

WS-1/2 CLASSIC

4"-8" (102-204 mm) Lines

The WS-1/2 is designed to handle 4"-8" (102-204 mm) lines and is most commonly used with trailer jetters. It is used to clean lines in restaurants, hospitals, multi-story apartment buildings, residential, and other applications. Easily removes grease, cuts roots, and clears ice and soil blockages.

WS-J JOINTED INLET MODELS

This model allows the inlet hose to bend to the side, shortening the rigid length of the tool and allowing limited access applications to be cleaned much easier. 1/2" NPT or BSPP inlet ports available.

WS-P8 OPTIONAL RIGID INLETS

The WS-P8 is excellent for straight pipes. The whip hose is removed, allowing the hose to connect directly to the tool. Available with a female 1/2" NPT or BSPP connection.

NOTE: 4" (102 mm) 90° bends are no longer negotiable in this configuration.
