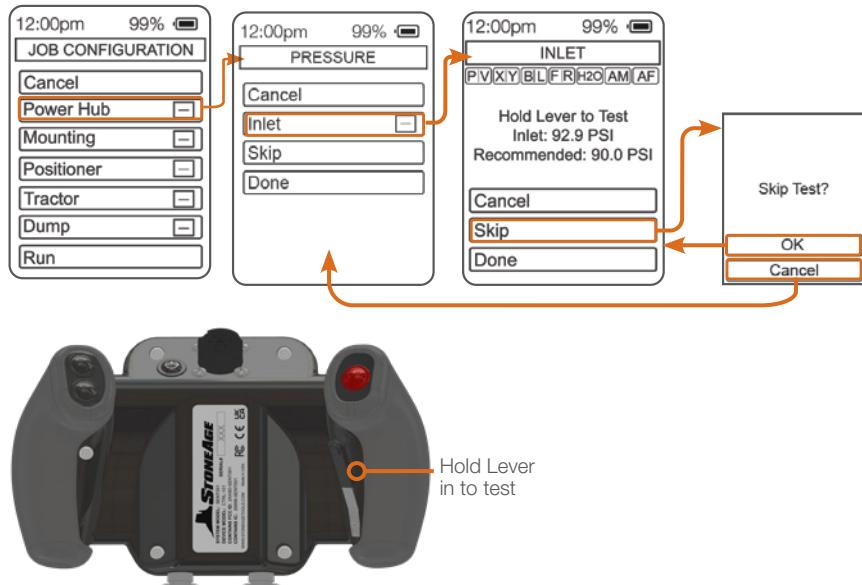

The following instructions will go through each configuration task in the **Job Configuration** menu in consecutive order.

*A Skipped Test =
a complete task or ✓

JOB CONFIGURATION - POWER HUB

1. **Power Hub** tests the system for recommended inlet pressure.
2. Use the left joystick to scroll to Power Hub, then push down on it to select.
3. Scroll down and select Inlet.
4. Hold the Automation Lever in to test and select Done when the test is complete to return to the Job Configuration screen.
5. If the Operator selects Skip on any system test, the Skip Tasks screen will pop up. Click OK will return to the Job Configuration screen. A dash mark will remain in the box to the right of Power Hub. This is the process for any of the tests that are skipped/unfinished.
6. Scroll down to the next selection to continue Job Configuration setup.

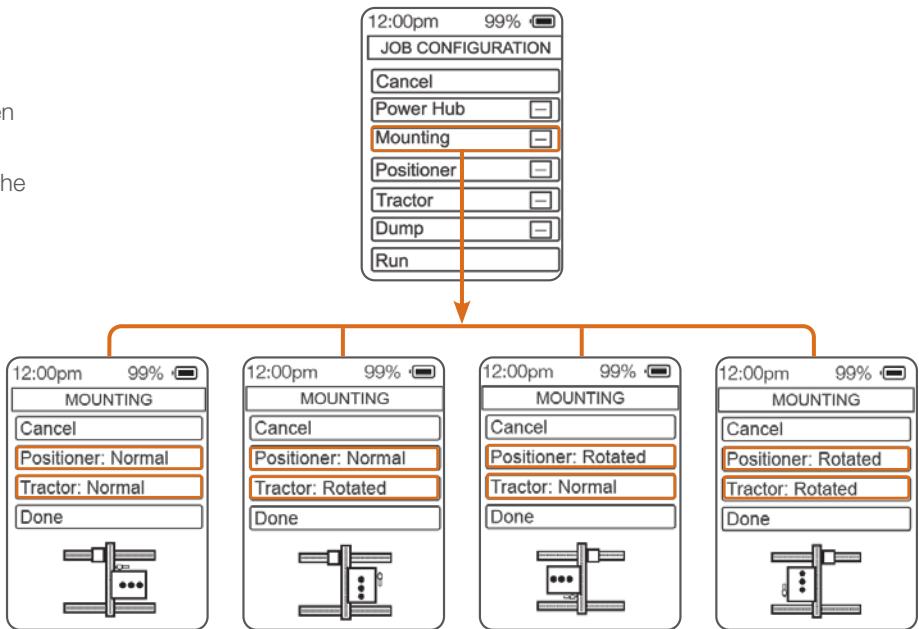

JOB CONFIGURATION - MOUNTING

The **Mounting** setup screen configures both the Tractor and Positioner mounting positions. See the table for possible mounting combinations.

1. Use the left joystick to scroll to **Mounting**, then push down on it to select.
2. Scroll down and select **Positioner**, then use the left joystick to select **Normal** or **Rotated**.
3. Repeat the process to select the **Tractor** position.
4. When the **Positioner** and **Tractor** have been set, select **Done** to return to the **Job Configuration** menu.

Mounting Configurations	
Positioner	Tractor
Normal	Normal
Normal	Rotated
Rotated	Normal
Rotated	Rotated

JOB CONFIGURATION - DETERMINE PITCH AND PATTERN

(DO THIS BEFORE CONFIGURING THE AUTOMOVE FUNCTION)

Before operating the Sentinel System, the operator needs a measurement of the tube pitch and a determination tube pattern type (triangle or square). This is required to properly set up the AutoMove function.

1. To manually measure the tube pitch we recommend the use of digital calipers for the most accurate measurement. The use of a tape measure or ruler will also work.
2. There are a variety of ways to measure pitch;
3. Measure two tubes Center to Center or Edge to Edge. The example to the right would be 1.5 inches.
4. For higher precision;
5. Measure across full row of tubes (or choose ten or whatever)
6. Count the number of tubes
7. Divide the Measurement by the number of tubes – 1
8. Length/(Number of Tubes -1) = Pitch
9. The more samples that are taken and averaged, the more precise the Pitch measurement.
10. The tube patterns on the diagrams to the right are indicated in blue. The Square and Triangle are shown but there are also Rotated Square and Rotated Triangle patterns to choose from. See the pattern chart on the next page for a complete list of pattern options.

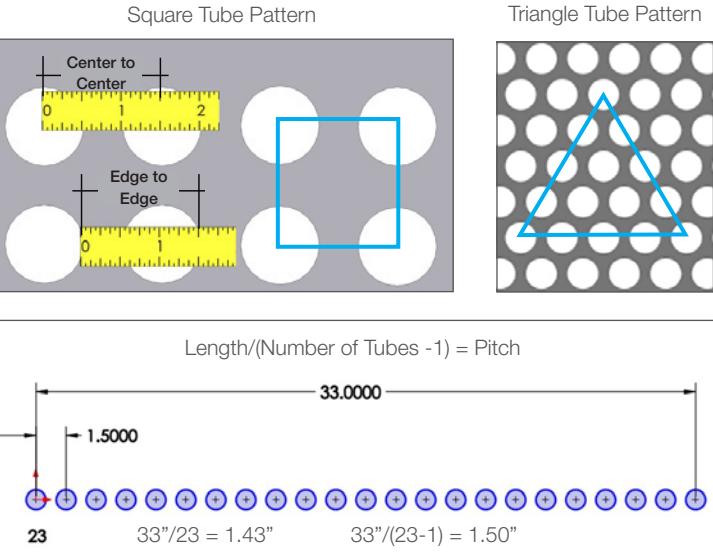

JOB CONFIGURATION - POSITIONER

The **Positioner** setup menu displays the following functions;

- Disable Positioner sensors
- Test the Positioner Carriages
- Calibration of the X/Y movement
- AutoMove setup for pitch and tube patterns

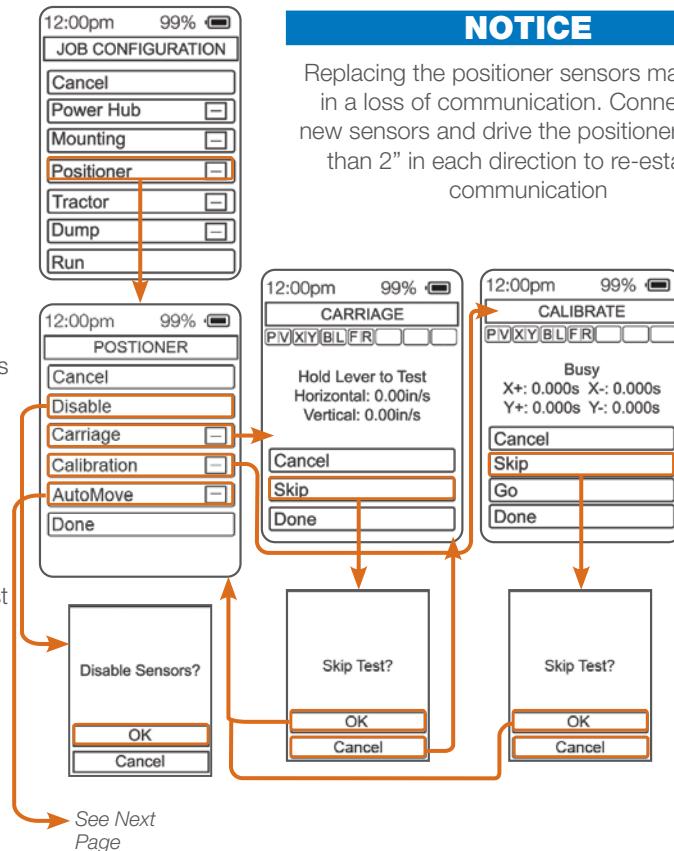

If the Operator selects **Skip** on any system test, the Unfinished Tasks screen will pop up. Clicking **OK** will return to the **Positioner** screen. A dash mark will remain in the box to the right of skipped item indicating that it has not been tested. This is the process for any of the tests that are skipped/unfinished.

1. If the Operator chooses **Disable**, the Positioner sensors will be turned off.
2. To test the Carriage, use the left joystick to scroll to **Carriage**, then push down on it to select. Hold the Automation Lever and move horizontally then vertically to test. Select **Done** when the test is complete. To skip the test and leave the task unfinished, select **Skip** and select **Ok**, the select **Ok** on the Unfinished Task pop up.
3. Scroll down and select **Calibration**. Hold the Automation Lever in and select **Go** to test. Select **Done** when the test is complete. To skip the test and leave the task unfinished, select **Skip** and select **Ok**, the select **Ok** on the Unfinished Task pop up.

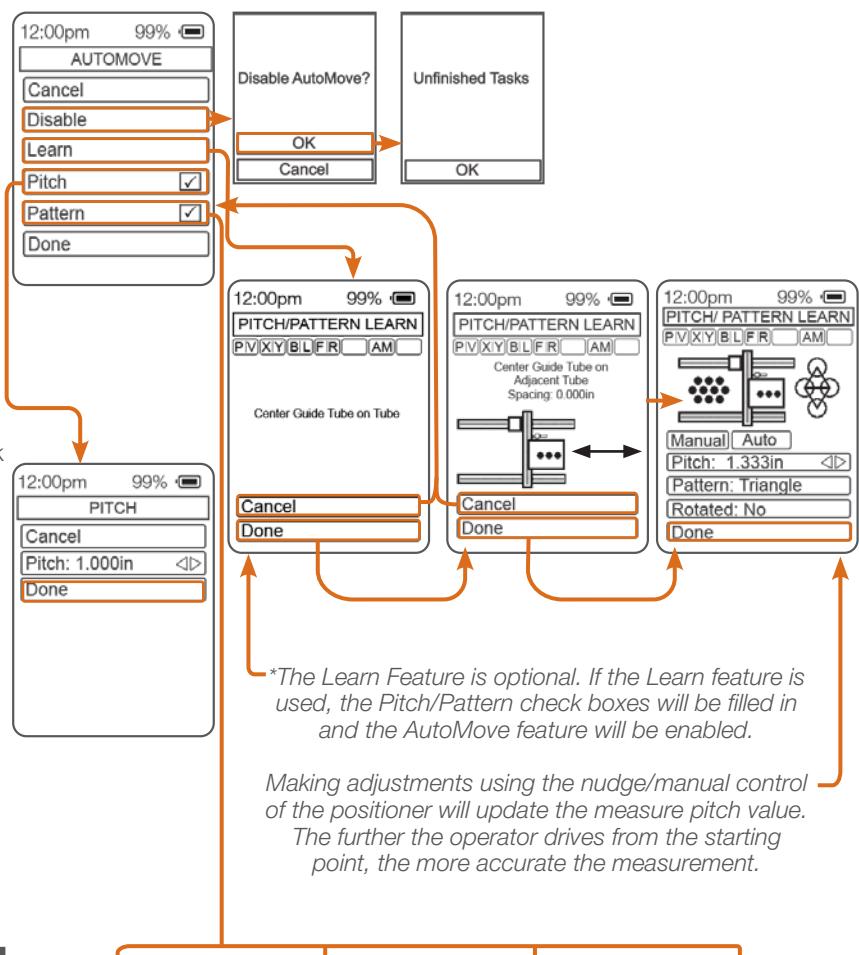

NOTICE

Replacing the positioner sensors may result in a loss of communication. Connect the new sensors and drive the positioner greater than 2" in each direction to re-establish communication

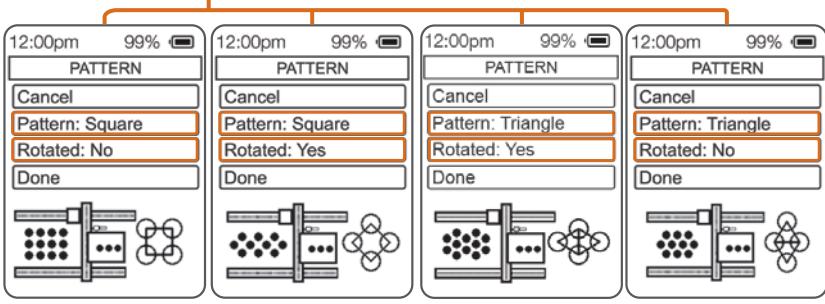

OPERATION

4. From the **Positioner** screen, select **AutoMove**. If the Operator chooses **Disable**, AutoMove will be turned off.
5. **Learn** will allow the user measure the Pitch using the Controller. Select **Learn** from the **AutoMove** screen and follow the instruction to “Center Guide Tube on Tube”. Click **Done** to move to the next screen. Follow the instruction to “Center Guide Tube on and Adjacent Tube”. A measurement will come up in “Spacing”. Click **Done** to move to the next screen. From here select **Manual** or **Auto** and check to make sure the selected Pattern and Rotation match the exchanger to be cleaned.
6. **Pitch** allows the user to manually enter the Pitch measurement described on the previous page. Click on Pitch and move the left joystick side to side to increase or reduce the number, then click **Done** to return to the **AutoMove** menu.
7. **Pattern** allows the user to manually enter the Pattern. Move the left joystick side to side to select Square or Triangle, then scroll down to select Rotated Yes or No. Select **Done** to return to the **AutoMove** menu.
8. When the **Pitch** and **Pattern** have been set, select **Done** to return to the **AutoMove** menu and select **Done** again to return to the **Positioner** menu.
9. If all settings in the **Positioner** menu are complete, select **Done** to return to the **Job Configuration** screen to begin the **Tractor** configuration.

Pattern Configurations				
Pattern	Square	Square	Triangle	Triangle
Rotated	No	Yes	Yes	No
Screen Icon				

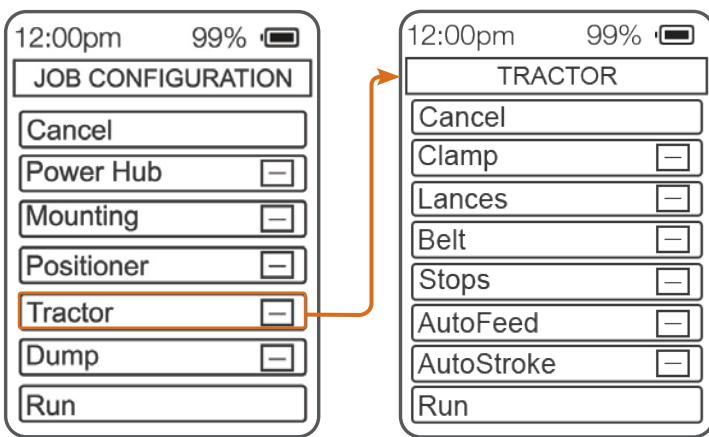

JOB CONFIGURATION - TRACTOR

The **Tractor** setup menu displays the following functions:

- Clamp pressure testing
- Number of Lances
- Belt feed speed testing and clamp pressure setting
- Hose Stop sensor testing and calibration
- AutoFeed enable/disable
- AutoStroke enable/disable and preference settings

If the Operator selects **Skip** on any system test, the Unfinished Tasks screen will pop up. Clicking **OK** will return to the **Tractor** screen. A dash mark will remain in the box to the right of skipped item indicating that it has not been tested. This is the process for any of the tests that are skipped/unfinished.

JOB CONFIGURATION - TRACTOR CONTINUED...

The **Tractor** setup menu displays the following functions:

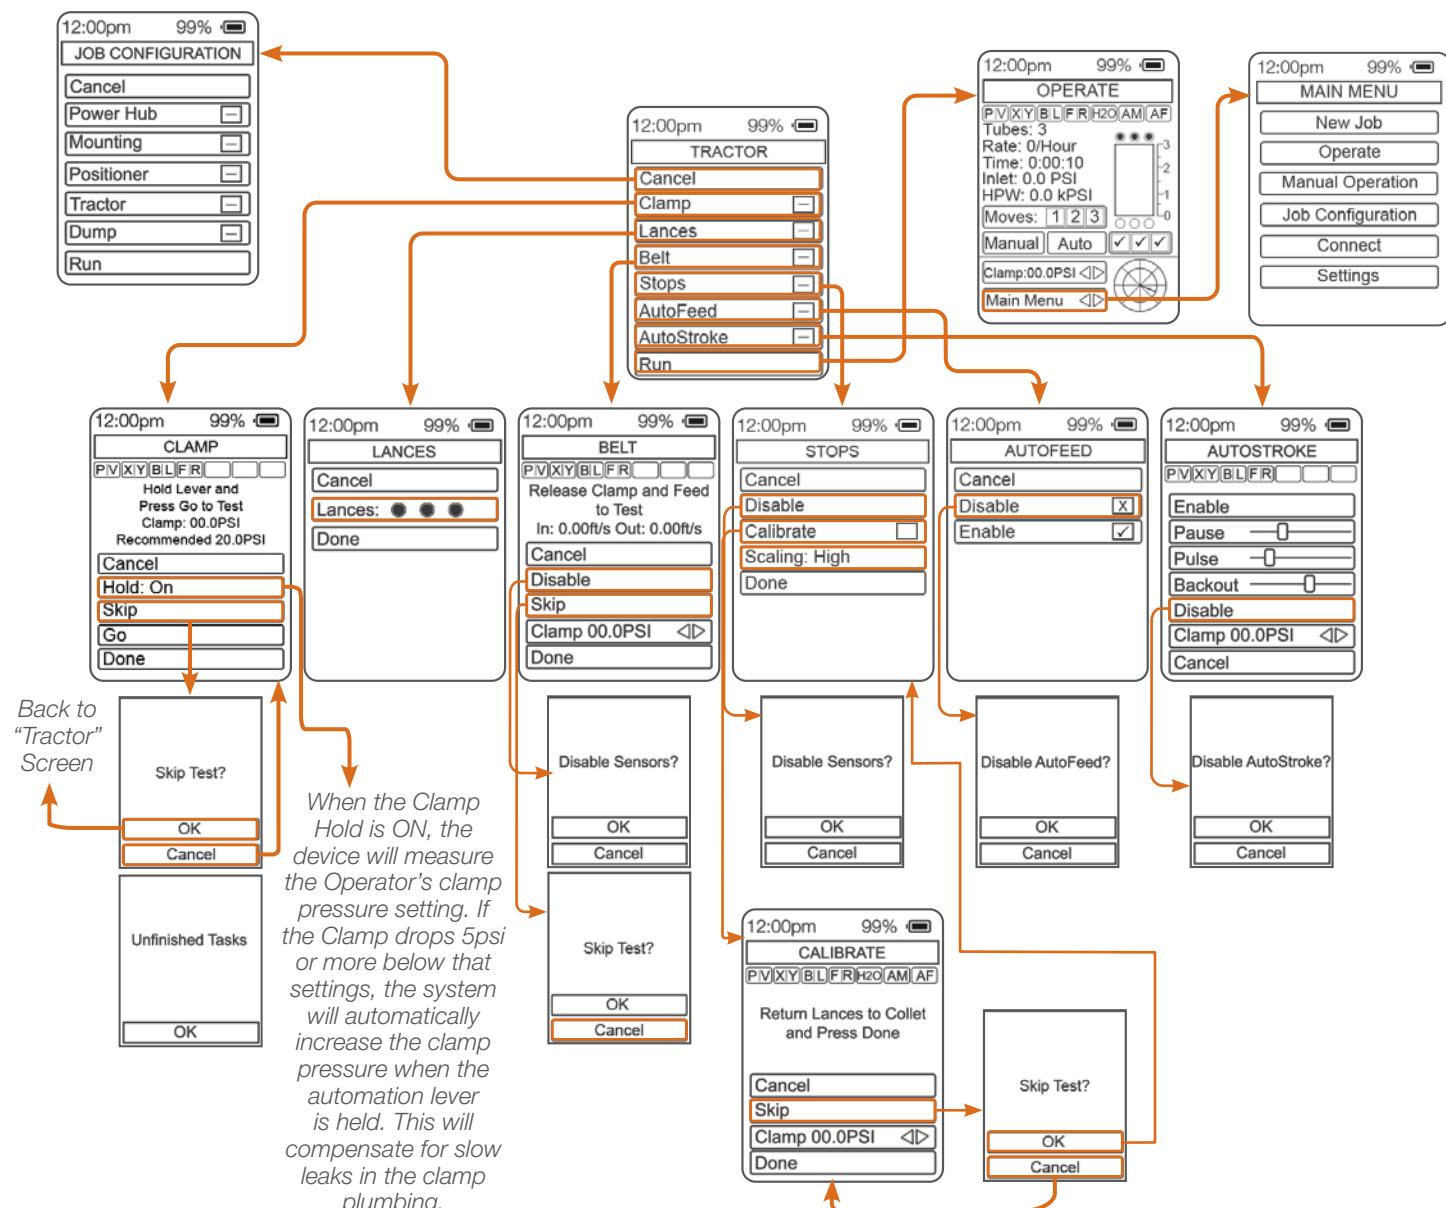

- Clamp pressure testing
- Number of Lances
- Belt feed speed testing and clamp pressure setting
- Hose Stop sensor testing and calibration
- AutoFeed enable/disable
- AutoStroke enable/disable and preference settings

If the Operator selects **Skip** or **Disable** on any system test, the Unfinished Tasks screen will pop up. Clicking **OK** or **Done** will return to the **Tractor** menu. A dash mark will remain in the box to the right of skipped or disabled item indicating that it has not been tested or enabled. This is the process for any of the tests that are skipped/unfinished.

Work down the Tractor menu until all tests are complete. Each test screen will instruct the Operator as to how perform the test.

CLAMP PRESSURE MUST NOT EXCEED;
100 PSI for 3 Hoses, 66 PSI for 2 Hoses, and 33 PSI for 1 Hose

Selecting **Run** will take the Operator to the **Operate** screen.
Selecting **Cancel** will return to the **Job Configuration** menu.

**Clicking "Run" without running tests =
"Unfinished Tasks"

OPERATION

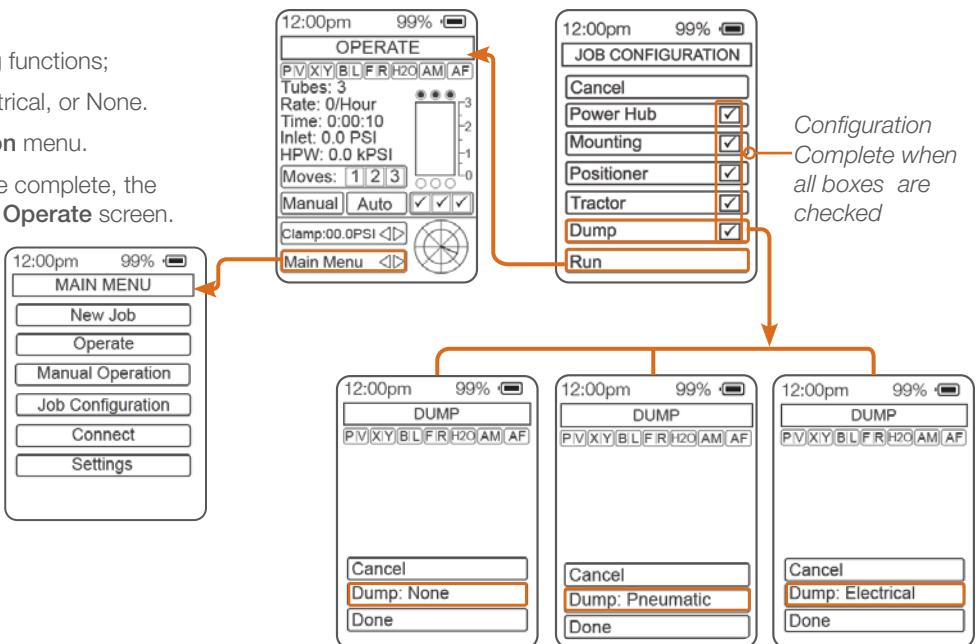

JOB CONFIGURATION - DUMP

The Dump setup menu displays the following functions;

- Select type of dump, Pneumatic, Electrical, or None.

Click **Done** to return to the **Job Configuration** menu.

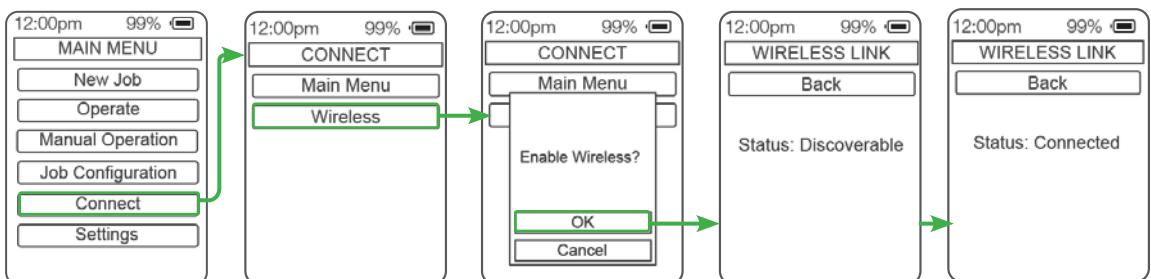

If all tasks in the **Job Configuration** menu are complete, the Operator can select **Run** to go directly to the **Operate** screen.

CONNECT

The **Connect** menu allows the user to turn on the wireless function on the Controller and allow the unit to be discoverable.

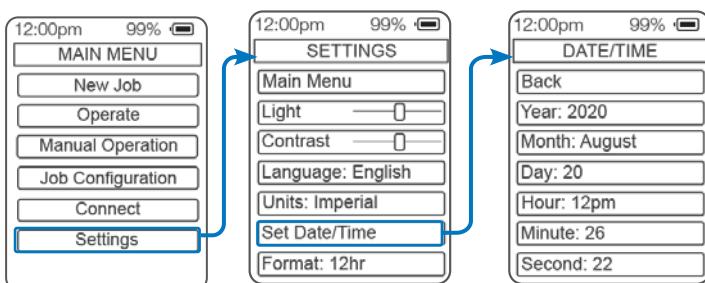

This function is used when updating Firmware. See “Firmware Update Instructions” for more information.

SETTINGS

Settings is the menu that allows the Operator to set up user preferences;

- Back light
- Contrast
- Language
- Units of measure
- Date/Time
- Hour Format

CONTROLLER AND POWER HUB MAINTENANCE

Maintenance Item	Frequency	Maintenance Required
POWER HUB Lubricant level of Filter Regulator, Lubricator	Before and After EVER 8 HOURS OF USE	Use SAE#10 or ISO VG32 Tool Oil (StoneAge Part Number GP 041). Using oils that are not intended for air tool systems may cause malfunction and/or component damage. <i>The oil level should never be below end of tube inside the bowl</i>
POWER HUB Lubricant level of Filter Regulator, Lubricator	Cessation of oil dripping through the sight dome	If both air and oil are kept clean, and the oil level is never allowed below end of tube in the bowl, the lubricator should provide long periods of unattended service. Cessation of oil dripping through the sight dome, irrespective of knob adjustment, is an indication that cleaning is necessary. To clean, it is not necessary to remove lubricator from the line. De-pressurize and disassemble. In most instances, cleaning is needed only in the oil metering area. Pull off adjusting knob, unscrew sight dome assembly, remove inner drip spout and clean with household soap. PLASTIC BOWLS AND SIGHT DOME MUST BE CLEANED WITH HOUSEHOLD SOAP ONLY.
POWER HUB Lubricant level of Filter Regulator, Lubricator	Intermittent Adjustments	The adjustment knob is factory set so that, when turned fully clockwise, no oil is delivered to the venturi for atomization, and the equipment is not being lubricated. To adjust the oil drip rate, turn on the air, start flow and set knob to obtain the desired drip rate, which is visible through the sight dome. As a start, one to two drops per minute is suggested, correct lubrication is a matter of experience and demand. Clockwise rotation of knob decreases oil feed rate. To check lubrication, hold thumbnail or a mirror near the equipment exhaust. A heavy film indicates over-lubrication and the drip rate should be reduced by turning knob to a lower setting.
CONTROLLER Battery	Every 6 months	Charge the battery every 6 months to prevent battery damage.
CONTROLLER Buttons and Joysticks	When damaged	Return to StoneAge dealer for replacement.
CONTROLLER Error messages or Pop Ups	As needed	See the back of the Controller Map Insert in the Sentinel Binder for more information
ALL ELECTRONIC SYSTEM COMPONENTS	Always	DO NOT SPRAY CONTROLLER OR ANY ELECTRONIC COMPONENTS. MAKE SURE ALL DUST CAPS ARE IN PLACE AND ELECTRICAL SENSOR CONNECTIONS ARE TIGHT PRIOR TO CLEANING.

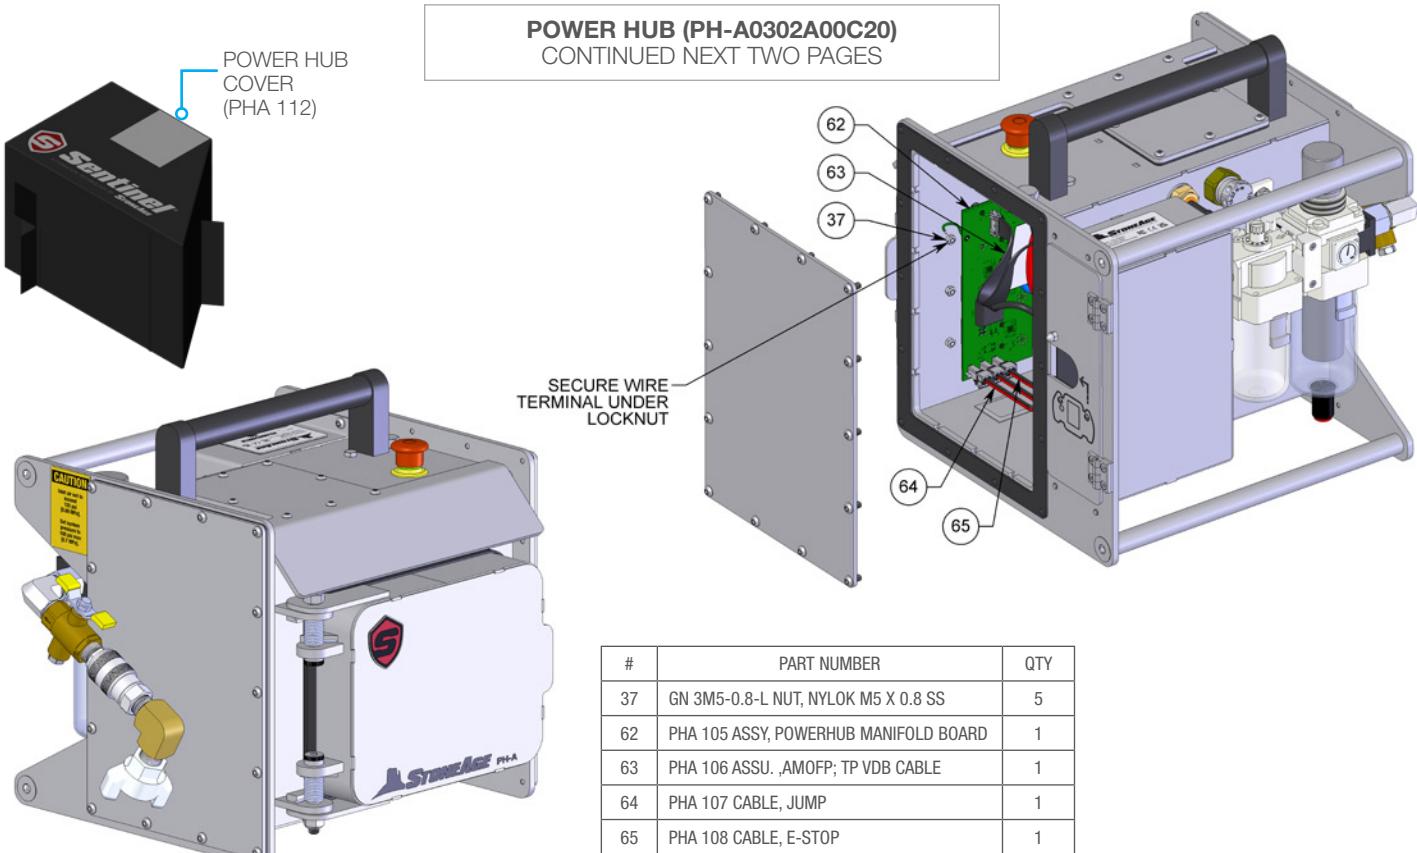

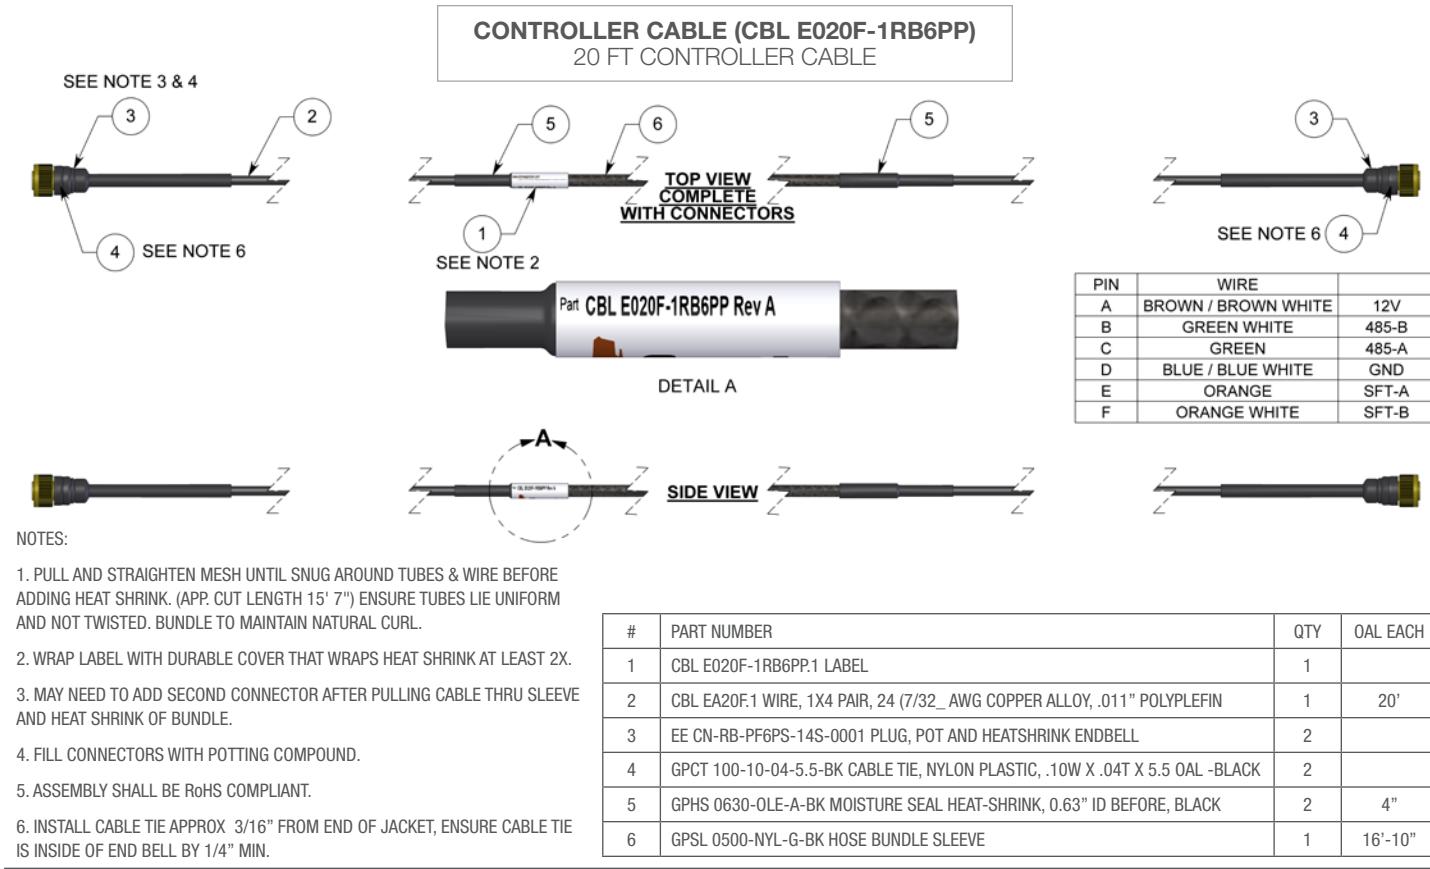

Contact StoneAge for Safety Data Sheets for material usage, a complete list of spare part numbers, and service instructions for the POWER HUB (PH-A0302A00C20) and Controller (CTRL-101)

STORAGE, TRANSPORTATION, AND HANDLING

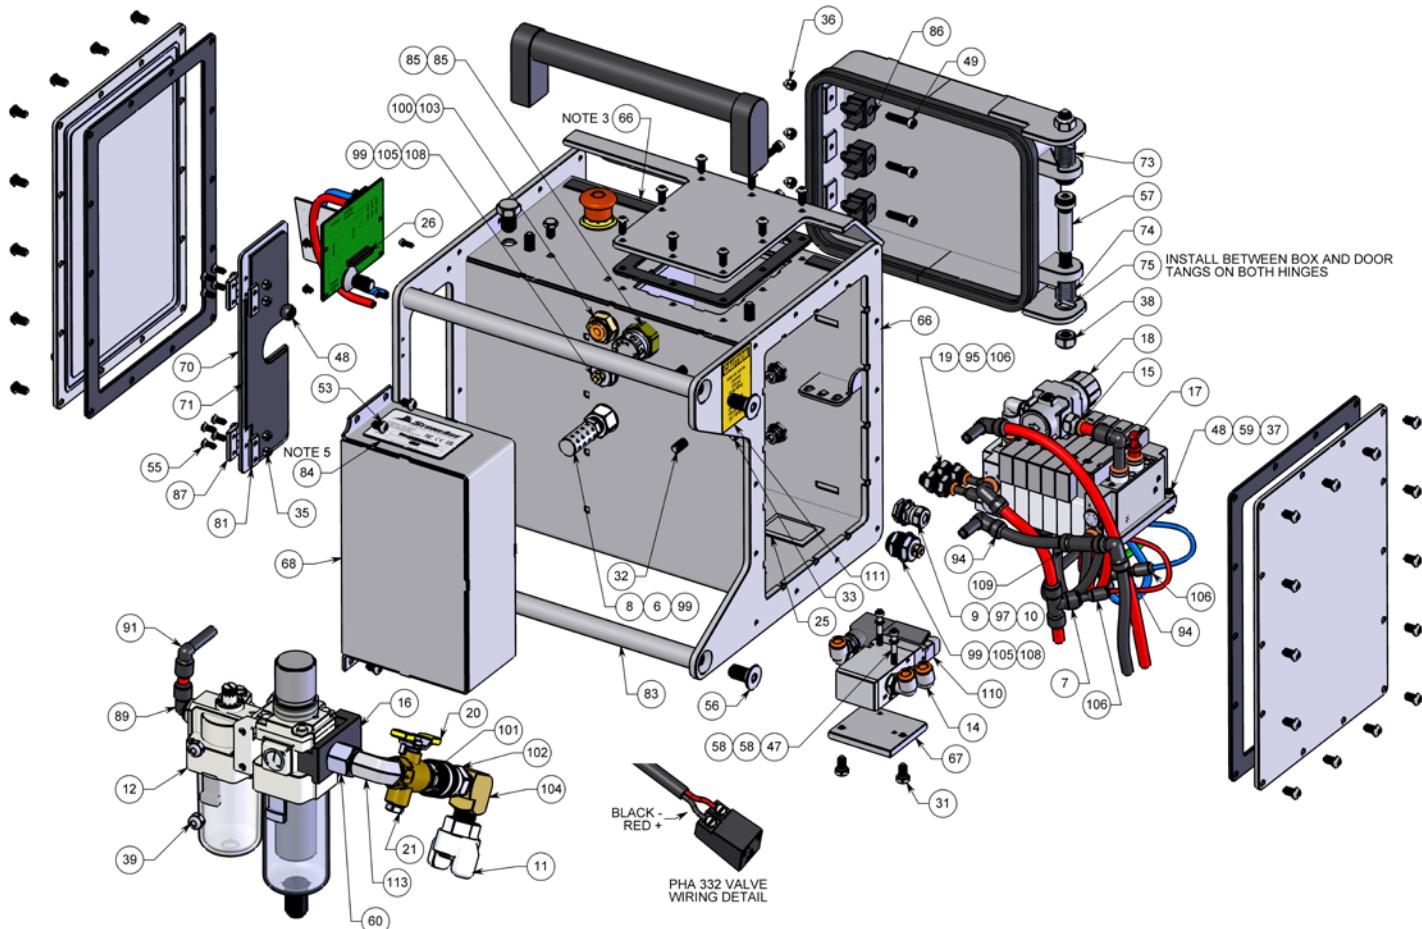

Before storing the Controller or Power Hub, wash with a sponge and warm soapy water, then let air dry. Do NOT pressure wash components. Treat the Controller like a cell phone. Extended storage should be maintained in moderate temperatures, between 40F and 80F.

TERMS AND CONDITIONS

1. Acceptance of Terms and Conditions. Receipt of these Terms and Conditions of Sale ("Terms and Conditions") shall operate as the acceptance by StoneAge, Inc. ("Seller") of the order submitted by the purchaser ("Buyer"). Such acceptance is made expressly conditional on assent by Buyer to these Terms and Conditions. Such assent shall be deemed to have been given unless written notice of objection to any of these Terms and Conditions (including inconsistencies between Buyer's purchase order and this acceptance) is given by Buyer to Seller promptly on receipt hereof.

Seller desires to provide Buyer with prompt and efficient service. However, to individually negotiate the terms of each sales contract would substantially impair Seller's ability to provide such service. Accordingly, the product(s) furnished by Seller are sold only according to the terms and conditions stated herein and with the terms and conditions stated in any effective StoneAge Dealer Agreement or StoneAge Reseller Agreement, if applicable. Notwithstanding any terms and conditions on Buyer's order, Seller's performance of any contract is expressly made conditional on Buyer's agreement to these Terms and Conditions unless otherwise specifically agreed to in writing by Seller. In the absence of such agreement, commencement of performance, shipment and/or delivery shall be for Buyer's convenience only and shall not be deemed or construed to be an acceptance of Buyer's terms and conditions.

2. Payment/Prices. Unless other arrangements have been made in writing between Seller and Buyer, payment for the product(s) shall be made upon receipt of invoice. The prices shown on the face hereof are those currently in effect. Prices invoiced shall be per pricelist in effect at the time of shipment. Prices are subject to increase for inclusion of any and all taxes which are applicable and which arise from the sale, delivery or use of the product(s), and the collection of which Seller is or may be responsible to provide to any governmental authority, unless acceptable exemption certificates are provided by Buyer in accordance with applicable law. Buyer shall pay all charges for transportation and delivery and all excise, order, occupation, use or similar taxes, duties, levies, charges or surcharges applicable to the product(s) being purchased, whether now in effect or hereafter imposed by any governmental authority, foreign or domestic.

3. Warranty. SELLER MAKES NO WARRANTIES OR REPRESENTATIONS AS TO THE PERFORMANCE OF ANY PRODUCT EXCEPT AS SET FORTH IN THE STONEAGE LIMITED WARRANTY PROVIDED WITH THE PRODUCT.

4. Delivery. Seller is not obligated to make delivery by a specified date, but will always use its best efforts to make delivery within the time requested. The proposed shipment date is an estimate. Seller will notify Buyer promptly of any material delay and will specify the revised delivery date as soon as practicable. UNDER NO CIRCUMSTANCES SHALL SELLER HAVE ANY LIABILITY WHATSOEVER FOR LOSS OF USE OR FOR ANY DIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM DELAY REGARDLESS OF THE REASON(S).

All product(s) will be shipped F.O.B. point of origin, unless specifically agreed otherwise, and Buyer shall pay all shipping costs and insurance costs from that point. Seller, in its sole discretion, will determine and arrange the means and manner of transportation of the product(s). Buyer shall bear all risk of loss commencing with the shipment or distribution of the product(s) from Seller's warehouse. Order shortages or errors must be reported within fifteen (15) business days from receipt of shipment to secure adjustment. No product(s) may be returned without securing written approval from Seller.

5. Modification. These Terms and Conditions are intended by Seller and Buyer to constitute a final, complete and exclusive expression of agreement relating to the subject matter hereof and cannot be supplemented or amended without Seller's prior written approval.

6. Omission. Seller's waiver of any breach or Seller's failure to enforce any of these Terms and Conditions at any time, shall not in any way affect, limit or waive Seller's right thereafter to enforce and compel strict compliance with every term and condition hereof.

7. Severability. If any provision of these Terms and Conditions is held to be invalid or unenforceable, such invalidity or unenforceability shall not affect the validity or enforceability of the other portions hereof.

8. Disputes. Seller and Buyer shall attempt in good faith to promptly resolve any dispute arising under these Terms and Conditions by negotiations between representatives who have authority to settle the controversy. If unsuccessful, Seller and Buyer shall further attempt in good faith to settle the dispute by nonbinding third-party mediation, with fees and expenses of such mediation apportioned equally to each side. Any dispute not so resolved by negotiation or mediation may then be submitted to a court of competent jurisdiction in accordance with the terms hereof. These procedures are the exclusive procedures for the resolution of all such disputes between the Seller and Buyer.

9. Governing Law. All sales, agreements for sale, offers to sell, proposals, acknowledgments and contracts of sale, including, but not limited to, purchase orders accepted by Seller, shall be considered a contract under the laws of the State of Colorado and the rights and duties of all persons, and the construction and effect of all provisions hereof shall be governed by and construed according to the laws of such state.

10. Jurisdiction and Venue. Seller and Buyer agree that the state or federal courts located within the City and County of Denver, Colorado shall have sole and exclusive jurisdiction over any litigation concerning any dispute arising under these Terms and Conditions not otherwise resolved pursuant to Section 9 as well as any alleged defects of any Products or damages sustained as a result of such alleged defects. Seller and Buyer further agree that should any litigation be commenced in connection with such a dispute, it shall only be commenced in such courts. Seller and Buyer agree to the exclusive jurisdiction of such courts and neither will raise any objection to the jurisdiction and venue of such courts, including as a result of inconvenience.

11. Attorney's Fees. If any litigation is commenced between Seller and Buyer, or their personal representatives, concerning any provision hereof, the party prevailing in the litigation shall be entitled, in addition to such other relief that is granted, to a reasonable sum as and for their attorneys' fees and costs in such litigation or mediation.

WARRANTY INFORMATION

Warranties set forth herein extend only to End-Users, meaning customers acquiring, or that have previously acquired, a product manufactured by StoneAge ("Product") for their own use and not for resale, either directly from StoneAge Inc. ("StoneAge") or from a StoneAge Authorized Dealer or Reseller ("Dealer"). No warranty of any kind or nature is made by StoneAge beyond those expressly stated herein.

1. LIMITED WARRANTY PERIOD. Subject to the limitations and conditions hereinafter set forth, StoneAge warrants its Product to be free from defects in workmanship and material for a period of one (1) year from the date of purchase by the End-User, provided that the end of the limited warranty period shall not be later than eighteen (18) months from the date of shipment of the Product to the Dealer or the End-User by StoneAge ("Limited Warranty Period"). All replacement parts which are furnished under this Limited Warranty and properly installed shall be warranted to the same extent as the original Product under this Limited Warranty if, and only if, the original parts were found to be defective within the original Limited Warranty Period covering the original Product. Replacement parts are warranted for the remainder of the original Limited Warranty Period. This Limited Warranty does not cover any component part of any Product not manufactured by StoneAge. Any such component part is subject exclusively to the component manufacturer's warranty terms and conditions.

2. LIMITED WARRANTY COVERAGE. StoneAge's sole obligation under this Limited Warranty shall be, at StoneAge's option and upon StoneAge's inspection, to repair, replace or issue a credit for any Product which is determined by StoneAge to be defective in material or workmanship. StoneAge reserves the right to examine the alleged defective Product to determine whether this Limited Warranty is applicable, and final determination of limited warranty coverage lies solely with StoneAge. No statement or recommendation made by a StoneAge representative, Dealer or agent to End-User shall constitute a warranty by StoneAge or a waiver or modification to any of the provisions hereof or create any liability for StoneAge.

3. WARRANTY SERVICE PROVIDERS. Service and repair of the Product is to be performed only by StoneAge authorized service representatives, including Dealers who are authorized repair centers, with StoneAge approved parts. Information about StoneAge authorized service representatives can be obtained through the StoneAge website at www.stoneagetools.com/service. Unauthorized service, repair or modification of the Product or use of parts not approved by StoneAge will void this Limited Warranty. StoneAge reserves the right to change or improve the material and design of the Product at any time without notice to End-User, and StoneAge is not obligated to make the same improvements during warranty service to any Product previously manufactured.

4. WARRANTY EXCLUSIONS. This Limited Warranty does not cover, and StoneAge shall not be responsible for the following, or damage caused by the following: (1) any Product that has been altered or modified in any way not approved by StoneAge in advance in writing; (2) any Product that has been operated under more severe conditions or beyond the rated capacity specified for that Product; (3) depreciation or damage caused by normal wear and tear, failure to follow operation or installation instructions, misuse, negligence or lack of proper protection during storage; (4) exposure to fire, moisture, water intrusion, electrical stress, insects, explosions, extraordinary weather and/or environmental conditions including, but not limited to lightning, natural disasters, storms, windstorms, hail, earthquakes, acts of God or any other force majeure event; (5) damage to any Product caused by any attempt to repair, replace, or service the Product by persons other than StoneAge authorized service representatives; (6) costs of normal maintenance parts and services; (7) damage sustained during unloading, shipment or transit of the Product; or (8) failure to perform the recommended periodic maintenance procedures listed in the Operator's Manual accompanying the Product.

5. REQUIRED WARRANTY PROCEDURES. To be eligible for warranty service, the End-User must: (1) report the Product defect to the entity where the Product was purchased (i.e. StoneAge or the Dealer) within the Limited Warranty Period specified in this Limited Warranty; (2) submit the original invoice to establish ownership and date of purchase; and (3) make the Product available to a StoneAge authorized service representative for inspection to

determine eligibility for coverage under this Limited Warranty. This Limited Warranty shall not extend to any person or entity who fails to provide proof of original purchase from StoneAge or a Dealer. No Product may be returned for credit or adjustment without prior written permission from StoneAge.

6. DISCLAIMER OF IMPLIED WARRANTIES AND OTHER REMEDIES. EXCEPT AS EXPRESSLY STATED HEREIN (AND TO THE FULLEST EXTENT ALLOWED UNDER APPLICABLE LAW), STONEAGE HEREBY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ANY AND ALL WARRANTIES, REPRESENTATIONS OR PROMISES AS TO THE QUALITY, PERFORMANCE OR FREEDOM FROM DEFECT OF THE PRODUCT COVERED BY THIS LIMITED WARRANTY. STONEAGE FURTHER DISCLAIMS ALL IMPLIED INDEMNITIES.

7. LIMITATION OF LIABILITY. End-User specifically acknowledges that the Product may be operated at high speeds and/or pressures, and that as such it may be inherently dangerous if not used correctly. End-User shall familiarize itself with all operation materials provided by StoneAge and shall at all times use and require its agents, employees and contractors to use all necessary and appropriate safety devices, guards and proper safe operating procedures. In no event shall StoneAge be responsible for any injuries to persons or property caused directly or indirectly by the operation of the Product if End-User or any agent, employee, or contractor of End-User: (1) fails to use all necessary and appropriate safety devices, guards and proper safe operating procedures; (2) fails to maintain in good working order such safety devices and guards; (3) alters or modifies the Product in any way not approved by StoneAge in advance in writing; (4) allows the Product to be operated under more severe conditions or beyond the rated capacity specified for the Product; or (5) otherwise negligently operates the Product. End-User shall indemnify and hold StoneAge harmless from any and all liability or obligation incurred by or against StoneAge, including costs and attorneys' fees, to or by any person so injured.

TO THE FULL EXTENT ALLOWED BY APPLICABLE LAW, STONEAGE SHALL NOT BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES (INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF GOODWILL, DIMINUTION OF VALUE, WORK STOPPAGE, INTERRUPTION OF BUSINESS, RENTAL OF SUBSTITUTE PRODUCT, OR OTHER COMMERCIAL LOSS EVEN TO THE EXTENT SUCH DAMAGES WOULD CONSTITUTE DIRECT DAMAGES), WITH RESPECT TO THE COVERED STONEAGE PRODUCT, OR OTHERWISE IN CONNECTION WITH THIS LIMITED WARRANTY, REGARDLESS OF WHETHER STONEAGE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

IT IS UNDERSTOOD THAT STONEAGE'S LIABILITY, WHETHER IN CONTRACT, IN TORT, UNDER ANY WARRANTY, IN NEGLIGENCE, OR OTHERWISE SHALL NOT EXCEED THE AMOUNT OF THE PURCHASE PRICE PAID BY THE END-USER FOR THE PRODUCT. STONEAGE'S MAXIMUM LIABILITY SHALL NOT EXCEED, AND END-USER'S REMEDY IS LIMITED TO EITHER (1) REPAIR OR REPLACEMENT OF THE DEFECTIVE WORKMANSHIP OR MATERIAL OR, AT STONEAGE'S OPTION, (2) REFUND OF THE PURCHASE PRICE, OR (3) ISSUANCE OF A CREDIT FOR THE PURCHASE PRICE, AND SUCH REMEDIES SHALL BE END-USER'S ENTIRE AND EXCLUSIVE REMEDY.

YOU, THE END-USER, UNDERSTAND AND EXPRESSLY AGREE THAT THE FOREGOING LIMITATIONS ON LIABILITY ARE PART OF THE CONSIDERATION IN THE PRICE OF THE STONEAGE PRODUCT YOU PURCHASED.

Some jurisdictions do not allow the limitation or exclusion of liability for certain damages, so the above limitations and exclusions may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights which vary from jurisdiction to jurisdiction. If any provisions of this Limited Warranty is held to be invalid or unenforceable, such invalidity or unenforceability shall not affect the validity or enforceability of the other portions hereof.
